

NMP 2.0 is a bold step; it can unlock resources for reinvestment

THE government has done well to set a target of Rs 16.7 lakh crore for National Monetisation Pipeline (NMP) 2.0. The objective is to monetise assets of more than 2,000 projects in 12 sectors till 2029-30. The Prime Minister-headed NITI Aayog, after consultation with infrastructure ministries, has developed NMP 2.0, which Finance Minister Nirmala Sitharaman launched on Monday. A NITI Aayog paper said in 2021, “Asset monetisation, based on the philosophy of ‘Creation through Monetisation’, will tap institutional investment and long-term patient capital into stable mature assets, in turn generating financial resources for new infrastructure asset creation. This will enable economic growth, generating employment opportunities and better prospects for the

country’s growth.” At the launch, the Finance Minister complimented all ministries and departments and NITI Aayog for meeting nearly 90 per cent of the target of Rs 6 lakh crore, which was set for four years in the implementation of NMP 1.0. On the face of it, praise for falling short of the target seems awkward. However, if the polarised political situation and the perverted public discourse (which equates processes like privatisation and asset monetisation as cheaply selling off national treasure) are considered, we find that her comments are not off the mark.

Highlighting the significance of asset monetisation, she rightly pointed out that NMP enables recycling of productive public assets, thereby unlocking resources for reinvestment in new projects and

capital expenditure. She noted that this approach facilitates efficient mobilisation of funds for capex in public assets while minimising the budgetary outgo of the government. While the Centre has the courage to go ahead with the programme, it must ensure that it doesn’t result in corruption and monopolies. Six points need to be considered regarding this. First, the government must ensure transparency in valuation. Public assets must be priced realistically and competitively. Independent advisors, transparent bidding processes, and robust disclosure norms are essential. All contracts should be made public, barring commercially sensitive details, so that citizens and oversight bodies can scrutinise them. The credibility of NMP 2.0 will rest on the perception that assets are neither under-

valued nor selectively awarded. Second, competitive bidding must be genuine, not cosmetic. If a handful of large conglomerates dominate most sectors, the risk of concentration increases. This can lead to a situation where the state replaces a public monopoly with a private one. Third, the contract design must balance investor incentives with public interest safeguards. Concession agreements should include performance benchmarks, service quality standards, and penalty clauses for non-compliance. For instance, toll road operators must adhere to maintenance and safety norms; power transmission operators must ensure reliability; airport operators must maintain passenger service standards. Regulatory oversight cannot be lax once assets are monetised. The objec-

tive is efficiency, not abdication. Fourth, revenue-sharing and user charges need careful calibration. While private operators must earn a fair return, excessive user fees can generate public resentment and fuel political backlash. Transparent tariff-setting mechanisms, ideally overseen by independent regulators, can mitigate such risks. Fifth, strong audit and accountability mechanisms are indispensable. Institutions such as the Comptroller and Auditor General (CAG) and parliamentary committees should periodically review monetisation outcomes. And, finally, the government must effectively explain the difference between monetisation and privatisation, emphasising that ownership remains public and that funds raised are earmarked for new infrastructure.

Rich brats cause fatal accidents but go scot-free

DR HYMA MOORTY

A rich ‘brat’ in Pune, son of a construction tycoon, killed two young IT professionals snatching away their promising careers. Another rich ‘brat’ was arrested from Virar, Mumbai, after mercilessly and consciously murdering a mother of two young children, while a third killed two promising young boys. In the recent Lamborghini hit and run case in Kanpur, the spoilt brat at the wheel brought the car driver to the driving seat. It was the presence of mind of the socially conscious by-passers that ensured that the rich guy responsible for the accident was booked. In Delhi’s Dwaraka locality, a juvenile boy was speeding a Scorpio without a license, and his sister was filming a social-media ‘reel’ and the vehicle killed a 23-year-old and severely injured a cab driver. His mother, a single parent, was devastated.

Looking back, one finds that such reckless incidents are happening too often, especially with young drivers hungry for social media fame. All these ‘killers’ brazenly wear up their sleeve tattooed inscriptions like ‘Mera baap amir hai’. These are offspring of stinking rich parents, who drive high-end cars and question the law by flaunting the clout of their

father. The list is long and endless. Justice hinges on courts where cases are overly delayed. The system is in cahoots to help relieve the accused of any punishment. It is a harsh reminder of how money and power can call the shots, leaving the victims powerless. It’s a serious issue and needs more awareness and stricter enforcement.

But public outcry and media pressure often push authorities to act, collective vigilance matters. It is not easy to cope with the sudden loss of a family member.

These recent cases of drunk driving involving youngsters and unlicensed juvenile drivers, often referred to as ‘rich brats’ by the media and society, have been alarming. It highlights the pressing issue of underage drinking and its fatal consequences. Drivers aged between 21 and 24 years, under the influence of alcohol, account for most fatal accidents.

This trend calls for strict enforcement of laws and public awareness campaigns on responsible drinking. It’s a common concern that wealth and influence can lead to unequal treatment under the law, with ordinary citizens facing harsher consequences for similar of-

After all, money can ‘fix’ almost everything these days. Power always twists, and when money becomes absolute, it smothers conscience. Compassion, pity, help, fear and support get buried deep while ego, pride and wealth surface and dominate. No rules and regulations can resolve such problems.

fences. Cases like the Lamborghini one in Kanpur often spark public outcry and intense calls for justice highlighting the need for unbiased accountability in investigation.

Let us analyze the reasons why many of these rich ‘brats’ fall and flash their ‘borrowed’ riches. The most important reason is to have the privilege of growing up in affluent surroundings. This leads to reckless behaviour, including excessive drinking and reckless driving unmindful of the consequences.

The social circles they move around normalises excessive drinking and un-

heeding conduct, be it at home or on road, creating an environment where such actions are seen as acceptable or even as status symbols. They experience a high-stress environment despite external perceptions of luxury; the pressures and expectations placed on wealthy individuals can lead to stress and coping mechanisms that lead them to substance abuse. Lack of responsibility towards themselves, family and society and personal accountability add to the intoxication. Parents are to be held accountable and answerable to varying extents for accidents and killings caused by their juveniles

and addict children. If they fail to spend some time and educate their children about the damage of drinking and driving, they are morally and ethically responsible. They are supposed to supervise their children, especially when they are underage and not legally allowed to drink or drive. If they are aware of their child’s brash and erratic behaviour but fail to take any timely action, they should be held liable for the consequences. Parents have a significant role in shaping their children’s behaviour.

Most of the accidents in our country are caused by human error, carelessness and being casual at the wheel. It is necessary to be cautious and sincerely obey traffic rules, irrespective of who and what you are.

Meanwhile, some accidents are caused even if one is careful, especially at choked traffic interjections like Ameerpet junction in Hyderabad, where the bikers squeeze to cross and hit the waiting vehicle. While driving, distraction is the worst thing to happen and nowadays everyone is super pleased with their distracted driving, which has been on the rise for the last 15 years or so. The worst distractions include being under the influence of drugs or alcohol

and conversing on the mobile.

The rich have money to pay the penalties. They can afford highly specialized counsel and top-tier expert witnesses, independent crime scene investigators and many skilled attorneys. A few wealthy people have high influence, and it becomes difficult for individuals to come forward and testify against them. As a result, prosecution cannot build a strong case. Witnesses and victims of crimes can all be paid to not testify or change the narrative totally.

After all, money can ‘fix’ almost everything these days. Power always twists, and when money becomes absolute, it smothers conscience. Compassion, pity, help, fear and support get buried deep while ego, pride and wealth surface and dominate. No rules and regulations can resolve such problems. The mentality of the public needs to change. Better sense should prevail. We start acting human again when we notice this shift and choose humility over greed, restoring empathy before it’s completely erased.

Drinking and driving doesn’t just take your life; it shatters the lives of those who love you. It will be good if every youngster and the elders remember this and change their mindset accordingly.

Sakunthala KR, Hyderabad

India should emulate the Lankan example

THIS has reference to your editorial ‘Sri Lankan Parliament shows the way for India’. It is time India implements the Sri Lankan model about salaries and perks of MPs and MLAs. In fact, this is an issue dominating the minds of the people of the country for a long time. The lawmakers unabashedly and unilaterally attempt to enhance their perks and salaries, forgetting the purpose for which they have been elected. The situation assumes significance when these elected members have no compunctions to stall the proceedings in the Parliament for no reason at all – except to score brownie points. The Sri Lankan model can infuse a sense of responsibility and purpose in the minds of Indian lawmakers, once it is implemented.

TSSPDCL’s chatbot is a timely move

THE Southern Power Distribution Company of Telangana Limited (TSSPDCL) has done well by launching its own WhatsApp chatbot, which is aimed at providing faster, more convenient, and accessible power-related services to consumers. Through this platform, users can easily register complaints, check billing details, and obtain power supply information on 8712441912. This initiative reflects a thoughtful adoption of modern technology to enhance customer service. The chatbot reduces the need to make countless calls or office visits. Such forward-thinking measures highlight TSSPDCL’s commitment to efficiency, transparency, and the digital transformation of public utility services in the state. This development is not only a practical improvement for everyday users but also a significant step toward building a more user-friendly, technology-driven public service ecosystem.

Adulterated milk is the new killer

It is quite ironic that incidents of adulterated milk have come to light even as there are unending debates over adulterated Tirumala laddu. It is reported that 106 families from Rajamahendravaram, who get milk from a private dairy located in Narasapuram, have developed ‘anuria’ (absence of urine). In an unfortunate development, four persons died and several others are undergoing treatment in various hospitals. It is a known fact that milk is wholesome food and so it is one of the staple items in the plate in various forms. Presently, private dairies are resorting to different ways to adulterate the milk to capitalise on the demand. At the same time, monitoring by agencies like FSSAI has been inactive and, as such, there is no quality check. The government must toughen its stand and ensure uncontaminated milk, which is ever in demand and by almost all households.

K’taka CM blames BJP as Dharwad protests intensify

BENGALURU: As protests by government job aspirants intensified in Dharwad, with many taken into preventive custody, Karnataka Chief Minister Siddaramaiah on Tuesday blamed the previous BJP regime for the large backlog of vacant posts. According to protesters, who staged a massive demonstration in Dharwad earlier in the day, around 2.8 lakh posts remain vacant across various government departments in Karnataka, while fewer than 5,000 recruitments have been made in the last three years. In a press statement, Siddaramaiah said that when the Congress assumed office in 2023, over 2.64 lakh government posts were vacant. He said the backlog was the result of “prolonged inaction under the previous BJP government, which failed to initiate timely recruitment or create a structured roadmap to fill vacancies.” “It is deeply unfortunate that BJP leaders are choosing to mislead innocent students even now to serve their narrow political interests,” the CM said. He alleged that, instead of encouraging aspirants to stay focused on their preparation and future, opposition leaders were “attempting to instigate unrest.” The chief minister said the current situation was largely due to recruitment irregularities and alleged corruption during the BJP regime between 2019 and 2023, which eroded trust in the system and led to a significant backlog.

THE RISE AND FALL OF EL MENCHO

B V KUMAR

NEMESIO Oseguera Cervantes, known as “El Mencho”, died on Sunday while being taken to the capital Mexico City, after being seriously injured in clashes between his supporters and the Mexican army. Four CJNG members were killed in the town of Tapalpa, the central-western Jalisco state. Three army personnel were also injured. The US had given Mexico tactical Intelligence that assisted the operation.

Over the past year, Claudia Sheinbaum Pardo, President of Mexico has come under intense pressure from US President Donald Trump, who threatened military intervention and higher import tariffs if Mexico fails to demonstrate concrete gains in curbing drug trafficking. However, Sheinbaum has rejected the notion of US strikes in Mexico, characterizing them as a violation of Mexico’s sovereignty and territorial integrity.

According to its 2023 Annual Threat Assessment, the US intelligence community cited Mexico-based Transnational Criminal Organizations (TCOs) as the dominant producers and suppliers of various illicit drugs destined for the domestic U.S. market. Mexican TCOs, particularly the Sinaloa Cartel and the Jalisco Nueva Generacion (CJNG) remain the most predominant and sophisticated groups overseeing the transportation and distribution routes from Mexico to the United States.

Both groups have consolidated control over drug corridors from Mexico and are heavily involved in trafficking of fentanyl, methamphetamine, cocaine, heroin, and marijuana. Both have a history of establishing drug trafficking hubs, strong criminal partnerships, and using violence and corruption to gain control over the territory where they operate.

The Sinaloa and Jalisco Cartels pose the greatest criminal drug threat the United States has ever faced. These ruthless, violent, criminal organizations have associates, facilitators, and brokers in all 50 states in the United States, as well as in more than 100 countries around the world. The Sinaloa Cartel, the Jalisco Cartel, and their affiliates

control most of the fentanyl global supply chain, from manufacture to distribution.

The Jalisco Cartel maintains illicit drug distribution hubs in Los Angeles, Seattle, Charlotte, Chicago, and Atlanta. Internationally, the Jalisco Cartel has a presence and influence through associates, facilitators, and brokers on every continent, except Antarctica.

In Milenio Cartel, El Mencho started as a member of the assassin squad that protected the drug lord Armando Valencia Cornelio (“El Maradona”). On 12 August 2003, his boss was arrested by Mexican authorities. Around the same time, a rival criminal group known as Los Zetas, with the backing of the Gulf Cartel, carried out an armed offensive against the Milenio Cartel in Michoacán. The attack forced the Valencia family to exile in Jalisco.

El Mencho relocated to the state capital, Guadalajara, with his father-in-law José Luis González Valencia (alias “El Quini”) and Román Caballero Valencia. In Jalisco, El Mencho and the Milenio Cartel formed an alliance with the Sinaloa Cartel subgroup headed by Ignacio “Nacho” Coronel, a high-ranking drug lord and ally of Joaquín “El Chapo” Guzmán. Under Coronel, El Mencho and his group managed the Sinaloa Cartel’s drug operations, finances, and murder activities in the states of Colima and Jalisco.

The Milenio Cartel split into two. One

Part of El Mencho’s success in the drug trade had to do with his ability to strategize market and consumer changes. Initially, the CJNG produced methamphetamine, but then he moved to heroin production when the consumer demand changed. In a series of highly coordinated tactics to prevent El Mencho’s arrest, the CJNG blocked several highways and roads by setting at least 37 vehicles on fire. The purpose was to place them as blockades and give him ample time to escape

side was known as La Resistencia (The Resistance), the other was Los Mata Zetas (The Zeta Killers), headed by El Mencho. La Resistencia accused Los Mata Zetas of turning in Oscar Orlando to the authorities. A war ensued, and the two groups fought for the drug smuggling turf in Jalisco.

As leader of the CJNG, El Mencho consolidated his position and strengthened his organization through territorial expansion and established himself as one of Mexico’s most-wanted criminals. His rise to fame was due to several factors, including the aggressive and sensationalist displays of public violence by CJNG. The direct attacks of the CJNG against Mexico’s security forces earned El Mencho a reputation among authorities as “principal enemy” of the state and as a dangerous criminal. In addition, the fall of Mexico’s former top crime bosses cleared the way for El Mencho to gain visibility and status.

He consolidated his operations in Jalisco and its adjacent states by fighting off incursions from criminal groups like Los Zetas and the Knights Templar Cartel. According

to government sources, he was responsible for overseeing the CJNG’s entire drug trafficking operations in the states of Jalisco, Colima, and Guanajuato, where he created a bastion for methamphetamine production and trade.

Between 2014 and 2016, the only region in the country where the CJNG lost its territorial presence was in Mexico City. Internationally, the CJNG reportedly has ties with criminal groups in the U.S., the rest of Latin America, Europe, Asia, and Africa. On an international scale, CJNG is mainly focused on trafficking cocaine and methamphetamine.

The government estimated that El Mencho’s group has about \$50 billion in total assets. Part of El Mencho’s success in the drug trade had to do with his ability to strategize market and consumer changes. Initially, the CJNG produced methamphetamine, but then he moved to heroin production when the consumer demand changed.

In a series of highly coordinated tactics to prevent El Mencho’s arrest, the CJNG blocked several highways and roads across the Guadalajara Metropolitan Area by setting at least 37 vehicles on fire. The purpose was to place them as blockades to impede the security forces from traveling across Jalisco’s capital and giving El Mencho ample time to escape. The blockades were placed in strategic routes to prevent police reinforcements from coming in or leaving Guadalajara. After the attacks were over, the government confirmed that El Mencho was in the area and had evaded capture. The US government announced US\$ 10 million as reward to capture El Mencho, which was increased to US\$ 15 million.

Sheinbaum has pursued a direct approach to combating organized crime by increasing cooperation with the US security agencies. In a major operation launched by the Mexican Army the most wanted man and the leader of the feared Jalisco New Generation (CJNG) drug cartel have been killed during a security operation to arrest him, the Defence Ministry has said.
