

War to decide Middle East’s future, dynamics of western alliances

US President Donald Trump recently said that he was “not happy with the UK” for the delay in sending two aircraft carriers to the Middle East. In fact, he has reasons to be unhappy with all American allies. Japan and Australia have announced that they were not planning to send navy vessels to West Asia to escort ships through the Strait of Hormuz, which the US President called on the allies to do. He wanted them to create a coalition to reopen the vital waterway. But Japan and Australia are distant US allies; even the UK and Germany, US’ allies in the North Atlantic Treaty Organization (Nato), have also not been of much use in the war against Iran. UK Prime Minister Keir Starmer

has made it clear that his country will not be drawn into a “wider war” and he is “working with allies” on a viable plan for the Strait of Hormuz. German Chancellor Friedrich Merz was blunter, while asserting that the ongoing war in Iran “is not a matter for Nato.”

The arguments proffered by US allies are specious and self-serving; they need American military support, which is critical, according to the Nato website, “for the provision of some essential capabilities, regarding for instance, intelligence, surveillance and reconnaissance; air-to-air refuelling; ballistic missile defence; and airborne electromagnetic warfare.” Moreover, the US’ contribution to the total Nato expenditure is the

highest. But they would not help the US when it needs them. Merz’s comment is particularly cheeky. At any rate, the US-Israel alliance is fighting for lasting peace in the Middle East, where Iran is the biggest troublemaker, preparing a nuclear arsenal, supplying drones to Russia, and arming and aiding terror groups like Hamas and Hezbollah. The challenge posed by Tehran is not confined to the Middle East. Therefore, supporters of stronger action against Iran argue that the US-Israel alliance is not merely fighting a series of isolated confrontations but is attempting to create a peaceful Middle East. From this perspective, confronting Iranian expansionism and preventing the development of nuclear weapons are

essential steps toward a more stable regional order. The argument holds that failing to act decisively now could allow tensions and proxy conflicts to grow, eventually leading to a far more volatile confrontation in the future.

At the same time, advocates of this position stress that safeguarding the Strait of Hormuz is not solely an American or Israeli concern. After all, the waterway is a vital artery for global energy supplies, disruptions there would affect economies around the world. Oil-importing nations in Europe and Asia would be particularly vulnerable to price shocks and supply shortages. For this reason, proponents believe that ensuring safe passage through the Strait should be

treated as a collective international responsibility rather than a mission carried primarily by the US. The debate highlights a recurring challenge in international alliances: balancing national interests with collective security commitments. While Washington expects its partners to contribute more actively to confront perceived threats, many allies prefer diplomatic engagement and caution over military escalation. Whether a broader coalition eventually emerges to secure the Strait or whether the US and its closest partners act largely on their own will shape not only the future of the Middle East but also the evolving dynamics of Western alliances in an increasingly uncertain global landscape.

Firecracker units have become the new killers

RAVULAPATI SEETARAMARAO

Firecrackers have become deadly! If vendors who run these businesses like those running shops in the ordinary market-selling goods without following safety regulations—are allowed to make fireworks and firecrackers in the run-up to Diwali with unskilled, low-paid workers, and authorities do not immediately rein them in, the number of casualties from such accidents will keep rising each day.

This dangerous trade, produced without any precautions whatsoever, has become a business of hazards. If this bundle of explosives, which has turned into a “high-risk industry,” is not regulated, both the number of fire accidents and the death toll will inevitably keep growing.

Last October in the Konaseema district of Andhra Pradesh, a major fireworks explosion in Grand Fireworks claimed ten lives. When Sri Surya Fire Crackers exploded in Vetapalem village, 20 per-

Aftermath of the blaze in Grand Fireworks at Rayavaram village of Dr BR Ambedkar Konaseema district last October

sons lost their lives in an instant. It was later discovered that both units belonged to the same person. In fact, even though the government had ordered the Vetapalem unit to be shut down as early as January, it is shocking that this controversial company was allowed to continue. It caused yet another deadly disaster.

In the early days, Diwali fireworks used to bring immense joy to everyone! But because the use of explosive materials was less, hazardous situations were not common. Streets would buzz with activity—sparkling flowerpots, moonlight crackers, sparklers and small ground-spinners—making the festival a source of immense happiness for families, especially for children.

Nagpur in Maharashtra and

Sivakasi in Tamil Nadu have the most number of manufacturers of fireworks. Back then, even though strict safety rules were not always followed, the limited use of explosives in manufacturing did not cause any large scale deaths. When accidents did occur, media coverage would spur governments into immediate action to prevent any loss of life or property. The officials responsible for overseeing fireworks also acted responsibly and took appropriate measures whenever needed.

Having seen those days, today thinking about the accidents happening these days makes for a terrifying proposition! In Nagpur, an explosion at the SBEL Energy factory killed 90 workers, most of them being women. In the

It is now crucial that there be a comprehensive review of safety procedures and a deep study of the extent the senior officials are supervising the works in the factory and are swearing by the dos and don'ts. Investigations must determine whether the businesses are providing safe, convenient, and accident-free environments, Licenses should be revoked and criminal action taken against all violators. Otherwise deaths and property losses from these incidents will not stop

last two years alone, over 20 people have lost their lives in accidents at these very units. We should also remember that two people died in solar explosions. This solar plant is huge. Its owner even received the Padma Shri award. Locals mockingly talk about that award, implying it reveals the political connections the owner must have had.

It is because of such political connections that officials responsible for enforcing the relevant laws turn a Nelson’s Eye to the sordid goings on. The tragic irony is that those working in such hazardous units are vulnerable as they are unprotected. Whether or not the governments care, accidents keep happening, which is a grievance that the locals keep cautioning about but to avail. People complain that because adequate safety measures are not implemented to the required levels and as the managers of those units are not prosecuted under the

law, accidents are becoming too frequent. In fact, Nagpur has a safety organization responsible for ensuring that protective measures related to petroleum and explosives are in place and in working condition. Because of whistleblowers from that organisation, there have been CBI investigations. Investigations into PESO officers, accused of issuing licenses and taking bribes, have been carried out, yet explosions and loss of life continue unabated.

It is now crucial that there be a comprehensive review of safety procedures and a deep study of the extent the senior officials are supervising the works in the factory and are swearing by the dos and don'ts.

Investigations must determine whether the businesses are providing safe, convenient, and accident-free environments, Licenses should be revoked and criminal action taken against all violators.

Otherwise deaths and property losses from these incidents will not stop.

In Sivakasi, because authorities have enforced strict measures to prevent accidents and have ensured that child labour is not used in such hazardous units, the number of incidents — and consequently the loss of life — has decreased to noticeable levels.

Many years ago, Diwali firework shops used to be located away from towns. That made it clear that precautions were being taken so that, if accidents happen by mistake, the damage would be limited. Police were often stationed near those shops, constantly checking whether the merchants were taking proper safety measures. Shops opened and closed on schedule. Even if many people went from shop to shop to buy crackers, arrangements were so made that they could leave quickly. Today, even though more shops are set up in crowded places, safety measures are being tossed out.

Experience shows that stalls and shops selling items meant for the Diwali celebration were run in ways that never brought sorrow or anguish to families.

LETTERS

A fitting salute to the ‘people’s poet’

The prestigious Sahitya Akademi Award 2025 being conferred on eminent Telugu poet Nandini Sidda Reddy is a moment of immense pride for Telangana’s literary community. This makes for a significant acknowledgement of contemporary Telugu literature. What makes this honour particularly meaningful is the thematic depth of the award-winning Animesha, which revolves around lived realities of ordinary people during the Covid-19 pandemic. Sidda Reddy’s contribution extends far beyond a single book. As the first chairman of the Telangana Sahitya Akademi, he played a crucial role in promoting the State’s rich regional dialect, folklore, and literary heritage. His earlier achievements—including the Nandi Award for penning stirring lyrics in the film Poru Telangana—reflect his rare ability to bridge the worlds of creative literature, cultural activism, and public consciousness. The latest recognition is not merely an individual accolade to the illustrious son of the soil, whose journey started from a small village in Siddipet but a celebration of Telangana’s cultural identity and the enduring power of socially conscious poetry.

Vidyasagar Reddy Kethiri, Hanumakonda

Making kids emotionally brave

With reference to the article “Raising Emotionally Brave Kids” by Deepti T Nair (THI March 17), I would like to thank the author for highlighting an important concern of modern parenting. In today’s achievement-driven world, many parents tend to shield their children from every possible disappointment. While this stems from love and concern, the article rightly explains how overprotection can weaken a child’s emotional resilience. Allowing children to face small failures helps them understand that setbacks are temporary and manageable. Such experiences gradually develop courage, patience and problem-solving abilities. Children learn that success is not always immediate and that effort and persistence are essential to overcome difficulties. This mindset prepares them not only for academic challenges but also for emotional and social situations later in life. The article is particularly helpful for present-day young parents who often struggle to balance work, time constraints and parenting responsibilities. Meaningful parenting indeed lies in guiding children patiently rather than solving every problem for them.

Raju Kolluru, Kakinada

Narcotics network engulfs TG politics

Propos “TG govt should curb drug menace with Iron fist” (THI, March 17. The recent drug bust in Telangana has sent shockwaves across the political and social landscape, especially with the reported arrest of a sitting TDP MP from Eluru alongside other politicians and associates. The revelations underscore the alarming spread of the drug menace beyond urban youth into influential circles of power. What was once perceived as a fringe criminal activity has now exposed deep-rooted networks with alleged links to political figures, raising serious concerns about governance, law enforcement, and accountability. The incident has highlighted the urgent need for stricter enforcement, transparent investigations, and political will to combat the threat. If unchecked, such developments could erode institutional integrity and pose a grave risk to society’s moral and social fabric.

N Sadhasiva Reddy, Bengaluru-560056

Punish all peddlers

Propos “TG Govt Should Curb Drug Menace with Iron Fist,” (THI, March 17). When elected representatives themselves are found consuming drugs, it signals something more troubling than a law enforcement failure — it reflects a broader erosion of accountability. The Telangana government’s EAGLE initiative was a step in the right direction, but as the article rightly notes, ground-level action has been inconsistent. Cracking down on peddlers while ignoring the demand side, particularly among the affluent and politically connected, will only produce selective justice. What is needed is enforcement that does not discriminate by social standing, stronger regulation of farmhouse gatherings, and genuine political will to act against one’s own.

A Myilsami, Coimbatore-641402

Wipe out drug menace at the source level

This is further to your editorial “TG govt should curb drug menace with iron fist”. It brings out the sad state-of-affairs in social behaviour of the present and past lawmakers who are expected to play a pivotal role in curbing drug menace. Themselves being caught in the act is outright disgusting and condemnable beyond words. This social evil of drug abuse of a variety of variants by the youth of today in Telangana is truly disturbing. The agencies empowered to tackle the menace must be allowed to act fearlessly against all those involved. The supply chain, agents and carriers must be identified so that the authorities can go to the root of this evil and reach the source.

Sri Lankan judge moves HC; Centre, Google raise jurisdiction objections

BENGALURU: A petition filed by Sri Lankan Supreme Court judge A H M D Nawaz before the Karnataka High Court has triggered a legal debate on jurisdiction, with Google LLC and the Ministry of Electronics and Information Technology opposing its maintainability. The plea challenges allegedly defamatory and objectionable content published online against the judge. The matter came up before a bench headed by Justice Sachin Shankar Magadam. During the hearing, counsel for Google argued that the petition itself may not be maintainable before the Karnataka High Court. It was submitted that the alleged defamatory content originated in Sri Lanka, while Google is a US-based entity, raising serious concerns about territorial jurisdiction.

Urgent need to rethink Telangana’s education roadmap

DR SREERAMULU GOSIKONDA

The Government of Telangana’s decision to constitute the Telangana Education Commission (TEC) in September 2024 is a bold initiative. With a mandate to prepare a comprehensive education policy covering pre primary to higher education, including technical streams, the Commission has attempted to chart a roadmap for reform. This effort deserves recognition.

Yet, while the vision is ambitious, several blind spots risk undermining its transformative potential.

In the 21st century, when education must respond to rapid technological change, global competitiveness, and the demand for inclusive growth, the relevance of such a Commission is undeniable. Its role is not only to set clear standards for quality and align reforms with national frameworks like NEP 2020, but also to ensure accountability across both government and private institutions. Without addressing the welfare of private school teachers—who form the majority of the teaching workforce—the promise of reform will remain incomplete.

A progressive step forward:

The TEC, chaired by Akunuri Murali has rightly acknowledged the challenges facing Telangana’s education system. Private school enrolment has surged past 60 per cent, while government schools have seen enrolment collapse to just 26 per cent in first grade by 2024–25. Budget allocations have fluctuated, falling to 5.9 per cent in 2021–22 before recovering modestly to 7.55 per

cent in 2024–25. Learning outcomes remain poor, with only 31.5 per cent of Standard-V students able to read a Standard-II text. Against this backdrop, several recommendations stand out. The integration of pre-primary education into the school system is a laudable reform, ensuring continuity in early childhood learning.

Equally commendable is the merging of intermediate education with school education, which will reduce duplication and ease student transitions. This reform will also help optimise the use of human resources and existing infrastructure, including laboratories, while reducing the financial burden on the government. In addition, it will not only curb commercialisation of senior secondary education but also create a more conducive atmosphere for students to learn effectively.

Junior Lecturers (JL) who currently may lack a B.Ed. qualification should be given sufficient time to complete it, thereby aligning with the required standards for Post Graduate Teachers (PGTs). The emphasis on English-medium instruction across all levels reflects parental aspirations and global realities. The call to embed sports, arts, and socio-emotional learning as core components of schooling is another progressive step toward holistic education. As regards teachers, closing the D.El.Ed programme and restructuring B.Ed. stage-specific degrees is welcome. It acknowledges the systematic failure of teacher education, which has long undermined classroom quality. Similarly, re-emphasising polytechnic education to produce industry-ready diploma engineers is a pragmatic correction.

Blind spots and missteps:

Yet, the Commission’s vision is not without flaws. Most strikingly, it does not include experienced educators such as school teachers, principals, lecturers, and professors among its members. Policymaking without the voices of those who live the realities of classrooms risks being detached from ground-level challenges. The TEC also suggested that government teachers’ salaries are ‘relatively high.’ In reality, it is a wrong notion. Salaries are determined by state policy and are not excessive.

The move to open Telangana Public Schools with heavy investment is also a questionable proposal. Instead, the state should focus on strengthening existing government schools and improving enrolment.

Ambiguity on NEP 2020:

TEC’s stance on the National Education Policy (NEP 2020) is ambiguous. While it acknowledges certain proposals, such as strengthening pre-school education, it avoids clarity on whether NEP will be fully implemented. This lack of decisiveness can be problematic. NEP 2020 mandates mother tongue instruction at the elementary level, recognising that comprehension matters more than English skills in early grades. The TEC’s blanket recommendation of English-medium instruction

risks undermining this principle. Moreover, the Commission’s report is not available in Telugu, the state’s official language. This is a serious oversight. Policy documents must be accessible to all stakeholders, including teachers, parents, and local communities. Promoting Telugu as a mandatory subject in all schools is equally essential to preserve linguistic identity while balancing global aspirations.

At the higher education level, the TEC rightly calls for restoring the regulatory integrity of the aided sector. The fee reimbursement scheme should be limited to meritorious students across social categories seeking higher education in private institutions. The Commission also observed that nearly 70 per cent of teaching positions in government-run universities remain vacant, a situation that has had a negative impact on both teaching quality and research activities. However, the Commission fails to address another pressing issue: the absence of reservation for local qualified youth in private higher education insti-

tutions including private universities. With unemployment rising since the state’s inception, ensuring opportunities for Telangana’s own graduates is critical.

Silence on private school regulation and teachers welfare:

The TEC’s call for decentralised governance, stronger school leadership, and implementation of Section 12(1)(c) of the RTE Act (mandating 25 per cent seats in private schools for marginalised children) reflects a commitment to equity. Yet, the Commission failed to address the underpaid salaries of private school teachers, who constitute 58 per cent of the state’s teaching workforce and remain the backbone of its education system. Private schools in Telangana are regulated under the AP Education Act of 1982 and G.O. Ms. No. 1 of 1993, which mandated recognition, infrastructure standards, staff qualifications, fee regulation, and allocation of 65 per cent of income toward staff salaries and benefits. In practice, however, many institutions defy rules. With nearly two thirds of students enrolled in private schools, leaving them outside effective regulation undermines educational quality and erodes trust. A fair, transparent policy that enforces compliance and protects both teachers and families is essential to correct this prolonged neglect and restore credibility in the education sector.

The way forward:

The Telangana Education Commission has laid out a roadmap that is ambitious and forward-looking. But ambition alone will not suffice. For

the policy to succeed, it must bring frontline educators into the policymaking process and correct misconceptions about government teacher salaries while simultaneously addressing wage disparities in private schools. The state should prioritise strengthening existing government schools and introduce performance-based promotions while tackling the contract and part-time teaching systems that weaken classroom stability. Equally important is in filling supervisory positions.

At the higher education level, providing reservation for local youth in private institutions is essential to address rising unemployment.

Finally, reforms must align with NEP 2020’s emphasis on mother tongue instruction in early grades, recognising that comprehension in the formative years’ matters more than early English proficiency.

Telangana’s education reforms hold promise, but they cannot succeed if they overlook the realities of both government and private school teachers. With nearly two thirds of children studying in private schools, leaving their teachers underpaid and unprotected is an injustice that undermines reform. A “light but tight” framework, including disclosure of private school accounts as recommended by NEP 2020, is essential for transparency and fairness.

The TEC has opened the door to change; now the government must ensure reforms include private teachers, making education policy truly balanced.
