2 Indian climbers die during Mount Everest descent
KATHMANDU: Two Indian mountaineers who summited Everest have died while descending, an official said on Friday. The climbers, identified as Arun Kumar Tiwari and Sandeep Are, were exhausted while they were coming down from the peak and could not be saved despite the best efforts of their guides, said Rishi Bhandari, secretary general of the Expedition Operators Association of Nepal. It appears that Are summited on Wednesday and Tiwari on Thursday around 5.30 pm, Bhandari said. The guides 'worked really hard' but were not able to save them, he said. Tiwari died near the Hillary Step, just below the summit, after falling ill during his descent on Thursday evening while being assisted by four Sherpa climbers, said Nivesh Karki, Director at Pioneer Adventures, which organised the expedition. Are summited on Wednesday but became unwell during the descent. He was rescued by Sherpa guides from the South Summit and died shortly after arriving at Camp II early Friday, Karki said. Efforts are underway to bring back the bodies of the deceased climbers to Kathmandu, Karki said. With this, the death toll on Everest has reached five in this season. Earlier, three Nepali climbers died on Mt Everest. On Wednesday, three Indians, including Are, were part of 274 climbers who summited the 8,848.86-metre peak. It was a new record for the highest number of ascents ever recorded in a day. The other two were Tulasi Reddi Palpunoori and Ajay Pal Singh Dhaliwal. The following day, on Thursday, India's Lakshmi Kant Mandal also reached the world's highest peak.

India blocks China's request for dispute panel at world body
NEW DELHI: India has blocked China's request to set up a dispute panel at the WTO in a case that Beijing has filed against New Delhi's support measures for the solar cells, modules, and information technology sectors, an official said. Earlier this month, China made this request to the WTO's (World Trade Organization) dispute settlement body. The request follows the failure of bilateral consultations on reaching a mutually-agreed solution on the dispute filed by China in December last year. The Geneva-based official said that India has blocked the first request of China for the establishment of a panel. China has alleged that India's tariff or import duty on certain technology products, and measures like the use of domestic products over imported goods, discriminate against Chinese goods. Beijing, which is a major exporter of goods under these sectors, had claimed that these support measures and incentives infringe rules pertaining to the WTO's General Agreement on Tariffs and Trade 1994.

EC announces polls for 26 RS seats on June 18
NEW DELHI: The NDA is likely to lose one Rajya Sabha seat in the biennial elections for 26 seats in 12 states across the country, while the Congress-led opposition is set to gain three. The Election Commission on Friday announced elections for 26 Rajya Sabha seats on June 18 following the retirement of incumbents, including former prime minister HD Deve Gowda, Congress president Mallikarjun Kharge and party leader Digvijaya Singh, besides two Union ministers

SC questions quota benefits for BC creamy layer

If both parents are IAS officers, why should they have reservations?, asks the top court

NEW DELHI
OBSERVING that with educational and economic empowerment there is social mobility, the Supreme Court on Friday questioned the continued grant of reservation benefits to children of economically and educationally advanced families within backward classes. A bench of Justices B V Nagarathna and Ujjal Bhuyan was hearing a plea challenging a Karnataka High Court judgment which upheld the exclusion of the petitioner, whose parents are both state government employees, from reservation. "If both parents are IAS officers, why should they have reservations? With educational and economic empowerment, there is social mobility. "So then again, to seek reservation for the children, we will never get out of it," the bench observed while issuing notice in the matter. The top court remarked that if the parents of students are in good jobs with handsome incomes, then the children should get out of reservation. The apex court said several orders passed by the government already provide for the exclusion of such affluent sections from reservation benefits, but they are being challenged now. "For the Economically Weaker Section and Disadvantaged Group, there is no social backwardness but only economic backwardness. There has to be some balance. Socially and educationally backward, yes, but once the parents have attained a level because of taking advantage of reservation," the bench said. The petitioner was selected for appointment as an assistant engineer (electrical) in the Karnataka Power Transmission Corporation Limited under the reserved category. The District Caste and Income Verification Committee, however, denied him a caste validity certificate after concluding that he fell within the creamy layer. The authorities noted that both parents were government employees and that their combined income exceeded the prescribed creamy layer threshold. The classification of the petitioner as belonging to the creamy layer was based on the income of his parents, who are salaried employees and whose combined income allegedly exceeded Rs 8,00,000. Consequently, the caste certificate issued to the petitioner, certifying him as belonging to the Kuruba community, was revoked.

2015 EL NINO PATTERN REPEATING?

CM orders state-wide steps to tackle heat emergency

Directs local holiday in extreme heat zones
Govt activates shelters, water kiosks, and emergency response network
AP records temperatures touching 48 degree centigrade amid severe El Nino conditions
HANS NEWS SERVICE AMARAVATI
CHIEF Minister N Chandrababu Naidu conducted an emergency review on heatwave conditions across Andhra Pradesh and directed officials to intensify public safety measures as temperatures continue to surge across the state raising fears of a repeat of the 2015 El Nino pattern. Amid severe heatwave conditions and rising health risks, the Chief Minister instructed officials to remain constantly on alert and identify regions recording very high temperatures for continuous public warnings and emergency interventions. Naidu directed district authorities to consider declaring holidays in areas facing extreme weather conditions depending on local heat intensity and ground-level conditions. Officials informed the Chief Minister that the current heatwave severity had intensified due to a strong El Nino effect, with temperatures touching nearly 48 degree centigrade in several regions over the past three days. The Chief Minister ordered immediate expansion of public relief measures, including the supply of cold drinking water, buttermilk, and ORS packets in crowded public spaces, markets and transport hubs. He instructed collectors to hold press briefings to raise awareness on heatstroke prevention and directed departments to continuously circulate advisories through television, print media, and social media platforms. Stressing that "public safety is the government's top priority," Naidu appealed to people to avoid outdoor movement between 11 am and 4 pm, particularly elderly persons, pregnant women, children and those with existing health conditions. The Chief Minister directed district and mandal-level officials to remain fully prepared for emergency response operations during the ongoing heatwave period. Officials informed the CM that 1,349 heat shelters and drinking water kiosks had already been established across urban areas, while shade arrangements had been provided at 446 major traffic junctions for motorists and traffic personnel. Naidu ordered officials to also place water troughs and earthen pots in public spaces to protect birds and animals affected by the extreme heat.

Centre will make NEET re-test 100 pc error-free, says Pradhan

NEW DELHI
UNION Education Minister Dharmendra Pradhan on Friday said the government had to take "tough decisions" after irregularities were detected in the conduct of the NEET-UG, asserting that authorities did not want even a single deserving student to lose their rightful seat because of the "examination mafia". He also asserted that the government is committed to ensuring that the re-test scheduled to be held on June 21 remains "100 per cent error-free". Addressing the Jagran Bharat Education Conclave 2026, Pradhan said around 22 lakh students have suffered "mental anguish" due to the controversy surrounding the medical entrance exam and the government is committed to fixing the system.

CJP swings into action, demands Pradhan's scalp
NEW DELHI: Back with the tagline "Cockroaches Never Die" after its original X handle was withheld in India, the "Cockroach Janata Party" (CJP), a satirical social-media account, launched a campaign on Friday demanding the resignation of Education Minister Dharmendra Pradhan. The campaign, spearheaded through CJP's new X handle -- "Cockroach Is Back" -- and its Instagram platform, centres on alleged systemic failures in the education sector, particularly concerns surrounding the NEET-UG 2026 "paper-leak" controversy.

TDP-led NDA set to sweep RS polls in AP

AMARAVATI
THE TDP-led NDA in Andhra Pradesh is poised to win all the four Rajya Sabha seats falling vacant in June-July 2026, with the Election Commission announcing the poll schedule on Friday. According to the notification, the Rajya Sabha election is scheduled to be held on June 18. The retiring members from the state include A Ayodhya Rami Reddy, Nathwani Parimal, P Subhaschandra Bose and S Satish Babu. While Reddy, Nathwani Parimal and Bose belong to YSRCP, Babu is from the ruling TDP.

India, Cyprus boost ties to a strategic partnership

NEW DELHI: India and Cyprus on Friday elevated their ties to a strategic partnership and set up a joint task force to facilitate deeper cooperation in sectors such as infrastructure and shipping as Prime Minister Narendra Modi hosted Cyprus President Nikos Christodoulides for wide-ranging talks.

RBI to pay record dividend of ₹2.87L cr to Centre for FY26
MUMBAI: The Reserve Bank of India (RBI) on Friday announced a record Rs 2.87 lakh crore dividend to the government for the 2025-26 financial year, providing financial leeway amid geopolitical challenges. The dividend or surplus transfer for 2024-25 was Rs 2.69 lakh crore, 27.4 per cent more than the payout in 2023-24. The Reserve Bank of India (RBI) had transferred Rs 2.1 lakh crore in dividends to the government for 2023-24 and Rs 87,416 crore for 2022-23. The decision on the dividend payout was taken at the 623rd meeting of the Central Board of Directors of RBI under the Chairmanship of Governor Sanjay Malhotra. "The net income, before risk provision and transfer to statutory funds, aggregated Rs 3,95,972.10 crore in FY 2025-26 as against RS 3,13,455.77 crore in FY 2024-25," RBI said in a statement. The Balance Sheet of the central bank expanded by 20.61 per cent to Rs 91,97,121.08 crore as on March 31, 2026.

AP will export clean energy in future: Lokesh

HANS NEWS SERVICE JAMMALAMADUGU
MINISTER for Education, IT and Electronics Nara Lokesh has observed that the inauguration of the SAEI solar power project here goes beyond the launch of a renewable energy facility. For, it is a celebration of vision, trust, speed, and execution coming together successfully. The Minister inaugurated 600 MW solar power projects established by SAEI Industries Limited at T Konduru village in Kondapuram mandal of the Jammalamadugu constituency on Friday

- » Inaugurates SAEI's 600-MW solar plant in Kadapa district
- » Rs 3,000-cr plant was constructed in 11 months
- » Says AP will sell clean energy to other states besides using it

ency with an investment of nearly Rs.3,000 crore. The inauguration comes as Andhra Pradesh accelerates the implementation of its Integrated Clean Energy Policy 2024, under which the state aims to attract investments worth Rs 10 lakh crore across renewable energy, storage, green hydrogen, transmission, and manufacturing. The company is also exploring further opportunities in Andhra Pradesh in renewable energy and agricultural waste-to-energy initiatives. Addressing the gathering, Lokesh said Andhra Pradesh is rapidly emerging as a major clean energy hub so much so that the state will not only consume green energy but also export it to the rest of the country in future. The development model of the coalition government is focused on job creation, industrial growth, and attracting investments, he remarked.

Bharath checks food quality at Anna canteen

- The Minister spends time interacting with elderly citizens, women, and hospital patient attendants, inquiring about the food's taste, hygiene parameters, and structural setup

- After monitoring the cooking and washing stations, Minister personally dons an apron to serve hot, subsidized lunch items to the citizens standing in line

- Criticises the opposition YSR Congress Party (YSRCP), stating that their leadership could not tolerate the current administration's expanding public welfare footprint

- Reminds the public that the previous regime had abruptly shut down Anna Canteens, depriving low-income families of basic food security

HANS NEWS SERVICE
KURNOOL

ANDHRA Pradesh Minister for Industries, Commerce and Food Processing, TG Bharath, conducted a surprise inspection of the Anna Canteen functioning at the Kurnool Government General Hospital on Friday and said that the opposition YSR Congress Party was unable to digest the welfare measures being implemented by the present government. During his visit, the Minister closely interacted with elderly people, women and attendants having meals at the canteen. He enquired

Minister Bharath serving food at Anna canteen in Kurnool on Friday

whether the food being served was of good quality, hygienic and tasty, and repeatedly asked the beneficiaries to openly share any problems or shortcomings in the facility. The Minister also inspected the surroundings and operational arrangements at the Anna Canteen before personally serving meals to the people present there.

Speaking to the media later, Bharath said the inspection was aimed at understanding the ground-level reality of the scheme and ensuring that the poor and needy were receiving quality food without inconvenience.

He observed that hundreds of people from different regions visit the government hospital every day for treatment and that the Anna Canteen was proving highly beneficial for patients' attendants and economically weaker

sections by providing affordable and nutritious meals. Expressing satisfaction over the public response, the Minister stated that almost everyone he interacted with had given positive feedback regarding the food quality and services at the canteen.

Criticising the previous YSRCP government, he alleged that Anna Canteens were shut down during its tenure, depriving the poor of affordable food facilities.

He said the present government was committed to eradicating hunger among the poor through welfare-oriented initiatives such as Anna Canteens.

TG Bharat further remarked that the opposition was unable to tolerate the growing appreciation and goodwill the government was receiving from the public due to its welfare programmes.

New borewell brings quick water relief to Kappatralla village

- With soaring summer temperatures worsening water scarcity, residents of Kappatralla village in Devanakonda mandal had been struggling safe drinking water for several weeks

- Responding to the crisis, local representatives Kappatralla Surendra and Kappatralla Mallikarjuna immediately initiated relief works on Friday to establish a functional bore water supply system

- The emergency water project was executed following the directives of Alur constituency TDP in-charge Vaikuntham Jyothi and leader Vaikuntham Prasad, ensuring immediate logistics to cater to the parched village

Kappatralla villagers set up bore well to cater drinking water to the residents on Friday

NARENDRA KUMAR
VARIKUNTALA
KURNOOL

RESIDENTS of Kappatralla village in Devanakonda mandal have been facing severe drinking water scarcity amid the intense summer

heat, prompting local leaders to step in with immediate temporary relief measures.

Acting on the directions of Alur constituency in-charge Vaikuntham Jyothi and Vaikuntham Prasad, local representatives Kappatralla Surendra and Kappatralla

Mallikarjuna responded swiftly to the issue and initiated arrangements to ensure drinking water supply to the affected villagers.

Recognising the growing hardships faced by the residents due to acute water shortage, the local leaders

took immediate steps on Friday to set up a bore water supply system in the village as a temporary solution.

They stated that the demand for drinking water has increased significantly due to rising temperatures and assured villagers that continuous efforts are being made to provide uninterrupted drinking water supply.

The initiative has brought considerable relief to the villagers who had been struggling with inadequate access to safe drinking water over the past few weeks.

Villagers appreciated the prompt response and support extended by Kappatralla Surendra and Kappatralla Mallikarjuna in addressing the crisis.

Several villagers, including Kaulutlaya, Chakali Lakshmana, Yerra Kaulutlaya, Chintamanu Sudhakar, Giddayya, and Girapagari Venkatesh, participated in the programme and expressed hope that permanent measures for drinking water supply would also be taken up in the near future.

Man kills aunt over land dispute in Kurnool

HANS NEWS SERVICE
KURNOOL

A gruesome murder over a property dispute shocked residents of Suluvayi village in Holagonda mandal of Kurnool district on Thursday night.

A man allegedly killed his step-aunt with an axe-like weapon after she refused to transfer agricultural land in his name.

The brutal incident created tension and grief in the village, prompting police to tighten security measures to prevent any untoward incidents.

According to police and local sources, Shekanna, son of Gadilinga's first wife, allegedly attacked his stepmother's sister-in-law Yellamma (45), who belonged to the second

File photo of deceased Yellamma

family of the household.

Family members said Gadilinga had earlier allotted nearly two acres of land to his second wife Yellamma.

On Thursday night, Shekanna reportedly returned home in an inebriated condition and demanded that Yellamma transfer the

land registered in her name to him. However, she refused, stating that she had three daughters and intended to keep the property for their future.

Enraged over her refusal, Shekanna allegedly attacked Yellamma with a hunting sickle and killed her on the spot before fleeing from the village.

On receiving information, police rushed to the scene, shifted the body for postmortem, and launched an investigation into the case.

A search operation has been initiated to trace the accused.

Police also deployed security personnel in the village as a precautionary measure to maintain law and order in the wake of the shocking incident.

Jagan has no right to criticise Naidu and Pawan, says AHUDA chief

HANS NEWS SERVICE
ANANTAPUR

JANA Sena District President and AHUDA Chairman TC Varun has strongly condemned former chief minister YS Jagan Mohan Reddy's recent criticisms against Chief Minister N Chandrababu Naidu and Deputy CM Pawan Kalyan.

Varun stated that the politically aware public of Andhra Pradesh will not fall for Jagan's theatrics, which stem from an inability to

stomach the state's progress under the alliance government. Varun sharply questioned Jagan's moral authority to criticize Pawan Kalyan's air travel, reminding the public

that Jagan routinely used a helicopter for distances as short as five kilometers. In contrast, Pawan Kalyan maintains absolute integrity, never misusing a single rupee of public funds for personal use. Declaring the landmark "Super Six" welfare schemes a resounding success, Varun accused Jagan of hatching backdoor conspiracies to block the development of Amaravati. He warned the YSRCP leader to halt his baseless slander or face severe political consequences.

SP pats young artists for bringing pride to police family

HANS NEWS SERVICE
ANANTAPUR

STUDENTS from the Police Children's Summer Camp in Anantapur showcased outstanding talent in the district-level painting competition conducted as part of the International Day of Biodiversity 2026 celebrations.

The competition, organised by the National Green Corps at the Government Degree College in Anantapur, focused on the theme of "Biodiversity".

Five students from the Police Children's Summer Camp, conducted under the initiative of P Jagadish, participated in the junior category, with three students securing top honours.

Sasmitha, a Class VI student, won the first prize along with a cash award of ₹500 for his exceptional performance. Another Class VI student, M Dhanush, secured the second prize for his creativity and artistic presentation. P Vedanta Sai, also studying in Class VI, received a consolation prize for his performance in

the competition. The students used their artwork to highlight environmental awareness and biodiversity conservation, earning appreciation from organisers and participants alike.

Following their success at the district-level event, Superintendent of Police P Jagadish invited the winning students to his chamber and personally congratulated them for bringing recognition to the summer camp and the police family.

Speaking on the occasion, the SP said the Police Children's Summer Camp was aimed at identifying and encouraging the hidden talents and creativity of children from police families.

He noted that participation in such competitions helps improve confidence and motivates students to pursue excellence in academics and extracurricular activities.

The SP conveyed his best wishes to the prize winners and encouraged them to continue striving for higher achievements in the future.

Minister Satya orders immediate removal of canal encroachments

Satya Kumar Yadav reviewing civic and drainage issues with municipal officials during a special meeting in Dharmavaram on Friday

HANS NEWS SERVICE
DHARMAVARAM

SATYA Kumar Yadav visited several rain-affected areas in Dharmavaram on Friday to review sanitation, drainage and civic conditions following overnight rainfall that caused water stagnation and mud accumulation across the town.

Accompanied by Municipal Commissioner Venkataramanayya, municipal staff and local NDA alliance leaders, the Minister inspected key areas including SLV Market, KPT Street, Sridevi Hall Road, Thogata Street, Anjuman Circle and Jatka Stand.

He expressed concern over the deteriorating condition of drainage canals, particularly a major irrigation canal near

Satya Kumar Yadav inspecting an encroached drainage canal in Dharmavaram following recent rains and directing officials to take corrective measures

Sridevi Hall, which he said had significantly narrowed due to encroachments.

He directed officials to conduct an immediate survey and mark encroached portions to ensure the free flow of rainwater during the monsoon season.

He also instructed municipal authorities to strengthen waste management systems, install dustbins where necessary and intensify regular cleaning operations to maintain sanitation standards in the town.

During the inspection, Satya reviewed pothole-ridden roads near Anjuman Circle and ordered immediate patchwork repairs to prevent inconvenience to residents.

He warned that even minor negligence during the rainy season could lead to larger

Satya Kumar Yadav distributing Chief Minister's Relief Fund cheques to beneficiaries at the NDA office in Dharmavaram on Friday

civic problems and stressed the need for prompt preventive measures.

Later, Satya Kumar Yadav interacted with street vendors around Anjuman Circle and NTR Circle and assured them that the government remained committed to urban development, sanitation and public welfare.

In a separate programme held at the NDA office in Dharmavaram, the minister distributed Chief Minister's Relief Fund (CMRF) cheques worth ₹46.14 lakh to 70 beneficiaries from the constituency. He said the assistance was aimed at supporting financially distressed families facing medical emergencies and serious illnesses.

He stated that over the past two years, financial assistance amounting to ₹9.65 crore

had been provided to 913 beneficiaries in the constituency through the CMRF and Letters of Credit schemes.

He added that the government was prioritising healthcare services and ensuring that deserving families received timely support for expensive medical treatment.

The Minister also chaired a review meeting with APTIDCO officials regarding the construction of 1,440 housing units at Regatipalli in Dharmavaram.

Officials informed the meeting that construction works had reached advanced stages and that the houses, along with supporting infrastructure such as roads, drainage systems and water supply facilities, were targeted for completion by August 2026.

Foundation laid for permanent drinking water project in Puttaparthi

Collector Shyam Prasad receiving public grievances from residents during the "One Month-One Constituency-Four Visits" programme at Nallamada on Friday

KOTHACHERUVU /
NALLAMADA

SRI Sathya Sai District Collector Shyam Prasad and Puttaparthi MLA Palle Sindhura Reddy on Friday laid the foundation stone for a permanent integrated drinking water project worth ₹136.26 crore, aiming to permanently resolve the long-term water scarcity of the Puttaparthi constituency.

The mega-infrastructure project, sanctioned for Puttaparthi Municipality, will be built near the Bukkapattanam tank with financial backing from the Asian Infrastructure Investment Bank (AIIB) and executed under the supervision of Jindal Water Works.

Former minister Palle Raghunatha Reddy attended the event as the chief guest.

Speaking at the launch, Collector Shyam Prasad emphasized that the project is designed with a future-ready vision to meet the drinking water needs of an estimated population of nearly two lakh people up to the year 2055.

The scheme will feature a massive storage capacity of 90 lakh litres and is expected to be fully completed

by May 2028, delivering safe drinking water to local households through 11,700 new tap connections.

The Collector further revealed that the state government has sanctioned nearly ₹1,000 crore for various municipal water projects across the district, alongside a ₹1.50-crore sewage treatment plant to protect the Chitravathi River from pollution.

MLA Palle Sindhura Reddy stated that the coalition government revived the long-pending project immediately after assuming office.

She added that major industrial projects, including a proposed ₹51,400-crore Reliance solar power plant in Amadagur mandal and a fighter aircraft manufacturing unit in Puttaparthi, would soon create large-scale employment opportunities for local youth.

Following the ceremony, the officials held a public grievance redressal drive at Nallamada, focusing on land disputes. Out of 115 petitions received from Nallamada and Puttaparthi mandals, 42 long-pending grievances were resolved on the spot by a high-level administrative team.

Expand PNG infra fast, Nadendla to companies

- Civil supplies minister directs PNG firms to speed up infrastructure expansion and public outreach to shift households from LPG to Piped Natural Gas across the state
- Announces large-scale skill training for youth through ITIs and polytechnics, with free accommodation, food and stipends, to meet manpower needs in the growing PNG sector and boost employment
- PNG connections will be mandatory for major temples conducting Annadanam

HANS NEWS SERVICE
VIJAYAWADA

FOOD and civil supplies minister Nadendla Manohar directed officials and PNG companies to accelerate efforts to shift people from LPG usage to Piped Natural Gas (PNG) across the state.

He assured that the government machinery would fully support PNG companies in expanding infrastructure and creating public awareness about the benefits of PNG usage.

The minister conducted a special review meeting at the Secretariat here on Friday with representatives of PNG companies and senior officials from various departments. Transport minister B C Janardhan Reddy participated in the meeting through video conference.

Speaking on the occasion, Manohar said the coalition

government is committed to providing alternative gas solutions to the public quickly and efficiently. He stated that the government aims to ensure uninterrupted cooking gas supply to households and urged the five PNG companies operating in the state to be fully prepared for rapid expansion. He noted that people are increasingly turning towards PNG gas in line with changing times and asked companies to strengthen infrastructure and intensify promotional campaigns.

The minister assured that the government is granting approvals for gas expansion works in cities and towns at a faster pace and promised immediate resolution of any issues faced by companies. He also said the government would facilitate land allotment on lease basis for setting up PNG filling stations. Highlighting the need

Civil supplies minister Nadendla Manohar holds a review with officials and representatives PNG companies at the Secretariat in Amaravati on Friday

for skilled manpower, the Minister said youth should be trained in PNG technical skills through ITIs, polytechnic colleges and other skill institutions.

Under the supervision of AP Skill Development and district collectors, batches of 100 youth from each district would be trained every 15 days with free accommodation, food and stipend support. He said linking trained youth with PNG companies would create employment opportunities while addressing manpower shortages in the sector.

Manohar also stressed the need for extensive awareness campaigns through women self-help groups, SERP and MEPMA net-

works to educate people about the convenience, cost savings and safety benefits of PNG usage. He instructed gas companies to coordinate with women's groups and offer incentives for their participation in expansion activities.

The minister announced that PNG connections would be made mandatory for major temples where Annadanam is conducted. He said the government would resolve pending issues in temples like Kanaka Durga temple and Sri Kalahasteswara temple to speed up PNG implementation, following directions from Chief Minister N. Chandrababu Naidu. He also stated that simplified guidelines

would soon be introduced for tenants using PNG connections and availing LPG subsidy benefits.

He said the government is preparing regulations to ensure PNG users also receive the Rs 2,400 Deepam-2 scheme subsidy annually, as directed by the Chief Minister.

Special focus would be given to expanding PNG connections in apartments, group housing complexes and villas in urban areas.

He warned that another review on the performance of PNG companies would be conducted within 15 days and made it clear that visible progress in expansion activities must be achieved by then.

AP plans gold mining expansion to boost jobs, economy

- Mines minister Ravindra reviews operations at the Jonnagiri gold mine in Kurnool district, where nearly one kilogram of gold is being produced daily using advanced underground mining technology
- Says AP is focusing on expanding mining activity, identifying new gold zones in Ramagiri and speeding up mineral block tenders near Visakhapatnam to drive industrial growth
- Pattikonda MLA Shyam Babu states that the Jonnagiri project has generated jobs for 300-400 local youth, reduced migration from drought-prone villages and strengthened economic activity in the region

HANS NEWS SERVICE
KURNOOL

MINISTER for mines and geology and excise Kollu Ravindra on Friday said the state government is focusing on expanding the mining sector to generate employment, increase industrial growth and strengthen the economy.

The minister, accompanied by Pattikonda MLA K E Shyam Babu visited the Jonnagiri gold mine operated by Geo Mysore Services India Private Limited near Jonnagiri village in Tuggali mandal and reviewed mining and mineral processing operations.

During the inspection, the minister examined underground mining activities, ore extraction systems, and gold refining processes being carried out with advanced technology.

He said mining operations are currently being conducted at a depth of nearly 300 metres and may be expanded further in the coming years. According to officials, the mine is producing around one kilogram of gold every

Mines and geology minister Kollu Ravindra visits Jonnagiri gold mine in Kurnool district on Friday

day, while the monthly production has reached nearly 30 kilograms.

Ravindra said geological assessments indicate the presence of nearly 13,000 tonnes of mineral reserves in and around the Jonnagiri belt, making it one of the most significant private gold mining projects in the country.

Highlighting the state government's mining policy, the minister said Andhra Pradesh possesses vast mineral resources with strong industrial potential. He noted that efforts are underway to identify and develop additional gold mining zones in the Ramagiri region of Anantapur district.

He also pointed out that rare earth minerals available along the state's coastline

have immense international demand and said the government is accelerating the tendering process for mineral blocks near Visakhapatnam.

The minister added that value-added industries based on quartz and granite resources are also being promoted to encourage manufacturing activity and create large-scale employment opportunities.

Speaking on the occasion, MLA Shyam Babu said the Jonnagiri gold mine has brought fresh economic activity to the region by providing direct and indirect employment to local youth. He said nearly 300 to 400 people from nearby villages have already secured jobs through the project, reducing seasonal migration in drought-prone areas.

State welcomes ECLGS 5.0 for MSME relief

HANS NEWS SERVICE
VIJAYAWADA

MINISTER for micro, small and medium enterprises (MSMEs) Kondapalli Srinivas welcomed the Centre's launch of the Emergency Credit Line Guarantee Scheme (ECLGS) 5.0, describing it as a crucial relief measure for industries affected by the ongoing political and economic instability in West Asia.

The minister said the scheme would help businesses secure additional working capital through government-backed credit guarantees at a time of rising global uncertainty and supply-chain disruptions. He stated that the Central government would provide guarantee coverage on additional loans extended by scheduled banks and financial institutions under the scheme.

Explaining the framework of ECLGS 5.0, the minister said MSMEs would receive 100 per cent credit guarantee coverage in the event of loan default, while non-MSME sectors would be eligible for guarantee protection of up to

Picture for representational purpose only

90 per cent.

Eligible businesses can avail additional credit of up to 20 per cent of the highest outstanding working capital utilised during the fourth quarter of the 2025-26 financial year, he said. The scheme allows each eligible borrower to access additional credit support of up to Rs 100 crore.

According to the minister, the facility will apply only to loans sanctioned before March 31, 2027, and disbursed by June 30, 2027. He clarified that only borrowers maintaining regular repayment records with banks and financial institutions would qualify for the scheme. The scheme will be adminis-

tered and monitored by the National Credit Guarantee Trustee Company Limited (NCGTC).

Highlighting Andhra Pradesh's MSME ecosystem, Srinivas said the state currently has nearly 20.77 lakh MSME units, including 4.98 lakh manufacturing enterprises, around 10 lakh service-sector units and 5.74 lakh trading establishments.

The minister urged MSMEs impacted by the West Asia crisis to utilise the scheme to strengthen liquidity and sustain operations. He also thanked the Central Government for introducing ECLGS 5.0 at a critical time for domestic industries.

Atchanna hits back at Jagan's charges on deaths

VIJAYAWADA

AGRICULTURE minister K Atchannaidu on Friday strongly criticised YSRCP chief Y S Jagan Mohan Reddy for linking family deaths to the TDP and Chief Minister N Chandrababu Naidu.

Speaking in Amaravati, Atchannaidu said people were well aware of the circumstances surrounding the murder of Jagan's grandfather, Y S Raja Reddy. He alleged that victims of that era had spoken of a "reign of oppression and anarchy" under the Y S family. While most accused in the Raja Reddy case had since died, he claimed one accused remained in the YSRCP, exposing the party's "double standards." Rejecting Jagan's claims about former CM Y S Rajasekhara Reddy's helicopter crash, Atchannaidu said Chandrababu's Assembly remarks only referred to faith in Lord Venkateswara and had no link to YSR's death. He accused Jagan of twisting the statement for political gain.

On the murder of Y S Vivekananda Reddy, Atchannaidu alleged the YSRCP initially portrayed it as a heart attack before evidence proved otherwise.

Smart drug tracking soon in state hosps

- AP plans major reforms to the e-Aushadhi platform with QR code access, real-time stock monitoring and automated alerts to improve transparency and efficiency in medicine supply.
- Patients will soon be able to check medicine availability in state hospitals directly, while officials will receive advance alerts on medicines nearing expiry to reduce wastage
- The state is developing a live dashboard covering medicine stocks from Ayushman Arogya Mandirs to teaching hospitals

HANS NEWS SERVICE
MANGALAGIRI

THE state government is set to introduce sweeping reforms in the medicine supply and utilisation system in government hospitals by strengthening the existing 'e-Aushadhi' software platform with advanced technology-driven features aimed at ensuring transparency, efficiency and public accessibility.

As part of the proposed reforms, people will soon be able to directly check the availability of medicines in government hospitals through QR code-based access. The government is also planning to introduce an automated alert system to monitor medicine utilisation, expiry timelines and

supply chain management in real time.

A high-level review meeting on the proposed reforms was held on Friday at the headquarters of the Andhra Pradesh State Medical Infrastructure Development Corporation (APSMIDC) in Mangalagiri.

Senior officials from the Centre for Development of Advanced Computing (C-DAC), who arrived from Delhi at the request of Health Minister Satya Kumar Yadav, participated in the discussions.

At present, medicine procurement and supply to government hospitals in Andhra Pradesh are being managed through the e-Aushadhi application. The government spends nearly Rs 800 crore annually on medicines and

C-DAC officials from New Delhi participate in the high-level review meeting at APSMIDC headquarters in Mangalagiri Friday.

surgical supplies, of which around Rs.600 crore worth of medicines are supplied free of cost to poor patients through primary health centres, community health centres, district hospitals, teaching hospitals and specialty institutions.

Based on indents raised by pharmacists, medical officers and hospital superintendents, proposals are generated through the e-Aushadhi system and medicines are procured through tenders before being distributed to Central Drug Stores and subsequently to hospitals across districts.

However, officials observed several operational challenges in areas such as stock monitoring, expiry tracking and supply management.

To address these issues,

the Health Department has proposed several key changes. A public-facing QR code system will allow citizens to directly verify medicine availability at hospitals. A special alert mechanism will notify officials in advance about medicines nearing expiry, especially within six months of the expiry date to minimise wastage.

The government also plans to introduce a state-wide dashboard displaying real-time medicine stock positions from Ayushman Arogya Mandirs to teaching hospitals.

Officials are considering bringing AYUSH medicine supply systems under the e-Aushadhi network as well. In addition, the "Mana Mitra" app will soon provide information on medicine stocks to the public.

AP powers through record summer demand

- State recorded its highest-ever power consumption at 288.9 MU on May 21, with peak demand touching 15,016 MW amid intense heatwave conditions
- APTransco, APGenco and discoms ensure uninterrupted electricity supply through advance planning, continuous grid monitoring and effective load management

HANS NEWS SERVICE
VIJAYAWADA

AMID severe summer conditions and intense heatwave temperatures across the state, the Andhra Pradesh State power utilities successfully ensured uninterrupted and quality power supply while handling the highest-ever electricity demand in the State's history.

The Andhra Pradesh State Grid recorded an all-time high energy consumption of 288.9 million units (MU) on May 21, along with a record day peak demand of 15,016 MW and an evening peak demand of 12,474 mw.

According to officials,

the unprecedented surge in electricity demand was mainly due to soaring temperatures, high humidity levels and increased usage of air-conditioners, cooling appliances, drinking water systems and agricultural pump sets across the State. Temperatures in several districts reportedly touched nearly 46 degrees Celsius.

Despite the extraordinary demand, APTransco, in coordination with APGenco and the discoms, maintained continuous and stable power supply without any disruption.

Officials attributed the achievement to advance planning, round-the-clock grid monitoring, effective load management and opti-

mum utilisation of available power resources.

Special chief secretary

to the Chief Minister K Vijayanand said that the milestone was achieved in

line with the vision of Chief Minister N Chandrababu Naidu and energy minister Gottipati Ravi Kumar to provide reliable and uninterrupted power supply to consumers across the State.

He said additional power was procured through short-term market purchases whenever necessary to maintain grid stability and ensure uninterrupted supply to domestic consumers, farmers, industries, commercial establishments and essential services during peak demand periods.

Vijayanand appreciated the dedicated services of APTransco, APGenco and discom personnel, including engineers, field staff, system operators and maintenance teams, for successfully managing the historic demand. He reiterated that the State government remains committed to strengthening power infrastructure and ensuring quality electricity services to all consumers.

TTD records highest Thursday darshan figures

- More than 79,000 devotees had darshan on May 21
- TTD ensured darshan to 5,850 pilgrims under Sarva Darshan during Abhisheka Seva on Friday

HANS NEWS SERVICE
TIRUMALA

TTD managed to provide darshan to over 79,000 devotees on May 21, Thursday, and also allowed over 5,850 common devotees during Abhisheka Seva on Friday, according to TTD additional executive officer Ch Venkaiah Chowdary.

Speaking to media outside the Srivari temple on Friday morning, the additional EO said through the Integrated AI Command Control Centre, with a proper time, queue and darshan management schedule besides collective efforts of various departments, the sharp rise in pilgrim traffic during the summer holidays is being handled in

TTD additional EO Ch Venkaiah Chowdary speaking to the media at Tirumala on Friday

a smooth manner ensuring comfortable darshan for common devotees. Through this effective pilgrim influx forecasting and continuous monitoring, there is a substantial increase in daily darshans, facilitating darshan for over 15,000 additional devotees every day, he said.

Despite Thursdays traditionally having reduced darshan hours due to weekly rituals, TTD facilitated darshan to a record number of 79, 603 devotees for the first time, demonstrating the institution's operational efficiency, he said. Senior officials are reviewing queue-line conditions hourly and implementing necessary measures

immediately to expedite the darshan process. The coordinated efforts among TTD departments, vigilance and police wings helped manage the summer rush and all departments are working round-the-clock to ensure uninterrupted supply of drinking water, Annaprasadam, medical services and amenities in queue lines for devotees, he maintained.

Reiterating that providing comfortable and speedy darshan to common devotees is the primary objective of TTD, the additional EO said that the entire administrative machinery is committed to working with dedication to this end.

Why self-discipline and motivation matter more than ever for students

sistent effort, it boosts their confidence. They begin to trust their abilities and become more independent.

5. Most importantly Stay focussed and motivated

One needs to encourage Healthy Habits
Self-discipline is not limited to academics; it also impacts physical and mental well-being.
Disciplined students are more likely to:

- Maintain a proper sleep schedule (7–8 hours daily)
 - Eat balanced meals
 - Participate in physical activities
- According to health experts, students who follow a routine are 30% more likely to maintain better concentration and energy levels throughout the day.

Role of Schools in Building Self-Discipline

Schools are critical to the development of disciplined individuals. Structured routines, clear rules, and consistent expectations help students understand the importance of responsibility. It also provides in creating a Supportive environment. We as mentors need to appreciate consistent efforts and encourage positive habit.

Self-discipline is one of the influential tools a student can develop during his/her school life. It shapes not just academic graph but also hones their character, confidence, and future readiness. In a world full of distractions, the ability to stay focused and consistent sets students apart. Self-discipline and motivation help students to make better choices every day. These small, consistent choices taken every day will lead to big achievements over time. The author is educationist at the Sanskriti Group of Schools.

Today is Medical Coder Day

The importance of medical coding

Medical coders play a crucial role in modern healthcare systems by converting complex medical information into standardised codes used across hospitals, clinics, insurance systems, and research organisations. These professionals analyse patient records, diagnoses, treatments, laboratory reports, and procedures to ensure healthcare data is accurately documented and universally understood.

digitisation of healthcare services and electronic medical records. Standardised coding systems help ensure consistency in healthcare documentation across different institutions and regions.

The data generated through coding is also widely used in public health studies, medical research, and policy planning.

Professionals in this field require strong attention to detail, knowledge of medical terminology, anatomy, and healthcare procedures, along with familiarity with international coding systems. As healthcare systems continue to expand and rely more heavily on digital records, the demand for trained medical coders is steadily increasing.

Experts believe medical coding is emerging as an important career option for students interested in healthcare administration, medical documentation, and health information management.

The work of medical coders supports several important functions within the healthcare sector.
Accurate coding helps hospitals maintain organised patient records, process insurance claims efficiently, and reduce documentation errors. It also assists healthcare providers in tracking treatments, monitoring disease trends, and improving overall healthcare management.
Medical coding has become increasingly important with the rapid

Educators believe that beyond intelligence and talent, qualities such as consistency, time management, focus, resilience, and healthy routines help students stay confident and goal-oriented. Experts also emphasise that motivation and discipline work together to encourage curiosity, improve decision-making, reduce stress, and build independence. Schools and mentors, they say, play a key role in helping students develop positive habits, emotional balance, and the ability to remain focused in an increasingly distracted world

PRANEET MUNGALI

As rightly penned by Jim Rohn, Discipline turns ordinary things into extraordinary accomplishments and motivation is the energizing force behind it. In today's fast-paced world filled with distractions, smartphones, social media, and constant digital stimulation, self-discipline has become one of the most valuable life skills a student can develop. While intelligence and talent matter, discipline often determines long-term success. For students, especially during school years, learning self-discipline lays the foundation for academic achievement, personal growth, and future career success.

It is all about getting invested in the process of learning and motivation provides both direction and persistence. Students who are self-motivated invest more time and effort in activities that align with their values and interests, which in turn leads to stronger academic results whereas there is always a set of students who to be motivated. For students, discipline includes punctuality, focus during study time, respect for authority, and consistency in work habits. It goes beyond mere obedience to rules — it represents self-control, organization, and value-based behaviour. It is the act of going forward in life without losing hope. One needs to put in a lot of effort to develop a positive outlook on life, and adopt never-say-no attitude in order to acquire and accomplish goals faster, be it in academics, self-health or any other path of

life. Motivation does not just fuel effort – it directs it. A motivated student makes promising choices that will also yield positive results. They choose to attempt challenging tasks, ask questions rather than staying quiet, and come back to try again after a setback.

One of the most powerful things a motivated student has is Curiosity. Both self-discipline and motivation go hand in hand and nourish this curiosity and to encourage this there needs to be certain life style approaches that will create a sea amount of difference. It builds feeling of being in control of one's decision-making capabilities, helps accomplish goals and most importantly builds a Never to Give up Attitude.

Milestones towards creating a perfect balance between self-discipline and remaining motivated-

1. Know your strength and weaknesses

Time management is one of the biggest challenges students face. Between school, homework, extracurricular activities, and social life, it's easy to feel overwhelmed. A wisely planned schedule is the key to success and works wonders.

It will help students to limit procrastination and stress and be optimistic towards achieving desired goals. Time management also is required to limit screen time and be in control of that.

2. Tap and identify motivation Factor

Motivation plays an important role and one should always believe in the mantra "I am working on it, I can do it and I have done it".

3. Recognize and work on the downfalls

Accepting short comings as well as challenges and chalking out a doable plan with gradual accomplishments. Last-minute studying and unfinished assignments often lead to stress. Self-discipline helps students stay ahead of their tasks, reducing unnecessary pressure.

4. Self- Appreciation

Students feel motivated to do better when they are being encouraged and appreciated for all the small achievements and accomplishments that they achieve. As mentors and teachers, we should encourage them. When students achieve their goals through con-

School study highlights growth in student self-management and collaboration skills

Experiment conducted among students from Grades 1 to 9 reveals increasing focus on behavioural learning beyond academics

- 84% of students demonstrated independent self-management skills
- 80% showed initiative and proactive behaviour
- 80% prioritised collaboration and teamwork
- 79% managed tasks without reminders
- 65% demonstrated empathetic listening abilities

A recent school-based social experiment has highlighted the growing importance of behavioural and life skills among students, suggesting that qualities such as self-management, collaboration, initiative, and emotional awareness are becoming increasingly visible within school environments.

The study, conducted among students from Grades 1 to 9 at Glendale International School, examined how students perceive their own learning experiences beyond textbooks, examinations, and academic scores. According

to observations and behavioural assessments carried out as part of the initiative, 84% of students demonstrated independent self-management skills, indicating an ability to organise and regulate their work without constant supervision.

The findings further showed that 80% of students displayed proactive behaviour and initiative in classroom and school-related activities. Another 80% prioritised teamwork and collaborative thinking over individual participation, while

79% were able to manage and complete tasks without repeated reminders from teachers or parents.

In addition, 65% of students demonstrated empathetic listening skills during classroom interactions and group activities. The study also found that 52% of students showed the ability to independently plan tasks and schedules ahead of time, reflecting the development of organisational and leadership habits at an early stage.

As part of the experiment, both parents and students

were independently asked the same question: "What is your child learning well in school?" While most parents focused primarily on academic performance and subject knowledge, students highlighted behavioural and personal development areas such as responsibility, listening, collaboration, initiative, and self-management.

Education experts say the findings reflect a broader shift in school education, where behavioural learning and social-emotional development are increasingly

being viewed as important alongside academic achievement.

The assessments were conducted using structured behavioural rubrics integrated into the school's learning framework. The initiative aimed to better understand how habits related to accountability, communication, teamwork, and leadership are developing among students in day-to-day school environments.

School officials noted that behavioural competencies are gradually becoming part of classroom learning and student engagement processes rather than being treated separately as extracurricular skills. Educators also believe that qualities such as adaptability, emotional intelligence, collaboration, and self-discipline are becoming increasingly important for long-term academic and professional success.

The findings contribute to a wider conversation in education about measuring student growth beyond marks and examinations, particularly as schools explore more holistic approaches to learning and development.

UoH & IIIT-H sign MoU, focuses on advanced technology and research innovation

Two leading Hyderabad-based academic institutions — University of Hyderabad and International Institute of Information Technology Hyderabad — have signed a Memorandum of Understanding (MoU) aimed at strengthening collaboration in higher education, advanced research, and deep-tech innovation.

The agreement was formally signed in the presence of senior academic and administrative officials from both institutions, including Prof. J. Anuradha, Vice-Chancellor In-Charge of UoH, and Prof. Sandeep K. Shukla, Director of IIIT-H.

According to officials, the partnership is expected to encourage greater cooperation between the academic departments and specialised research groups of the two institutions. The collaboration will allow reciprocal access to laboratories, high-performance computing (HPC) facilities, and library

resources, enabling students and researchers to work across institutional boundaries. The MoU focuses on promoting interdisciplinary research, joint academic activities, and collaborative innovation in emerging technology sectors. Experts believe such partnerships are becoming increasingly important as universities attempt to strengthen research ecosystems and build industry-relevant skills among students.

Under the agreement, faculty members from both institutions will be able to participate in co-teaching, collaborative research projects, and joint supervision of postgraduate and PhD scholars within the framework of AICTE and UGC regulations.

The collaboration is also expected to support joint publications, intellectual property development, research events, and competitive extramural funding proposals in advanced tech-

nology areas.
One of the major focus areas of the partnership will be semiconductor science and technology, including research in VLSI and embedded systems. Officials stated that the MoU also envisions the possibility of future collaborative or joint degree programmes in specialised technology domains.

Academic representatives from both institutions noted that the initiative aims to create stronger institutional synergy while supporting the development of highly trained and industry-ready professionals in areas of national importance.

To coordinate the implementation of the partnership, faculty members from the Centre for Advanced Studies in Electronics Science and Technology (CASEST) at UoH and the Centre for VLSI and Embedded Systems Technology (CVEST) at IIIT-H have been designated as official coordinators for the programme.

Cockroach Janta Party: When satire becomes a threat

IT began as a joke but got taken seriously—so seriously that the government acted against it. That is the story of the Cockroach Janta Party (CJP), which is merely a week old. On May 16, an activist, who reportedly was earlier associated with the Aam Aadmi Party (AAP), Abhijeet Dipke, launched CJP, a satirical take on Chief Justice of India (CJI) Surya Kant's comment on the unemployable youth with fake degrees who eventually become “parasites” and “cockroaches,” attacking the system. The CJI's remarks were not very elegant; these were especially hurtful as the young have been the victims rather than tormentors of the system. Among other things, they suffer because of a dearth of quality jobs and

a conducive environment in which they can become wealth creators. And now, they are also hit by the incompetence and corruption in the bodies that carry out exams for coveted seats in higher education and jobs. The remarks were deeply resented by not just youth but also others. This was the reason that the CJI later issued a clarification, stating he was misquoted and his remarks were directed specifically at individuals entering the legal profession through “fake and bogus degrees.” This, however, didn't stop the usage of the term ‘cockroaches’ online and the party espousing their cause; in fact, the party received wide support from various politicians, activists, artists, and millions of other users across

social media platforms. It is said that the CJP was able to get more followers than the ruling BJP and Congress, though the figures have not been verified. The government overreacted by reportedly directing X to withhold the account following inputs from the Intelligence Bureau (IB), which flagged “national security concerns.” Apparently, the Ministry of Electronics & Information Technology (MeitY) invoked Section 69A of the Information Technology Act, 2000, to demand action against the CJP account. Senior Congress leader Shashi Tharoor pointed out that the episode “confirms to us the extent to which there is frustration and dissatisfaction that the public can express through being able to tap into

an initiative like this.” In the meanwhile, Trinamool Congress MP Mahua Moitra accused the government of stifling dissent. The government should have avoided action against the CJP, because it was quite clearly a joke. Which serious political party would claim to be the “voice of the lazy”? Or claim that the “eligibility criteria” to join the CJP was to be “unemployed, lazy, and chronically online” with the “ability to rant professionally”? More than anyone else, the government took the joke seriously. By moving to block the account, the government ended up validating the very criticism the satire sought to make. A parody page that may otherwise have remained a passing internet joke suddenly acquired

political significance because of official intervention. In trying to suppress ridicule, the authorities amplified it. The episode also raises troubling questions about the increasing tendency to invoke sweeping powers such as Section 69A against online expression that is inconvenient or embarrassing rather than genuinely dangerous. Democracies are expected to tolerate mockery, even harsh mockery, because satire is often a barometer of public sentiment. What makes the CJP episode particularly revealing is that the government appeared more offended by the language of protest than by the underlying anger that produced it. A confident government would have laughed away the joke.

LETTERS

Promote alternative career paths

This refers to “NEET aftermath: Parents and teachers must anchor our students,” (THI, May 22). The paper leak has rightly angered people, but anger alone will not protect the next batch of students. What is more worrisome is the singular importance we have attached to just one examination. Families invest everything — emotionally and financially — into a single outcome, leaving young people with no psychological fallback. Schools and parents must actively normalise alternative career paths, not as consolation but as genuine choices. Counselling should be embedded in the academic calendar, not offered after a crisis strikes. Systemic reforms matter, but the cultural shift around success and failure is equally urgent.

Prajesh Paramasivan, Neelambur-641048

Hashtags, hate and half-truths: The dark side of India’s digital politics

THE rise of social media in India was once hailed as a democratic revolution. It promised to dismantle the monopoly of traditional media, amplify unheard voices, deepen citizen participation, and establish a direct connection between political leaders and the public. In many ways, it succeeded. Political communication became immediate, interactive, and accessible on an unprecedented scale.

But now the same platforms have steadily polluted the country's political ecosystem. What began as an instrument of participation has, in many instances, degenerated into an unregulated arena of misinformation, abuse, manufactured outrage, and character assassination. The consequences extend far beyond politics; they strike at the very culture of democracy.

Indian politics has always been intensely competitive and emotionally charged. But social media transformed both the speed and scale of political confrontation. Earlier, allegations against political rivals passed through editorial scrutiny, legal checks, and institutional filters before reaching the public domain. Newspapers and television channels, despite their flaws and biases, still functioned within identifiable structures of accountability. Social media erased those barriers overnight.

Today, anonymous handles with no credibility or accountability can circulate fabricated claims, morphed videos, edited speeches, fake documents, and defamatory accusations to millions within minutes. Once amplified through coordinated digital networks, repetition itself

When outrage becomes currency and truth becomes irrelevant, democracy pays the price

creates the illusion of truth. The political ecosystem has consequently shifted from ideological contestation to perpetual digital warfare. Truth is no longer merely the first casualty of political conflict; it is increasingly treated as irrelevant.

Perhaps the gravest danger posed by social media is the near-total absence of accountability.

Traditional journalism, at least in principle, carried institutional responsibility. Publications could face defamation suits, public scrutiny, legal consequences, and professional censure for unethical reporting. Editors and publishers were answerable for what they printed. Of course, it is a different matter that these days even journalists seem to be getting increasingly influenced by social media and are vying to belittle the views expressed by fellow journalists acting more like activists.

Political operatives, ideological influencers, troll networks, and anonymous accounts routinely spread allegations without evidence. Many posts are cleverly framed as “questions,” “sources suggest,” or “reports indicate,” enabling users to evade direct liability while successfully planting suspicion in the public mind. The damage, however, is immediate and often irreversible.

A false allegation may trend nationally for a day, dominate television debates, influence public perception, and quietly disappear later without apology, correction, or consequence. By the time fact-checkers intervene, the political narrative has already hardened.

This has created a dangerous incentive structure where outrage is rewarded, restraint ignored, and sensationalism travels faster than truth.

In a healthy democracy, political rivalry should revolve around governance, policy, ide-

The digital public square has become a theatre of political hostility, where anonymous allegations, viral half-truths and manufactured narratives often overpower evidence. This article examines how social media polluted India's political ecosystem and asks whether democratic discourse can still recover civility, accountability and respect for truth

ology, and public performance. Increasingly, however, Indian political discourse online revolves around the destruction of individuals rather than debate over ideas.

Political opponents are routinely portrayed not merely as rivals but as enemies, traitors, criminals, dictators, communal agents, or anti-national conspirators — often without substantiated evidence.

Families are dragged into political battles. Private lives are scrutinized. Old videos are selectively edited. Rumours are packaged as “exposés.” The objective is not persuasion but delegitimation.

Almost every major political formation now possesses an aggressive digital ecosystem dedicated less to defending its own ideas and more to attacking opponents relentlessly. The tragedy is that civil disagreement — the cornerstone of parliamentary democracy — is steadily disappearing.

Social media algorithms are designed not to promote truth or balance, but engagement.

Anger, outrage, fear, and polarization generate more clicks than reasoned analysis. Consequently, users increasingly inhabit ideological echo chambers where they consume only information that reinforces pre-existing beliefs.

Supporters of one political camp accept every allegation against rivals unquestioningly while dismissing all criticism of their preferred leaders as propaganda. Facts themselves become partisan.

A democracy cannot function effectively when citizens no longer agree even on basic facts. Nuance disappears. Complexity is reduced to hashtags. Serious policy discussions are drowned out by viral abuse and performative outrage.

Another disturbing feature of India's social media is that political messaging today is systematically engineered through coordinated hashtag campaigns, bot amplification, influencer networks, edited clips, selective leaks, meme factories, and targeted disinformation operations. Public percep-

tion itself can now be artificially manufactured. Visibility is mistaken for legitimacy.

The loudest voices online are often not the most credible — merely the most aggressively amplified.

The pollution generated by social media extends beyond political parties and leaders. Institutions themselves have become targets of sustained digital delegitimation.

The judiciary, Election Commission, investigative agencies, armed forces, universities, journalists, economists, and even constitutional authorities are routinely attacked whenever their actions conflict with partisan expectations.

Social media toxicity is not accidental; it is deeply tied to the economics of digital platforms which interests most of those who own these digital channels. These platforms profit from engagement, not civility. Outrage sustains attention. Polarisation increases interaction. Conflict keeps users online longer. As a result, inflammatory political content is often algorithmically rewarded.

Political actors exploit this structure ruthlessly because digital aggression delivers immediate visibility. Falsehood spreads not only because it is politically useful, but because it is commercially incentivised. The ultimate casualty is informed citizenship.

The answer, however, cannot lie in censorship alone. Excessive state control over digital speech carries dangers of its own and can easily become an instrument of political suppression. What India urgently needs is a culture of balanced accountability.

Political parties must discourage anonymous abuse and misinformation instead of covertly benefiting from it. Social media platforms must evolve

transparent and politically neutral mechanisms to identify coordinated disinformation campaigns. Fact-checking institutions must remain independent and credible. Most importantly, citizens themselves must cultivate digital literacy and scepticism. But no such signs are visible, at least not now. Democracy depends not merely on the freedom to speak, but also on the responsibility to verify. Political disagreement is healthy. Deliberate misinformation designed to destroy reputations and poison public discourse is not.

Social media, if responsibly used, can still strengthen those democratic instincts by enabling wider engagement between governments and citizens.

But the present trajectory is deeply troubling. When abuse replaces debate, rumours overpower evidence, anonymous propaganda shapes perception, and political victory becomes more important than truth itself, democracy suffers lasting damage.

The pollution of India's political ecosystem is not caused by technology alone. Technology merely amplifies human impulses — ambition, anger, tribalism, prejudice, and the relentless pursuit of power.

The real challenge before India is therefore moral, political, and institutional: whether democratic culture can rediscover restraint, credibility, civility, and accountability in the digital age.

If that correction does not happen, India risks drifting toward a political culture where propaganda triumphs over truth, noise overwhelms reason, and permanent outrage replaces constructive governance.

A historic step towards social justice

AMARAVAJI NAGARAJU

THE national debate on caste enumeration has once again moved to the centre of India's political and social discourse. Recent observations by the Supreme Court emphasizing the importance of caste data in the Census have added renewed urgency to a long-pending issue. For communities that have consistently demanded equitable representation, welfare, and social justice, the development carries both symbolic and policy significance.

Our Constitution guarantees equality to every citizen. Yet, the realities of social and economic inequality continue to shape access to education, employment, political representation, and public resources. Despite decades of affirmative action and welfare policies, the absence of comprehensive and updated caste-based data has remained a major policy gap. Governments continue to frame reservation policies and welfare interventions largely on estimates and outdated assumptions rather than contemporary evidence.

The last comprehensive caste census in India was conducted in 1931. After Independence, official Census exercises have largely restricted caste enumeration to Scheduled Castes and Scheduled Tribes. Consequently, there is no reliable nationwide data on the population, educational status, economic conditions, or

representation of Other Backward Classes and several marginalized communities. These paradoxical policies meant to advance social justice are being implemented without a precise understanding of the social realities they seek to address.

Caste enumeration:

In this context, the Supreme Court's observations assume considerable importance. The underlying principle is simple, yet profound: meaningful equality cannot be achieved without understanding the actual structure of inequality. In a democracy committed to inclusive governance, representation and opportunity must be informed by evidence, not speculation. Policymakers across the world increasingly recognise that data-driven governance is indispensable for effective welfare planning and equitable distribution of resources.

The demand for caste enu-

mation has been consistently raised by several political and social movements over the years. Their argument is rooted in a fundamental democratic question: who has access to the nation's wealth, institutions, education, and decision-making structures, and in what proportion? Without credible data, these debates remain confined to rhetoric. The Court's intervention has now provided institutional legitimacy to a conversation that many believe was delayed for far too long.

The Telangana caste survey:

Telangana's recent caste survey has emerged as an important example in this regard. Conducted with administrative coordination and public participation, the exercise attempted to systematically gather socio-economic and educational data across communities. While debates on methodology and implementation may continue, the broader sig-

nificance of the initiative lies in its attempt to shift governance toward evidence-based policymaking. In an era where governments worldwide rely on data to frame targeted welfare measures, India too must strengthen its statistical foundations.

Globally, countries routinely collect demographic and social indicators to address disparities in health-care, education, employment, and income distribution. In diverse societies, such exercises are not viewed as instruments of division but as tools for inclusion. India, with its layered social realities, arguably has an even greater need for accurate and transparent data systems.

Critics of caste enumeration, however, raise concerns that such exercises could deepen social divisions or intensify caste-based politics. These concerns cannot be dismissed lightly. Yet, acknowledging inequality is not the same as perpetuating it. Democracies cannot correct structural disadvantages without first identifying them. Just as a physician cannot prescribe treatment without diagnosis, governments cannot meaningfully address social inequities without reliable evidence.

Data privacy and public trust:

Another critical dimension is data privacy and public trust. In the digital age, the collection of personal information naturally raises concerns about misuse and surveillance.

Therefore, any caste enumeration exercise must be conducted with transparency, scientific rigor, and strong legal safeguards. Data protection mechanisms should ensure that information is used exclusively for policy and welfare purposes, not for partisan political gains.

The debate now demands clarity and political maturity from the Union government. Caste enumeration should not be viewed merely through an electoral lens, but as an administrative and constitutional necessity. A credible framework must emerge through consultations with states, sociologists, statisticians, and policy experts. Public expectations today are increasingly shaped by a demand for evidence-based governance rather than broad political assurances.

Dr B R Ambedkar envisioned an India where equality would not remain a constitutional promise alone but become a lived social reality. Achieving that vision requires more than slogans or symbolic commitments. It requires institutions willing to confront uncomfortable truths with honesty and policy courage.

A comprehensive caste census is not merely a bureaucratic exercise. Properly designed and responsibly implemented, it can become a transformative democratic reform, one that strengthens representation, improves welfare delivery, and deepens the Republic's commitment to social justice. For a nation still grappling with entrenched inequalities, understanding the true contours of deprivation may well be the first step toward correcting them.

LETTERS

Promote alternative career paths
This refers to “NEET aftermath: Parents and teachers must anchor our students,” (THI, May 22). The paper leak has rightly angered people, but anger alone will not protect the next batch of students. What is more worrisome is the singular importance we have attached to just one examination. Families invest everything — emotionally and financially — into a single outcome, leaving young people with no psychological fallback. Schools and parents must actively normalise alternative career paths, not as consolation but as genuine choices. Counselling should be embedded in the academic calendar, not offered after a crisis strikes. Systemic reforms matter, but the cultural shift around success and failure is equally urgent.

Students must focus on GCC space

With reference to the article “Bright story of growth in GCC space awaits us beyond layoffs” (THI May 22), the increasing wave of layoffs in global technology companies has become a major concern for employees, students and parents across the country. In recent months, leading multinational firms have laid off thousands of workers worldwide. However, the changing situation should not alarm our IT professionals given that India is the preferred destination for GCCs because of its skilled workforce and growing digital ecosystem. More global firms are setting up technology centres in the country, which is expected to open fresh employment opportunities. Employees must adapt themselves to this transformation. Those who fail to keep pace with emerging technologies may find it difficult to survive in the changing market. Workers should also branch out into communication skills, teamwork and problem-solving abilities. Educational institutions should step in and update their syllabus according to industry requirements. Youngsters must understand that the IT industry now opens opportunities not only in coding but also in analytics, robotics, AI systems and digital transformation. Companies should invest in reskilling and upskilling programmes rather than simply laying off workers. Internal training sessions and mentorship initiatives can help employees move into new domains. Governments and industry bodies can bolster employees through skill development schemes. Skilled professionals who adapt themselves to the changing demands are likely to secure rewarding careers in the future. India's GCC ecosystem is expected to create large-scale employment opportunities in the long run. Employees, students and educational institutions must work together to prepare for the changing technological landscape instead of getting discouraged by temporary setbacks.

Raju Kolluru, Kakinada

Engineers should eye GCC positions.

THIS refers to “Bright story of growth in GCC Space awaits us beyond layoffs”. Rather than worry over layoffs, professionals must take comfort from the fact India's growing GCC ecosystem offers real hope. Many mid-level professionals are still anxious about job security and the rapid shift towards AI-driven roles. Rather than relying solely on market forces, we need practical steps: targeted government-industry partnerships for short-term AI and data science certification programmes, easier credit for tech startups, and clearer pathways for experienced engineers to move into GCC positions. Companies too must invest more in internal reskilling instead of sudden headcount cuts.

M Barathi, Bengaluru - 560076

Reskilling is the need of the hour

As propos “Bright story of growth in GCC space awaits us beyond layoffs,” (THI, May 22). The anxiety around layoffs is understandable, but the bigger concern is whether India's IT workforce is preparing itself for what comes next. GCCs are expanding, and that is genuinely good news. But expansion does not automatically translate into opportunity if skills remain static. Many mid-level professionals are still anchored to roles that AI is steadily absorbing. Reskilling cannot remain a talking point in corporate presentations. Universities, employers, and industry bodies must together create credible, accessible pathways for professionals to transition into AI-adjacent roles. India has the scale and the talent base to lead this shift. The question is whether we move with enough urgency before the window narrows.

Flight services from Bengaluru to Bidar and Kalaburagi to resume: MB Patil

BENGALURU: Infrastructure Development Minister M B Patil on Friday announced that flight services from Bengaluru to Bidar and Kalaburagi, the district headquarters of the Kalyana Karnataka region, will resume from June 1 and June 10 respectively.

Speaking on the occasion, he said that Star Air (Ghodawat Enterprises Limited) will operate flights on the Bengaluru–Bidar–Bengaluru and Bengaluru–Kalaburagi–Bengaluru sectors. The Government is extending viability gap funding of ₹28.47 crore to support the operations. Advance booking for flights on both routes has already commenced, he added.

Patil said the flight service to Kalaburagi had earlier been suspended due to financial losses. In the case of Bidar, services were being operated with special support from the Kalyana Karnataka Regional Development Board. Taking into account the growth of industries, education, tourism, agriculture and commercial activities in the Kalyana Karnataka region, the Government has decided to revive the services under the regional air connectivity initiative, he said.

The Minister said the Government is committed to enhancing air connectivity to Tier-2 and Tier-3 cities across the State. Such initiatives will not only accelerate regional economic growth but also contribute to infrastructure development, he noted.

Lokesh accuses Jagan of divisive politics

- Minister alleges that YSRCP chief was attempting to create communal divisions and mislead the public for political gain
- Urges party workers to stay alert against political provocations and claimed those behind unlawful acts would face action

HANS NEWS SERVICE
JAMMALAMADUGU
YSR KADAPA

TDP working president and minister Nara Lokesh addressing the party cadre at Jammalamadugu in YSR Kadapa district on Friday

MINISTER for education and IT Nara Lokesh on Friday launched a sharp attack on former Chief Minister Y. S. Jagan Mohan Reddy, accusing him of attempting to create divisions among communities and misleading the public for political gain.

Addressing a coordination meeting with TDP leaders and cadre at Dattaluru village in Kondapuram mandal of Jammalamadugu constituency, Lokesh alleged

that conspiracies were being hatched to create tension between religious groups. He asserted that those responsible for unlawful activities would not be spared.

Before the meeting, the minister paid floral tributes to the statue of N T Rama Rao.

During his speech, Lokesh praised local TDP leaders

and party workers for standing by the party during difficult political periods and credited them for the party's strong performance in the recent elections.

The minister criticised the previous YSRCP government over governance and political issues, alleging that false narratives and political "dramas" had been used to

gain public sympathy. Referring to recent incidents in Kadapa district, he claimed attempts were being made to disturb communal harmony and urged party workers to remain alert against political provocations.

Highlighting the coalition government's welfare measures, Lokesh said the administration was continu-

ing development and welfare programmes despite financial constraints.

He stated that pensions for senior citizens had been increased to Rs 4,000, while differently-abled persons were receiving Rs 6,000 and bedridden beneficiaries Rs 15,000. He also referred to schemes such as free bus travel for women, free LPG cylinders under the Deepam scheme and financial assistance for students under the Talliki Vandanam programme.

Lokesh said the government had filled 16,000 teacher posts and 6,000 constable vacancies and had released a job calendar for 10,000 additional positions. He emphasised that the TDP believed in recognising dedicated party workers and cited the introduction of the 'My TDP' application for that purpose.

District In-charge Minister S Savitha, TDP constituency in-charge Ch Bhupesh Reddy and other party leaders attended the meeting.

Traffic cops to get heatwave shield

- DGP sanctions Rs 48 lakh for protective gear and welfare materials for traffic police working in extreme summer temperatures ranging from 42 °C to 46 °C
- As many as 3,192 traffic personnel across the state will receive UV protection goggles, white caps, ORS packets, water bottles and face masks to safeguard them from heat, dehydration, dust and pollution

HANS NEWS SERVICE
VIJAYAWADA

risks faced by traffic personnel managing roads and junctions in scorching temperatures, the DGP has sanctioned nearly Rs.48 lakh for the immediate procurement of protective equipment and welfare materials for traffic police staff across the state.

The funds are being released from the police department budget, and instructions have already been issued to the finance wing for immediate allocation. Harish Kumar Gupta stated that the health and safety of police personnel on duty are of utmost importance and assured that there would be no compromise in ensuring their welfare and protection.

Under this initiative, traffic personnel will be provided with UV protection goggles to shield their eyes from harmful ultraviolet rays, white caps

to reduce direct heat exposure on the head, ORS packets to replenish salts and fluids lost due to excessive sweating, water bottles to prevent dehydration, and face masks to protect them from dust and pollution emitted by vehicles.

A total of 3,192 traffic personnel across Andhra Pradesh are expected to benefit from the programme. The beneficiaries include traffic constables, head constables and sub-inspectors deployed at busy traffic junctions, national highways, bus stands, railway stations and major urban centres.

The DGP directed all police commissionerates and district SPs to immediately utilise the sanctioned funds, complete the procurement process on priority and ensure quick distribution of the materials to all units. Senior officers have been entrusted with monitoring the implementation of the programme.

Traffic police personnel have welcomed the initiative and expressed gratitude towards the DGP for recognising the difficulties faced by field staff during the intense summer season.

Major schemes likely to be launched on TG Formation Day

Today's Cabinet meet to take call on insurance for every family, enhanced pensions, housing for more sections

HANS NEWS SERVICE
HYDERABAD

THE state government is likely to announce the launch of major schemes on June 2, the State Formation Day, for which crucial decisions would be taken at the Cabinet meeting convened by Chief Minister A Revanth Reddy on Saturday. The items topping the agenda of the Cabinet meeting include two lakh new pensions, Indiramma family insurance scheme for all families in the state, and housing for more sections.

Considering that the Chief Minister has already decided to hand over Indiramma houses in Adilabad district on June 2, officials said the Cabinet would review the implementation of the housing scheme and take some

decisions to expedite the construction of the houses and the release of funds to the beneficiaries on a fast track. The applications received for pensions have been scrutinised and their approval is under progress in the districts. The Cabinet will ratify a proposal to sanction two lakh pensions on the State Formation Day. The enhancement of the pension amount would also be discussed.

The Chief Minister will take a call on the specifics of the foregoing key schemes in view of the financial challenges in the current financial year. The Cabinet sub-committee on Rs 5 lakh family insurance scheme for every Telangana family, headed by Deputy Chief Minister Bhatti Vikramarka, would submit its report, following which the Cabinet will

work out the modalities of launching the scheme. The state government is keen on launching the scheme on June 2.

In the wake of the opposition Bharat Rashtra Samithi party's strong criticism on the slow pace of paddy procurement, the Chief Minister and Ministers will review the status of

the procurement and take some corrective measures. The situation with regard to maize procurement would also be reviewed at the Cabinet meeting. The construction of irrigation projects, integrated residential educational institutions as well as road development projects would also be reviewed.

Sankara Eye Foundation gets Asia Book of Records honour

GUNTUR

The Asia Book of Records has recognised Sankara Eye Foundation India for conducting the maximum number of free eye surgeries under a single vision programme by an organisation. Between March 2004 and March 31, 2026, the foundation provided free eye care to over 30 lakh patients across India, restoring sight to underserved communities. Founder and managing trustee Dr R V Ramani said the recognition reflects the trust of millions and the foundation's commitment to eliminating curable blindness. The organisation currently performs nearly 1,000 surgeries daily through 14 centres spread across 10 states.

CM orders state-wide steps to tackle heat emergency

Continued from P1

Reviewing drinking water availability, the Chief Minister instructed departments to ensure there is no shortage in either rural or urban regions and directed immediate tanker supply to water-stressed habitations. The government is also setting up emergency response centres across multiple districts to strengthen heatwave preparedness and medical response systems. During the

review, officials recalled that Andhra Pradesh had recorded a peak temperature of 50.1 degree centigrade during the 2015 El Nino year and warned that current weather conditions were again showing severe El Nino-linked patterns.

Naidu directed officials to intensify plantation and groundwater recharge efforts, stating that improved green cover could help reduce long-term heat intensity.

SC questions quota benefits for BC creamy layer

Continued from P1

Earlier in January 2025, the top court in a separate case had refused to entertain a plea seeking the exclusion of children of Indian Administrative Service (IAS) and Indian Police Service (IPS) officers from Scheduled Castes (SC) and Scheduled Tribes (ST) reservation benefits in

Madhya Pradesh.

It said the reference to the exclusion of the creamy layer from SC and ST quotas in a seven-judge Constitution bench's August 2024 ruling in the State of Punjab versus the Davinder Singh case was only a view and the legislature has to decide in this regard.

CJP swings into action, demands Pradhan's scalp

Continued from P1

CJP founder Abhijeet Dipke urged followers to support an online petition demanding Pradhan's resignation.

"How are you cockroaches? Everyone is saying you are doing great on the internet, but I think now it is time to do some real work. Today, we are starting a petition demanding the resignation of the education minister," Dipke said in a video message.

Centre will make NEET re-test 100 pc error-free, says Pradhan

Continued from P1

"Twenty-two lakh children have gone through immense mental anguish. Understanding that anguish and taking responsibility, I am saying this today, we had to take some tough decisions," he said.

The National Eligibility-cum-Entrance Test (Undergraduate) for admissions in medical courses held on May 3 was cancelled by the National Testing Agency (NTA) recently amid allegations of paper leak. The matter is being probed by

the Central Bureau of Investigation (CBI) and a re-test is scheduled to be held on June 21. Pradhan said the government decided to cancel the examination after finding that "some assessments had been compromised." "We did not want even a single student to be deprived of their rightful seat because of the conspiracy of those involved in irregularities in the education system and the examination mafia," he said. The minister acknowledged the criticism over the handling of the issue but said the gov-

ernment is prepared to face the challenge. "We are facing criticism and challenges, and I accept that. But it is our responsibility to set the system right. It is not our duty to shut our eyes and turn away from the problem," he said.

The education minister further said the government is committed to ensuring a smoother conduct of the re-examination scheduled on June 21. "For the examination scheduled on June 21, it is our responsibility to ensure that it is 100 per cent error-free," he said.

NEETGATE: More skeletons more tumble out of closet

Continued from P1

The agency alleged that Havaladar was involved in the NEET UG process after being appointed an expert by the National Testing Agency (NTA). "She had complete access to the physics question paper. In April, she shared some of the questions with co-accused Manisha Mandhare," the statement said.

The CBI arrested Mandhare, a botany teacher from Pune, in connection with the NEET paper leak on May 16.

The agency found that the questions Havaladar shared with the aspirants tallied with the physics paper of NEET UG 2026.

"The CBI conducted searches at various locations across the country and seized several incriminating documents, laptops, bank statements and mobile phones. A detailed analysis of the seized items is underway," the agency said.

EC announces polls for 26 RS seats on June 18

Continued from P1

Besides, one seat each in Maharashtra and Tamil Nadu will also go to the polls on June 18. The last date for filing of nominations is June 8, according to the EC. In a separate notification, the EC also announced by-elections to fill the vacancies created by the NCP's Sunetra Pawar in Maharashtra and the AI-ADMK's C Ve Shanmugam in Tamil Nadu following their resignations after they were elected to the state assemblies.

While the NDA is set to bag Pawar's seat, going by its strength in the state assembly, the TVK is likely to get the lone Rajya Sabha seat from Tamil Nadu going for a bypoll.

The tenure of Pawar's seat will be till July 4, 2028 while that for the Tamil Nadu seat will be till June 29, 2028. In

Andhra Pradesh, the TDP will win all the four seats for the Council of States and the BJP will bag all four seats in Gujarat.

In Jharkhand, the JMM-Congress alliance is likely to win both the seats, but the BJP which has 21 seats of its own may try to bag one seat with the help of cross-voting by four opposition members.

In Madhya Pradesh and Rajasthan, the Congress will get one seat each while the BJP will win two seats in each of the states, going by their current numbers. In Karnataka, the Congress will win three seats and the BJP will get only one seat.

Among those who are retiring from the Rajya Sabha are Gowda, Congress president Kharge (both from Karnataka), Union ministers Ravneet Singh (Ra-

jasthan) and George Kurian (Madhya Pradesh), former chief minister Digvijay Singh, and Congress leader Shaktisinh Gohil. Besides Ravneet Singh, the members whose tenure is ending in Rajasthan are Neeraj Dangi of the Congress and Rajendra Gehlot of the BJP. Rajasthan has a total of 10 Rajya Sabha seats.

The BJP and the Congress currently have five members each. Given the present strength of parties in the 200-member Rajasthan Assembly, the BJP is expected to win two of the three seats, while the Congress is likely to secure one. The BJP has 118 MLAs in the Assembly, while the Congress has 67 members. The BSP has two MLAs, the Bharat Adivasi Party four, the Rashtriya Lok Dal one, and Independents eight.

India, Cyprus boost ties to a strategic partnership

Continued from P1

The two leaders also deliberated on the West Asia crisis as well as the Ukraine conflict, with PM Modi saying New Delhi supports all efforts for an early end to the hostilities. "Over the past decade, investment from Cyprus to India has nearly doubled. Trust between the two countries has increased, and with the India-European Union Free Trade Agreement, nu-

merous new possibilities have emerged," Modi said in his media statement. Taking advantage of this, we are targeting to double this investment again in the next five years, he said. "And to realise this resolve, today we are elevating our trusted relationship to a strategic partnership," he added.

The prime minister also noted that the friendship between India and Cyprus is

both "strong and futuristic" as he elaborated on various aspects of his talks with Christodoulides. "We also discussed global issues. Whether it is Ukraine or West Asia, we will continue to support efforts for the early end of the conflict and for peace," Modi said. "We are also unanimous on the view that reform of global institutions is urgent and important for resolving the growing global challeng-

es," he said. The prime minister said the two countries also decided to expand cooperation in areas of maritime security and counter-terrorism.

In his remarks, Christodoulides said India and Cyprus decided to set up a joint task force for cooperation in key sectors such as infrastructure and shipping. Christodoulides kick-started his three-day visit to India on Wednesday.

India’s residential market matures; Hyd joins growth surge in Q1 2026

ALONG WITH BENGALURU AND DELHI-NCR, HYDERABAD POSTED ROBUST DOUBLE-DIGIT SALES GROWTH IN Q1 2026 AMID RISING PREMIUM HOUSING DEMAND AND STEADY PRICE APPRECIATION

NEW DELHI

INDIA'S residential real estate market has transitioned into a "structurally mature, demand-anchored growth phase", with Q1 2026 recording 93,065 new unit launches and 95,973 unit sales across the top eight cities, a report said on Saturday. The report from PropTiger said the supply rose 1.1 per cent sequentially and sales improved 1 per cent quarter-on-quarter. The weighted average price reached a record high of Rs 10,050 per sq ft -- crossing the five-digit benchmark for the first time -- "signalling that value creation now drives market health rather than transaction volume."

"The Indian residential market has transitioned into a structurally more disciplined phase. Growth today is increasingly being driven by demand quality, inventory discipline, and

- India’s housing market entered a more mature, demand-driven growth phase in Q1 2026
- New launches stood at 93,065 units while sales reached 95,973 units across top eight cities
- Average housing prices crossed `10,000 per sq ft for the first time
- Bengaluru led growth with 33% YoY rise in sales
- Hyderabad posted strong double-digit sales growth alongside Delhi-NCR and Chennai
- Premium and upper mid-income housing drove most new launches
- Q2 outlook remains positive with steady sales and price growth expected.

buyer confidence rather than speculative expansion," said Prakash Tejwani, CEO, PropTiger.

The supply remained flat at -0.1 per cent on a YoY basis, while sales moderated to -2.2 per cent, reflecting healthy normalisation rather than structural weakness, the report noted.

Bengaluru emerged as the standout performer, recording sales of 15,603 units, up 33 per cent year-on-year and 12 per cent sequentially. The city also maintained near-parity between new supply and sales absorption, indicating a well-balanced market. The GCC and startup employment engine continues to prove more durable than conventional IT hiring cycles, providing Bengaluru with a structurally differentiated demand base.

Mumbai Metropolitan Region remained the largest market by volume and value with 26,116 sales units in Q1

2026. Though the performance moderated on YoY basis, it reflected base-effect normalisation against an exceptional 2025, rather than a loss of demand momentum, the report noted.

Chennai, Hyderabad and Delhi-NCR also posted robust gains in sales from 11 per cent to 43 per cent, while Pune, Kolkata and Ahmedabad showed mixed trends.

A disproportionate share of new launches in Q1 2026 -- particularly in Mumbai MMR, Bengaluru, and Delhi NCR -- remained concentrated in the premium and upper mid-income segments, driving the average property prices higher. The outlook for Q2 2026 is constructive, the firm said, predicting a steady sequential growth of 2-4 per cent and sustained year-on-year price appreciation of 4-8 per cent across major metros driven by limited mid-segment supply.

India emerges as Asia Pacific’s top real estate yield market

Office, logistics, retail and student housing assets in India outperformed regional peers on returns, while Q1 investment inflows crossed \$2.29 billion

NEW DELHI

INDIA offers the highest real estate yields across every major asset class in the Asia Pacific region and recorded an 189 per cent year-on-year jump in investment volumes in the Q1 CY 2026, a report said on Thursday.

The report from CBRE said that cap rates in India consistently outpace every other market in the region across office, retail, logistics, hotels, and student housing sectors, in some cases by as much as 320 basis points. India's Q1 2026 investment volume rose to \$2,295.19 million from \$839.85 million a year earlier, second to only Singapore that led the region in investment volumes with a 364 per cent year-on-year increase. "We are seeing genuine, broad-based demand across sectors driven by India's economic fundamentals, its growing corporate base, and a young, consumption-led population," said Anshuman Magazine, Chairman & CEO, India, South-East Asia, Middle East & Africa, CBRE.

"Global investors who have been cautious till now are actively looking to deploy capital here, and we expect this momentum to strengthen further as more institutional-grade products come to market," he added. The report highlighted sustained interest from domestic institutions, family offices, and global capital markets players as they increasingly allocate to Indian real estate through direct acquisitions, REITs, and structured debt instruments. India is one of the top markets for real estate debt interest in Asia Pacific, signalling maturing capital markets, the report noted.

The report noted India's Grade A office cap rates range from 7.50 per cent to

8.40 per cent in core central business district locations, compared to 3.25 per cent to 3.80 per cent in Singapore and 2 per cent to 3 per cent in Tokyo.

India is named among the top three preferred markets for Grade A office investment enquiries in Asia Pacific, alongside Singapore and Japan. Student housing yields in India stood at 8.50 per cent-9 per cent, around 320 basis points higher than the next-highest market, Australia. The institutional-grade logistics cap rates in India stand at 7.15 per cent-7.75 per cent, around 115 basis points more than the second-ranked market, Vietnam with the rates of 6 per cent-7 per cent.

UPRERA bars builders from using homebuyers’ money for assured return schemes

LUCKNOW: Uttar Pradesh Real Estate Regulatory Authority has barred builders from using homebuyers' money for "assured return" schemes and made it mandatory for all registered projects to operate through three separate bank accounts, officials said on Thursday. The new framework, aimed at tightening financial discipline

and preventing diversion of project funds, was discussed at a meeting convened by

UP RERA with bankers and financial institutions. Uttar Pradesh Real Estate Regulatory Authority (UP RERA) Chairman Sanjay Bhoosredy chaired the meeting, which was attended by senior officials of nationalised banks, financial institutions and the State Level Bankers' Committee.

Experts bullish on long-term real estate prospects in South India

HANS BUSINESS HYDERABAD

INDUSTRY experts believe that South India's long-term real estate growth trajectory continues to remain fundamentally strong.

The three large states of Karnataka, Tamil Nadu and Telangana contribute almost 25 per cent of India's GDP. Tamil Nadu is the second largest

contributor to India's GDP with share of 9 per cent while Karnataka is close behind with share of 8 per cent. Karnataka is largely driven by IT/ITES, Tamil Nadu has diversified economic base including

real estate, IT/ITES, automobiles and manufacturing clusters. Industry participants also point out that professionally managed real estate investment platforms, AIFs and REITs continue to witness growing investor interest as the sector becomes increasingly organized and transparent. Investors today are evaluating opportunities through a long-term lens, focusing more

on structural demand drivers. Sharad Mittal, Founder & CEO, Arnava Real Estate Fund Advisors, said: "Real estate investments are fundamentally linked to long-term economic indicators such as urbanization, infrastructure growth, employment generation, and end-user demand. Markets backed by strong industrial ecosystems and economic activity continue to remain

attractive for long-term real estate capital." Sharad, further added: "South India has consistently demonstrated resilience across market cycles. The region continues to benefit from manufacturing-led growth, infrastructure development, and sustained residential demand, which continue to support long-term investor confidence."

BIZ BRIEFS

Amazon expands beauty store

Amazon.in, an e-commerce platform, announced the expansion of its premium beauty selection, with over 100 new brands set to go live. Amazon will include renowned international brands such as, Dolce & Gabbana, Laura Mercier, Elemis, Urban Decay and more. Siddharth Bhagat, Director, Amazon India, said: "India's beauty industry is seeing a clear shift from availability-led shopping to more intentional, discovery-led consumption, driven by growing awareness of global beauty trends."

Paisabazaar's new campaign

Paisabazaar, a financial marketplace, announced the launch of a new integrated brand campaign for the Credit Premier League (CPL) featuring former Indian cricketer and commentator Irfan Pathan. CPL is Paisabazaar's initiative aimed at recognising and rewarding consumers with strong credit health.

FRAI organises seminar in Hyd

The Federation of Retailers Association of India Telangana chapter held a seminar in Hyderabad on tackling illicit trade and unfair market practices. Retailers, traders and policymakers raised concerns over counterfeit goods, illegal distribution, predatory pricing and deep discounting by quick commerce and e-commerce players. Participants said these practices harm genuine businesses, consumer trust, government revenues and livelihoods of small traders.

Domestic demand cushions India against global uncertainty: RBI

Financial conditions, crude oil prices challenges for external sector outlook

NEW DELHI

INDIA'S economic activity exhibited resilience in April, with industrial and services sectors maintaining strength across several segments even as the global economy continued to be shadowed by uncertainties in West Asia, according to the RBI's monthly bulletin released on Friday. Industrial and services activity stayed strong in many segments. Early results of listed private non-financial companies for Q4:2025-26 also showed an improvement in business performance over the previous quarter, with aggregate sales and operating profit recording a double-digit growth, the bulletin stated.

It highlighted that in the agriculture sector, rapid progress of summer sowing was

supported by above normal pre-monsoon rainfall and sufficient reservoir storage levels. However, a higher probability of above-normal minimum temperatures and unseasonal rains in some parts of the country could pose risks to the harvesting of remaining rabi crops. The current public foodgrain

stocks remain well above the buffer norms ensuring domestic food security.

The financial conditions, crude oil prices and capital flows continue to pose challenges to the external sector outlook. Nevertheless, robust services exports, positive net FDI flows, foreign exchange reserve buffers and a number

of proactive policy measures undertaken by the Government and the Reserve Bank are likely to cushion the Indian economy against external headwinds.

In March, net foreign direct investment remained positive for the second consecutive month. Foreign portfolio investors continued to remain net sellers in April and May, though the pace of outflows moderated, the bulletin observed.

CPI inflation rose to 3.5 per cent in April, driven mainly by food inflation, while core inflation remained steady indicating limited pass-through of higher input cost conditions. Although headline inflation remains firmly within the tolerance band, the pass through to domestic prices needs to be monitored, it pointed out.

Institutional buyers bid ₹2,380 crore in Central Bank of India OFS

MUMBAI

INSTITUTIONAL investors on Friday put in over Rs 2,380 crore worth bids in the Offer For Sale (OFS) of Central Bank of India shares, which got over-subscribed more than two times.

The government is selling up to 8 per cent stake in the Central Bank of India at a floor price of Rs 31 per share. If fully subscribed, the stake sale would fetch Rs 2,456 crore to the government.

Till the close of trading hours on Friday, institutional investors put in bids for over 76.86 crore shares, which is about 2.36 times of the 32.58 crore shares on offer.

At the indicated price of Rs 31.01 a share, non-retail investors put in over Rs 2,380 crore worth bids for Central Bank OFS. The OFS offer includes a 4 per cent greenshoe option, taking the total stake that the government intends to offload to 8 per cent. This is the first OFS by the government in the current fiscal. Retail investors will be able to bid in the share sale offer on Monday. The floor price

of Rs 31 a share is 8.58 per cent lower than the stock's Thursday's closing price of Rs 33.91 on the BSE. Shares of Central Bank of India slipped 7.90 per cent to close at Rs 31.23 on BSE on Friday. The OFS will help the government inch towards meeting the Securities and Exchange Board of India's minimum public shareholding norm. According to SEBI, all listed companies must maintain public shareholding of 25 per cent. The government currently holds 89.27 per cent stake. If the government exercises the greenshoe option, its total stake in the state-owned bank will come down to 81.27 per cent.

FLIPKART PARTNERS WITH INDIA POST TO BOOST LAST MILE PARCEL DELIVERY

NEW DELHI: E-commerce major Flipkart has signed an agreement with the Department of Posts for efficient last mile parcel delivery, an official statement said on Friday. The partnership aims to leverage the delivery network of the Department of Posts along with Flipkart's strong presence in India's e-commerce sector to provide efficient, reliable and customer-centric parcel delivery solutions across the country, the statement said. "The Department of Posts (DoP), Ministry of Communications, and Flipkart India Private Limited have signed an agreement for last mile parcel delivery services.

Oben Electric bets big on Telangana after strong Rorr Evo response

HANS BUSINESS HYDERABAD

OBen Electric, an electric motorcycle manufacturer, showcased Oben Rorr Evo, its newly launched electric motorcycle in Hyderabad. The company said it is witnessing strong demand for the new model, with Hyderabad emerging as highest booking market nationwide since its launch on April 30.

The vehicle is equipped with a 3.4 kWh LFP battery offering an IDC range of 180 km, acceleration from 0-40 km/h in 3 seconds and a top speed of 110 km/h. The motorcycle also supports fast charging from 0-80 per cent in 90 minutes and comes with an 8-year battery warranty.

The bike features a 5-inch colour TFT display, OTA updates, turn-by-turn navigation, geo-fencing, remote immobilisation and fall detection with emergency SOS through Oben Electric's proprietary ARXUS connected technology platform. It has 10 litres storage and integrates SmartIQOben Electric's AI-powered

ride optimisation technology, which enhances range by up to 15 per cent. Madhumita Agrawal, CEO, Oben Electric, said: "Hyderabad emerging as our highest booking market nationwide for the Rorr Evo reflects the city's strong shift towards electric motorcycles that deliver both performance and practicality."

Higher gold import duty could cut demand by 50-60 tonnes this year, says WGC

MUMBAI

INDIA'S gold demand is expected to contract by 50-60 tonnes this calendar year, around 10 per cent lower than the previous year, following the import duty hike, according to the World Gold Council (WGC). "Looking at 2026 as a whole, we estimate that combined jewellery and bar and coin demand could decline by around 50-60 tonnes, around 10 per cent lower than the previous year, due to the impact of the import duty hike," WGC said in its India gold market update. The gold import duty was raised sharply from 6 per cent to 15 per cent, making it the single-largest increase on record and fully reversing the duty cut of July 2024. The Prime Minister has also appealed to consumers to avoid

buying gold for a year.

Other factors, such as the gold price, changes to income levels, inflation, or effects from the monsoon, would further influence annual demand, it added. "Our econometric models suggest that changes in import duties tend to impact gold demand in both the short and long term, although the impact differs across jewellery and investment products such as bars and coins. Investment demand appears more sensitive to duty changes, while jewellery demand has shown greater resilience," said WGC.

Dalmia Bharat to acquire JAL Cement assets in ₹2,850 cr deal

NEW DELHI: Dalmia Bharat on Friday said it will acquire the cement assets of debt-ridden Jaiprakash Associates, which has been acquired by billionaire Gautam Adani-led Adani Enterprises through insolvency proceedings. Dalmia Cement (Bharat) Ltd (DCBL), a wholly-owned subsidiary of Dalmia Bharat, has already executed a Business Transfer Agreement (BTA) with Jaiprakash Associates Ltd for the transaction, which is expected to complete within two weeks, a statement said.

Following the takeover, Dalmia Bharat's cement capacity will increase to 54.7 million tonnes per annum (MTPA). The BTA has been signed for acquisition of cement plants at Rewa (Madhya Pradesh), Churk, Chunar and Sadwa (Uttar Pradesh), with 5.2 MTPA cement capacity and 3.3 MTPA clinker capacity, at an enterprise value of Rs 2,850 crore, Dalmia Bharat said.

A female athlete with dark, curly hair, wearing a red singlet, is shown from the chest up. She has her hands clasped together in front of her face in a celebratory gesture. The background is blurred, showing other people and a blue wall with white stars.

ing declared “ineligible” by the WFL. Phogat’s senior counsel urged the bench to grant her the opportunity to participate in the trials, contending that the show-cause notice issued to her on May 9, a day before her participation in a domestic event in Gonda, showed that “somebody is clutching at straws” to oust her.

Arlekar at the Lok Bhavan here today in the presence of Chief Minister C Joseph Vijay. Shahjahan was made Minister for Minorities Welfare while Vanni Arasu was made Minister for Social Justice. DMK deputy general secretary A Raja, with a penchant for making controversial remarks, alluded the two parties joining the TVK Cabinet as a "coconut tree bending towards a neighbour".

IN BRIEF

Conspiracy through SIR to remove votes: DKS

BENGALURU: Dy CM D K Shivakumar on Friday alleged that there is a conspiracy to remove the votes of poor people through the SIR process and said Congress workers have been instructed to remain highly vigilant.

Speaking to reporters near his residence in Sadashivanagar, Bengaluru, the Deputy Chief Minister said the party has begun creating awareness among legislators and Booth Level Agents (BLAs) regarding the Special Intensive Revision (SIR) process.

“We have convened meetings to educate our MLAs and BLAs about SIR because the dates have already been announced. Every eligible person must submit the necessary application; otherwise, citizens may lose their voting rights,” he said.

He warned that similar situations had occurred in other states and stressed the importance of protecting voter rights. “If people lose their voting rights, they may also face difficulties in accessing welfare benefits such as pension schemes and the Gruha Lakshmi Scheme. Hence, we are focusing on public awareness,” he added.

Responding to questions regarding the government’s decision to withdraw cases filed against members of the Muslim community, Shivakumar clarified that only politically motivated cases were being withdrawn. “Cases filed against farmers and Kannada activists have also been withdrawn earlier. There is nothing wrong in withdrawing politically motivated cases,” he stated.

New intl cricket stadium near Anekal soon

BENGALURU: Chief Minister Siddaramaiah will lay the foundation stone tomorrow (May 23) for a new international cricket stadium coming up near Anekal on the outskirts of Bengaluru. With a seating capacity of 80,000, the proposed venue is set to become India’s second-largest cricket stadium after the Narendra Modi Stadium in Ahmedabad.

The mega project, estimated to cost around Rs 943 crore, is expected to be completed within the next three years. The stadium will be constructed at Surya Nagar Phase 4 in Indlawadi village of Anekal taluk under the ‘KHB Surya Kreedra Grama’ initiative of the Karnataka Housing Board (KHB).

Designed as a world-class sporting venue, the stadium will feature modern amenities including hospital-ity lounges, VIP boxes, advanced media facilities, and enhanced spectator services. Comprehensive security and crowd-management systems are also planned to handle large gatherings during international matches and major events.

Currently, Bengaluru’s iconic M. Chinnaswamy Stadium has a seating capacity of only around 32,000, which many believe is inadequate for the growing demand during international cricket fixtures and IPL matches. The new stadium, spread across 75 acres, is expected to significantly boost Bengaluru’s capacity to host large-scale sporting events. Apart from international cricket, the project is expected to play a major role in promoting sports and nurturing young talent in Karnataka. The facility will host cricket academies, youth training programmes, school and college tournaments, and state-level sporting events. The stadium is also being envisioned as a multi-purpose venue capable of hosting concerts, conferences, public gatherings, corporate events, and exhibitions, making it one of the largest entertainment and sporting hubs in the region.

Flight services from Bengaluru to Bidar and Kalaburagi to resume: MB Patil

HANS NEWS SERVICE
BENGALURU

INFRASTRUCTURE Development Minister M B Patil on Friday announced that flight services from Bengaluru to Bidar and Kalaburagi, the district headquarters of the Kalyana Karnataka region, will resume from June 1 and June 10 respectively.

Speaking on the occasion, he said that Star Air (Ghodawat Enterprises Limited) will operate flights

on the Bengaluru–Bidar–Bengaluru and Bengaluru–Kalaburagi–Bengaluru sectors. The Government is extending viability gap funding of Rs 28.47 crore to support the operations. Advance booking for flights on both routes has already commenced, he added.

Patil said the flight service to Kalaburagi had earlier been suspended due to financial losses. In the case of Bidar, services were being operated with special

support from the Kalyana Karnataka Regional Development Board. Taking into account the growth of industries, education, tourism, agriculture and commercial activities in the Kalyana Karnataka region, the Government has decided to revive the services under the regional air connectivity initiative, he said.

The Minister said the Government is committed to enhancing air connectivity to Tier-2 and Tier-3 cities

across the State. Such initiatives will not only accelerate regional economic growth but also contribute to infrastructure development, he noted.

It may be recalled that Patil had recently held several rounds of discussions with ministerial colleagues from the Kalyana Karnataka region and representatives of various airline companies regarding the resumption of flight services to Bidar and Kalaburagi.

Govt urges NCERT to introduce dedicated chapter on groundwater

BENGALURU

THE government has called on the Centre and the NCERT to include a dedicated chapter on groundwater conservation and management in the national school curriculum.Minor Irrigation, Science and Technology Minister N S Boseraju on Friday said the state has formally written to the Central Government seeking the inclusion of a comprehensive “groundwater” chapter in National Council of Educational Research and Training textbooks under the upcoming curriculum revisions aligned with the National Education Policy 2020.

The minister noted that while the existing NCERT Class 10 Social Science textbook, Contemporary India-II, contains a chapter on “water resources,” the current curriculum largely focuses on surface water, with limited attention given to groundwater, despite it being India’s most critical freshwater resource.

“Nearly 97 per cent of the liquid freshwater available on Earth exists as groundwater. Around 50 per cent of domestic water usage and nearly 25 per cent of agricultural needs in India rely directly on groundwater sources,” Boseraju said, according to a

release issued by his office. He warned that climate change, declining surface water availability, and increasing water consumption are intensifying pressure on groundwater reserves across the country. The state highlighted in its communication that over-exploited, critical, and semi-critical groundwater zones have increased sharply over the past two decades, while groundwater quality continues to deteriorate because of contamination and unsustainable extraction,” he added. The Karnataka government argued that groundwater awareness must begin at the school level if India is to effectively address future water insecurity.

Drawing comparisons with international education models, the state pointed out that school curricula in countries such as the United States already include de-

tailed lessons on groundwater systems, aquifer behaviour, permeability, porosity, groundwater flow, and contamination, the release said. Karnataka has urged NCERT to include similar scientific and practical learning modules in the revised curriculum being prepared for the academic year 2027–28 under the National Curriculum Framework for School Education 2023. The state government recommended that the proposed groundwater chapter should include rainwater harvesting and managed aquifer recharge technologies, along with nature-based solutions such as constructed wetlands and green roofs.

It also suggested including lessons on aquifer mapping and groundwater modelling, as well as the use of advanced monitoring systems, including IoT and remote sensing.

In addition, the chapter should cover national water conservation programmes implemented by the Ministry of Jal Shakti, Central Ground Water Board, and NITI Aayog.

“Addressing future water scarcity cannot be achieved through infrastructure projects alone. The next generation must understand the real importance of water conservation at the school level itself,” Boseraju said.

“Climate change is steadily reducing surface water availability, making groundwater increasingly critical for survival,” he said, adding that “introducing a dedicated and comprehensive chapter on groundwater in the NCERT curriculum is now an urgent national necessity. We are confident that the Central Government will respond positively to this forward-looking proposal.”

Rado watch stolen from deceased patient at city hospital

HANS NEWS SERVICE
BENGALURU

A disturbing incident highlighting alleged negligence and insensitivity at a private hospital in Bengaluru has come to light after an expensive wristwatch belonging to a deceased patient reportedly went missing from the hospital premises. A complaint has been registered at the Govindarajana-

gar Police Station regarding the theft of a Rado watch worth nearly Rs 2 lakh. According to the complaint, Ramayya, an elderly man suffering from serious health complications, had been admitted to a private hospital in Bengaluru for treatment. Despite medical efforts, he passed away during treatment. However, the family alleges that during the course of treatment, his branded Rado watch and even the shirt he was wearing mysteriously disappeared from the hospital.

The issue reportedly came to light after Ramayya’s daughter enquired about her father’s belongings following his death. Family members alleged that hospital staff failed to provide clear answers regarding the missing valuables and behaved irresponsibly when questioned.

Adding to the suspicion, the family claimed that when they demanded ac-

cess to CCTV footage from the hospital to verify what had happened, staff members allegedly informed them that the footage had been deleted. This response has now raised serious concerns over the handling of patient belongings and security measures inside the hospital.

The daughter of the deceased reportedly told police that the watch was not merely an expensive accessory, but one of the last personal memories connected to her father.

Hurt by the hospital’s response and the disappearance of the valuables, she approached Govindarajana-

gar police seeking legal action. Based on the complaint, police have registered an FIR and initiated an investigation into the incident. Officers are expected to question hospital staff, re-

view available records and examine whether there was any deliberate attempt to destroy evidence or conceal information related to the missing watch.

The incident has triggered outrage among the public, with many questioning the safety of patients and their belongings inside private hospitals.

Concerns are also being raised about accountability and transparency in hospitals when dealing with valuables belonging to patients, particularly senior citizens undergoing critical treatment.

Police sources said further investigation is underway and action will be taken based on the findings. Authorities are also likely to examine whether the hospital violated any protocols related to patient property management and CCTV data retention.

HIDDEN THYROID DISORDERS

Major cause of infertility and miscarriages, caution medics

HANS NEWS SERVICE
BENGALURU

THYROID imbalance is increasingly emerging as a hidden but treatable cause behind infertility, irregular menstrual cycles, failed conception attempts, and recurrent miscarriages among urban women, according to Bengaluru-based gynaecologist and IVF specialist Dr. Vidya V Bhat.

Dr. Bhat, who serves as the Medical Director of Radhakrishna Multispeciality Hospital, said a growing number of women in their late 20s and 30s are being diagnosed with thyroid-related reproductive complications, particularly in metropolitan cities like Bengaluru.

With over 35 years of experience in women’s health and fertility care, she noted that changing lifestyles, stress, lack of sleep, poor dietary habits, obesity, and sedentary routines are contributing significantly to hormonal imbal-

ances among urban women. “Many women undergo years of fertility struggles or repeated miscarriages without realising that an underlying thyroid disorder could be the reason,” Dr. Vidya V Bhat said. “Though small in size, the thyroid gland plays a critical role in regulating hormones, ovulation, menstrual cycles, pregnancy health, and fetal development.”

According to her, both hypothyroidism and hyperthyroidism can negatively impact fertility by affecting ovulation, egg quality, implantation, and menstrual regularity. If left untreated, thyroid dysfunction can also increase the risk of pregnancy complications.

Transport Minister distributes 10 free EV autos to empower women

HANS NEWS SERVICE
BENGALURU

IN a significant initiative aimed at promoting women empowerment and sustainable urban mobility, Karnataka Transport Minister Ramalinga Reddy personally distributed 10 free electric vehicle (EV) autos to women and transgender beneficiaries at the Koramangala office in Bengaluru.

Speaking on the occasion, Ramalinga Reddy said that it was a matter of great satisfaction to provide free EV autos from his personal funds to women aspiring to lead self-reliant, dignified, and financially independent lives. He stated that the initiative was launched with the objective of creating sustainable livelihood opportunities through eco-friendly self-employment and enabling women and transgender persons to build independent futures. He also emphasised that financial independence among women is an important step towards social empowerment.

Under the initiative, the selected beneficiaries received specialised training from CGI, B.PAC, and Peace Auto Union. All the beneficiaries possess valid driving licences

and have undergone the necessary training to safely and professionally operate electric autos.

The programme has prioritised widows, single mothers, women without family support, and transgender persons, with a focus on strengthening their financial independence and social dignity. The initiative reflects the Karnataka Government’s commitment towards women empowerment, green mobility, and the creation of sustainable livelihood opportunities for women and marginalised communities.

Peace Auto State President Raghu Narayan Gowda, B.PAC Programme Head Raghavendra Poojari H.S., and other dignitaries were present during the auto distribution programme.

VTU CREATES A RECORD

Results declared 10 minutes after exam!

HANS NEWS SERVICE
BENGALURU

VISVESVARAYA Technological University (VTU) has created history by announcing the final semester engineering exam results just 10 minutes after the exam ended. The results were jointly released by VTU Vice-Chancellor Prof. S. Vidyashankar and Registrar (Evaluation) Prof. U.J. Ujwal. A total of 56,192 students appeared for the B.E. and B.Tech final semester exams. The exam ended at 5:30 p.m. on Friday, and by 5:40 p.m. the results were announced. Achieved 99.98% result. Compared to previous years, the entire evaluation process was completed 8 days earlier, breaking previous records. Earlier, results were announced within one hour of exam completion. This time, results were directly sent to students’ mobile numbers.

Speaking on the occasion, VTU Vice-Chancellor Prof. S. Vidyashankar said: “VTU has always been at the forefront of adopting technology. This result itself is proof that VTU is student-friendly. Announcing results within just 10 minutes of exam completion is no easy task. I congratulate the administrative staff, exam section staff, and affiliated college

- RESULT HISTORY
- In May 2025, results for the 2021 batch (50,321 students) were announced within one hour after exam.
 - In May 2024, results for the 2020 batch (37,011 students) were announced within 3 hours.
 - In 2023, results for the 2019 batch (43,662 student) were announced two days after the exam

staff who made this possible. Final-year students eagerly await results for jobs and higher education, so we ensured quick announcement.” Registrar (Evaluation) Prof. U.J. Ujwal added: “We adopted digital evaluation of answer scripts and prepared in advance to announce results quickly. With everyone’s cooperation, this was possible.” Students can see the result at website <https://results.vtu.ac.in>

Fake doctor profile on matrimonial sites

Bengaluru, Mysuru women cheated of lakhs

HANS NEWS SERVICE
BENGALURU

A shocking matrimonial fraud case has surfaced in Karnataka where a man allegedly posed as a PhD holder and doctor on matrimonial websites and cheated more than ten women from Bengaluru and Mysuru by promising marriage and collecting lakhs of rupees from them. A case has now been registered at the Aduodi Police Station against the accused, identified as Pradeep

Solomon, and his mother Kalavathi. The duo is currently absconding fearing arrest.

According to police sources, Pradeep Solomon allegedly created fake high-profile accounts on matrimonial platforms under the name “Dr. Pradeep Solomon,” claiming to be highly educated and financially well settled. Investigators said his mother actively supported the fraud by helping create a false image of wealth and social status before pro-

spective brides and their families.

The accused reportedly rented a luxurious bungalow

in Mysuru and projected themselves as a rich and influential family. Police said the lavish lifestyle and ex-

pensive setup helped them gain the confidence of women and their parents who approached them for marriage alliances.

After establishing trust, the accused allegedly began demanding money from the victims citing urgent financial issues.

He reportedly told families that a huge amount of his money was “stuck” in the bank due to technical reasons and requested temporary financial assistance, assuring them the amount

would soon be returned. Believing his claims, several families transferred large sums of money to him. In one recent case, a wealthy Bengaluru-based family allegedly lost lakhs of rupees after trusting the accused.

Soon after receiving the money, Pradeep Solomon and his mother reportedly disappeared and stopped all communication.

As news of the fraud spread, multiple women and their family members from Mysuru and Bengaluru

gathered near the rented bungalow in Mysuru claiming they too had been cheated in a similar manner.

Police said a detailed investigation is underway and special teams have been formed to trace the mother-son duo. Officers suspect that more victims could come forward as the probe progresses.

Authorities have also appealed to the public to verify matrimonial profiles carefully before sharing personal or financial information.

Indian OTT platforms ignoring NRIs

Becomes a serious problem for Telugu cinema

SUHAS SISTU

The growing frustration among overseas Telugu audiences is exposing a major flaw in the Indian OTT streaming ecosystem. While Indian viewers are enjoying instant digital premieres of new Telugu films, Non-Resident Indians (NRIs), especially in the United States, are increasingly being left without legal access to the same content. This repeated issue is now turning into a serious concern for the future of Indian OTT platforms and their global credibility.

Recent Telugu OTT releases like *Bad Boy Karthik*, *Sathi Leelavathi*, and *The Raja Saab* have highlighted the problem once again. Though these films premiered on major streaming giants like

Amazon Prime Video and JioHotstar in India, many subscribers in the United States discovered that the movies were either unavailable or significantly delayed on the same platforms overseas.

For Telugu cinema, the overseas market — particularly the U.S. — has played a crucial role in building global recognition. From theatrical collections to social media promotions, NRIs have consistently supported Telugu films and helped expand their international reach. Yet, despite paying premium subscription charges across multiple OTT services, many overseas audiences are unable to legally stream newly released Indian films on release day.

The larger issue lies in how Indian OTT platforms continue marketing films with aggressive “streaming now

worldwide” campaigns while quietly restricting access in international territories. This lack of transparency is slowly damaging audience trust. Many viewers abroad now feel sidelined, even though they represent one of the most loyal and financially strong consumer bases for Indian entertainment.

Industry experts believe poor international OTT planning can have long-term consequences. When legal viewing options disappear, piracy naturally becomes the easiest alterna-

tive for frustrated audiences. This not only affects the streaming platforms but also impacts producers, distributors, and actors who depend heavily on overseas popularity and engagement. If Indian OTT services continue ignoring the overseas audience, they risk weakening one of the strongest global markets that has supported Telugu cinema for years. The demand clearly exists — what is missing is proper global streaming planning and equal access for audiences everywhere.

‘Nagabandham’ poster raises expectations; slated for July 3 release

The makers of *Nagabandham* have unveiled a powerful new poster featuring young actor Virat Karnna, further increasing anticipation for the film's grand theatrical release on July 3. Directed by Abhishek Nama, the ambitious project has already created strong buzz through its promotional campaign, including striking posters, an intriguing glimpse, and chartbuster singles.

The latest poster presents Virat Karnna in an intense avatar, standing fearlessly in heavy rain with a giant cobra wrapped around his arm. Holding a massive blade and surrounded by fiery battle visuals and stormy seas, the actor's rugged transformation and fierce expression have become major talking points on social media.

According to the production team, post-production work is progressing rapidly as the film approaches release. The makers revealed that some of India's leading VFX studios are handling the CGI work to ensure a visually rich cinematic experience. The quality showcased in the promotional material has already impressed audiences and raised expectations among movie lovers.

Produced under the NIK Studios banner, “Nagabandham” is being mounted on a large scale by blending mythology with historical fiction elements. The film aims to offer audiences a visually grand theatrical spectacle.

For the Hindi market, Zee Studios is presenting

the movie and planning a wide release across North India and Hindi-speaking territories.

With aggressive promotions, high-end visuals, and a unique mythological backdrop, “Nagabandham” is steadily emerging as one of the most awaited Telugu releases of the season.

Satyadev's 'Samavarthi' FL promises an ecological action thriller

Satyadev Kancharana is gearing up to impress audiences once again with a powerful new avatar in *Samavarthi*. The makers recently unveiled the film's title and first-look poster, which has already created strong curiosity among cinema lovers and fans of intense action dramas.

Directed by Ajay Nag V, the film is being produced under the Rudra Pictures and Panchabhuta Productions banners. Touted as an ecological action thriller, “*Samavarthi*” is expected to combine action, survival elements, and emotional storytelling against a unique backdrop.

The newly released

first-look poster showcases Satyadev in a calm yet deadly avatar. Wearing headphones and maintaining a composed expression, the actor appears completely fearless even as multiple attackers armed with knives and axes surround him. His stylish appearance and intense body language have become the major highlights of the poster.

Interestingly, the title “*Samavarthi*” is associated with Yama Dharma Raja and symbolizes equal treatment toward everyone. The makers hint that Satyadev's character will be portrayed as a ruthless force who eliminates enemies without

fear or discrimination, adding a mythological depth to the action-driven narrative.

The film also features a strong supporting cast including Dileesh Pothan, Rajeev Kanakala, Ganavi Laxman, Ravindra Vijay, and Mohan Bhagath in important roles.

Known for choosing unconventional scripts and performance-oriented characters, Satyadev appears to be continuing the same trend with “*Samavarthi*.” With its intriguing concept, powerful visuals, and intense character design, the film is already emerging as one of the most anticipated projects in the actor's upcoming lineup.

‘Memu Coplam’ creates buzz with grand preview event

The upcoming Telugu web series *Memu Coplam* is gearing up for its digital premiere on May 22, and the makers recently hosted a grand preview event in Hyderabad that turned into a star-studded celebration. Streaming on ZEE5, the rural comedy-drama has already generated strong curiosity among OTT audiences with its unique blend of village humor, satire, mystery, and Telugu nativity.

The event witnessed the presence of several notable personalities from the Telugu film industry including Ajay Bhupathi, Kona Venkat, S. Thaman, and Bandla Ganesh. Many speak-

ers praised the series for bringing back rooted Telugu entertainment at a time when OTT platforms are largely dominated by crime thrillers and dark dramas.

Produced by B. V. S. Ravi under the RAW Entertainment banner and directed by Pradeep Maddali, *Memu Coplam* stars Getup Srinu, Raviteja Nannimalla, Nagababu, and Reethu

Chowdary in pivotal roles.

One of the biggest talking points at the event was the revelation that the entire series was completed in just 17 days. Despite the tight schedule, several guests appreciated the impressive production quality and technical standards. Music director Thaman praised composer Saket Komanduri for delivering energetic mu-

sic and emotionally engaging background scores.

Director Ajay Bhupathi highlighted the show's entertaining rural backdrop and comedy-driven storytelling, while Kona Venkat appreciated the cultural authenticity embedded in the narrative. Emotional moments also unfolded during the event when actor Raviteja Nannimalla became overwhelmed while speaking about his journey in the industry.

Blending cockfight culture, village chaos, humor, and emotional storytelling, *Memu Coplam* promises to be a refreshing family entertainer for Telugu OTT viewers this summer.

‘Ramayana’ deal leaves Bollywood buyers stunned!

The buzz around *Ramayana* is getting louder by the day, but now the film is making headlines for a completely different reason. While the recently released glimpse left audiences spellbound and raised expectations sky-high, the real drama seems to be unfolding behind the scenes in Bollywood's distribution circles.

Producer Namit Malhotra is reportedly demanding a massive ₹450 crores for the Hindi theatrical rights of the epic saga, and the figure has apparently sent top distributors into panic mode. Industry biggies like Anil Thadani, Jayantilal Gada, and Karan Johar are said to be keen on grabbing the rights, but insiders reveal that the jaw-dropping price has made them take a step back.

Trade circles are already comparing the deal with Shah Rukh Khan's upcoming film *King*, whose theatrical rights were reportedly acquired by Pen Marudhar for ₹250 crores. Against that backdrop, *Ramayana*'s quote is being called “too risky” even for Bollywood's biggest players.

Sources say distributors are now urging Namit Malhotra to reconsider the price and bring it down to a more realistic number. However, no deal has been finalized yet.

Directed by Nitesh Tiwari, *Ramayana* stars Ranbir Kapoor, Sai Pallavi, Yash, and Sunny Deol in key roles.

Raja Ravinder's first look from 'CASTE' is intense

The makers of *CASTE* have unveiled the powerful first look of Raja Ravindra from the movie, where he appears in the role of Minister Narayana. The intense poster has quickly grabbed attention among movie lovers and raised curiosity about the political backdrop of the film.

Directed and written by A. K. Jampanna, the film is being produced by Thota Lakshmi Koteswara Rao under the Golden Productions banner. Earlier, the film's first look and glimpse received a positive response from audiences, creating decent buzz around the project.

In the newly released poster, Raja Ravindra is seen dressed in white attire with a political party scarf draped over his shoulder. His serious expression and commanding screen presence have made the character look intense and powerful. The makers introduced him as “Minister Narayana,” hinting at a strong and impactful role in the narrative.

The film stars Varun Sandesh, Gagan, Satyam Rajesh, and Ravi in lead roles, while actresses Kashika Kapoor and Divi Vadthya play the female leads. The supporting cast also includes Nagababu and Prithvi Raj in important roles. Music for the film is being composed by Anup Rubens.

The makers are expected to announce the official release date of the movie soon. With a strong cast, political drama elements, and intriguing character reveals, “*CASTE*” is steadily building anticipation among Telugu cinema audiences.

Preethi Pagadala's elegant look speaks beyond fashion

Preethi Pagadala once again proves that simplicity and confidence can create the most striking visual impact. In this stunning photograph, the young actress appears effortlessly graceful as she poses in a flowing white outfit against a warm natural backdrop. The image has quickly caught the attention of social media users and fashion enthusiasts for its

classy and serene appeal. Dressed in an elegant layered white dress, Preethi carries a look that perfectly balances glamour with sophistication. The soft sunlight enhances the earthy tones surrounding her, while also highlighting her expressive features and natural charm. Her flowing hair and relaxed pose add a cinematic feel to the frame, making

the photograph look straight out of a fashion editorial. What makes the image particularly appealing is its minimalist beauty. Instead of relying on extravagant styling or dramatic settings, the photograph focuses on raw elegance and emotion. Preethi's confident expression and calm presence give the frame a powerful identity. The simplicity of the styling allows her

personality to shine through naturally. Over the years, Preethi Pagadala has been gaining attention for her fashionable appearances and graceful screen presence. This latest picture further showcases her ability to carry modern fashion with effortless poise. Fans have especially appreciated the earthy aesthetic and the refreshing natural vibe of the shoot.
