US debt tops \$40 trn, raises eco concerns

WASHINGTON: The national debt surpassed a record \$40 trillion on Wednesday, a staggering milestone as defense costs, social programs like Social Security and Medicare and interest on the burgeoning deficit to make up an enormous share of federal spending. The milestone figure was recorded just five months after the US hit a record \$39 trillion debt in March. It reached \$38 trillion five months before that, in October. The unprecedented \$40 trillion figure highlights competing administration priorities, from boosting the defense spending that the US relies on to carry out President Donald Trump's almost-6-month-old Iran war to lowering the cost of gas and groceries. Kush Desai, a White House spokesman, said the Trump administration "has been focused on slashing waste, fraud, and abuse in federal spending while accelerating economic growth to get America's debt-to-GDP ratio trending in the right direction."

MODI'S DEGREE ROW

Delhi HC sets Sept 29 for hearing appeals

NEW DELHI: The Delhi High Court has scheduled September 29 to hear appeals requesting the disclosure of Prime Minister Narendra Modi's bachelor's degree details. The date was set after Solicitor General Tushar Mehta, representing Delhi University, requested an expedited hearing. A Division Bench of Chief Justice Devendra Kumar Upadhyaya and Justice Tejas Karia was hearing the appeals, which challenged a single-judge ruling that overturned a Central Information Commission directive to release the degree records.

CUSTOM MILLED RICE

ED may probe CMR scam

- Money laundering by defaulting rice millers suspected
- Many rice millers failed to supply rice, clear dues since 2014

HANS NEWS SERVICE
HYDERABAD

CENTRAL probing agency Enforcement Directorate (ED) is likely to launch an investigation into the multi-crore Custom Milled Rice (CMR) scam in Telangana.

The Telangana Civil Supplies Department has reportedly made an appeal to the central agency to probe the entire episode, following allegations of money laundering by some of the defaulting rice millers, who have indulged in the rice scam since 2014, i.e.

under the erstwhile Bharat Rashtia Samithi regime and in the present Congress dispensation. "The Civil Supplies Department is preparing to act against rice millers who

are accused of defaulting on substantial amounts of government-supplied paddy dues. The Department has already submitted to the ED a list of 20 such millers who owe huge amounts to the government," sources told The Hans India.

Officials suspect that these millers have deliberately withheld the paddy dues owed to the government. Furthermore, official sources said: "The millers engaged in illicit fund-raising and money laundering (hawala) activities linked to their paddy/rice transactions."

SOUTH ZONAL COUNCIL MEET

Settle bifurcation issues faster, TG urges Centre

HANS NEWS SERVICE
HYDERABAD

THE Telangana government made a strong pitch to the Union government for expeditious settlement of all pending issues under the AP Reorganization Act as well as resolution of the Krishna River water disputes, besides seeking central support for the Kaleshwaram and Palamuru Rangareddy lift projects at the 31st Southern Zonal Council meeting chaired by Union Home Minister Amit Shah near Chennai on Thursday.

Participating in the meeting, Telangana Deputy Chief Minister Mallu Bhatti Vikramarka apprised the Union Home Minister of the pending division of Schedule IX Government companies and corporations due to differences over headquarters and related issues between Andhra Pradesh and Telangana state, which has already submitted its views concerning 23 institutions to the Centre.

Centre limits SIM cards to 9 per person

NEW DELHI

THE Department of Telecommunications (DoT) has directed telecom operators to decline new connections to subscribers who already have nine mobile SIMs in their name.

According to a circular, telecom operators have been asked to put in place appropriate technical and organisational measures from August 24 onwards to identify each subscriber seeking to obtain a connection beyond the prescribed limit and deny them a new SIM card.

"From August 24, 2026, onward,

TELECOM DEPARTMENT TIGHTENS ISSUANCE RULES USERS EXCEEDING LIMIT MUST SURRENDER EXTRA SIMS

TSPs (telecom service providers) shall take appropriate technical and organisational measures to identify

each subscriber who seeks to obtain mobile connections beyond the prescribed limit and commu-

nicate to him that he already has a maximum number of mobile connections permitted to an individual and accordingly, a new mobile connection cannot be provided to him," the circular said.

The DoT has asked telecom service providers to use the secure and centralised system Digital Intelligence Platform (DIP), established by the department. "Subscribers who have already obtained mobile connections beyond the prescribed limit and the details of such subscribers are available on the DIP," the circular said.

THE Telangana State Civil Supplies Department has successfully completed 50 days of its strategic 100-day operational action plan, Mission K-100, achieving significant milestones in pending Custom Milled Rice (CMR) evacuation, clearing warehouse, and fund mobilisation ahead of Kharif 2026–27.

During a comprehensive mid-term review meeting chaired by Commissioner of Civil Supplies M Stephen Raveendra, said that the department has achieved an overall cumulative CMR delivery of 11.17 Lakh Metric Tonnes (LMT), demonstrating strong operational discipline. This includes 8.34 LMT delivered across Weeks I to VI, recording an impressive 74 per cent achievement rate against targeted weekly allocations. The intensive monitoring mechanism has successfully activated 340 previously dormant mills, bringing down zero-delivery units from 1,351 to 1,011 across the state.

Vigilance teams are actively conducting intensive field inspections and registering FIRs against defaulters. The department was also executing the Revenue Recovery (RR) Act to seize properties and freeze bank accounts of defaulting millers, he said. So far the recovery of auctioned paddy has yielded a total of Rs. 1,000.57 crores as of August 19, 2026.

HYDERABAD

AHEAD of upcoming Ganesh festival, the Greater Hyderabad Municipal Corporation (GHMC) has intensified preparations for the Festival, with special focus on the newly added circles, zones and newly incorporated areas that are expected to witness significant movement of Ganesh idols and devotees during the celebrations and immersion.

Vinayaka Chavithi will be celebrated on September 14, while Ganesh Nimajjan is scheduled for September 25.

GHMC Commissioner RV Karnan on Thursday convened a review meeting at the GHMC head office with Additional Commissioners, Zonal Commissioners and Heads of Departments to review the comprehensive arrangements for the smooth and peaceful conduct of the festival.

As part of the advance preparedness, all Zonal Commissioners have been directed to conduct zonal-

- Ganesh Charuthi on Sept 14; immersion on Sept 25
- Focus on new areas and Balapur procession
- GHMC to coordinate with all key departments
- Cranes, boats, swimmers and ambulances deployed
- Round-the-clock sanitation and mobile toilets arranged
- Control Rooms at GHMC HQ and Tank Bund
- Road and crane works to finish by Sept 13

level convergence meetings with internal GHMC departments and line departments, including the Police, Fire Services, Irrigation, TRANSCO, R&B, HM-

Manikonda residents flag land grab bid; call on HYDRAA chief

HANS NEWS SERVICE
HYDERABAD

RESIDENTS of Manikonda have raised concerns over attempts by some individuals to enter and allegedly encroach upon lands earlier protected by the Hyderabad Disaster Response and Assets Protection Agency (HYDRAA) in Tirumala Hills and Venkateswara Colony.

A delegation of the Federation of All Colonies RWAs of Manikonda, led by its president Arvapalli Vamshi, met HYDRAA Commissioner AV Ranganath and brought the issue to his notice. The delegation urged HYDRAA to take immediate steps to ensure that the lands previously protected from encroachments continue to remain safeguarded.

A delegation of the Federation of All Colonies RWAs of Manikonda, led by president Arvapalli Vamshi, meets HYDRAA Commissioner AV Ranganath in Hyderabad on Thursday.

According to the residents, Ranganath heard their concerns and assured them of efforts to protect the lands. He also directed HYDRAA senior inspectors to visit the sites and take appropriate action. The delegation further requested HYDRAA's support for developing a park, which is spread over 6,054 square yards space on the protected land for the benefit of residents and the wider community. Ranganath responded positively to the proposal and assured them that the matter would be examined, Vamshi said.

"We are hopeful that lands in Manikonda that have been protected from encroachments will continue to remain safeguarded. We will continue our efforts to protect these lands and ensure that the interests of residents and the community are protected," Vamshi said. Tirumala Hills Colony president Dr P Avinash, general secretary Srinivasa Rao, treasurer Subhash and other residents were present.

10.89 tonnes of adulterated spices seized, two held

HANS NEWS SERVICE
HYDERABAD

THE Malkajgiri Special Operations Team (SOT) and Food Adulteration Surveillance teams conducted a raid on a spices manufacturing unit at Srinivas Nagar Colony under the Medipally police station limits on Thursday and seized 10.89 tonnes of adulterated spices worth Rs 25 lakh. The teams raided Sai Tirumala Enterprises and took two persons, Sathanarayana and Rudrashekar, into custody. The seized material was handed over to the Medipally police for further action.

According to the police, turmeric, chilli and coriander powders, along with garam masala, were being manufactured and packaged under unhygienic conditions without adhering to prescribed food safety and quality standards.

Police confiscated 2,300 kg of turmeric powder, 3,350 kg of chilli powder, 5,140 kg of coriander powder and 100 kg of garam

masala. The teams also inspected the raw materials used for production and packaging, processed powders, packaging materials and machinery.

Chilli powder was found to contain 30 per cent dust, while counterfeit packaging and labels were allegedly being used to mimic genuine brands. Police said substandard food products were being attractively packaged and supplied to the market.

Malkajgiri Police Commissioner B Sumati took a serious view of adulterated food items being brought to the market by exploiting consumer trust and warned of strict action against the perpetrators.

Citizens can also provide information on suspicious activities related to adulterated food items to the number 8712662111. Police urged people to buy products only after verifying essential details such as brand name, manufacturing date, expiry or best-before date, batch number, and Food Safety and Standards Authority of India (FSSAI) details.

10-floor Ambedkar Tower to come up at Lower Tank Bund

HYDERABAD: A 10-floor Dr BR Ambedkar Tower will come up at Lower Tank Bund in Hyderabad, with the State government approving its construction

at an estimated cost of Rs 108 crore. An official order to this effect was issued on Thursday. According to the order, the Ambedkar Tower will be constructed on the premises of the existing Dr BR Ambedkar Bhavan at Lower Tank Bund. The building is in a dilapidated condition and has remained unused for the past 12 years.

Sajjanar takes bike ride to check KBR Park traffic flow

POLICE COMMISSIONER URGES MOTORISTS TO FOLLOW TRAFFIC RULES AND COOPERATE WITH POLICE

HANS NEWS SERVICE
HYDERABAD

TO ensure motorists do not face inconvenience under the newly implemented one-way traffic system around KBR Park, clear signboards have been installed at all junctions and adequate traffic personnel deployed to guide commuters. Hyderabad City Police Commissioner VC Sajjanar inspected the arrangements on Thursday, riding a motorcycle to assess the traffic situation firsthand.

Without any fanfare and dressed in plain clothes, Sajjanar set out on a motorcycle at around 10 am to get a first-hand assessment of the traffic situation on the ground. He rode twice along the one-way route covering Road No. 45, Jubilee Check Post, Venkatagiri, KBR Park

Main Gate, Mugdha Junction, Basavarakam, Agrasen Chowrasta, and Film Nagar Junction and back to Road No 45.

The Police Commissioner again monitored traffic flow in the afternoon and interacted with personnel deployed at key junctions, including Agrasen Chowrasta, Film Nagar, Journalist Colony, Jubilee Hills Check Post and KBR Park Main Gate, to assess the situation and challenges on the ground.

Sajjanar said the one-way traffic system around KBR

Park was flowing smoothly. While motorists faced some confusion over lane switching on the first day of implementation, vehicle movement became considerably smoother by Thursday, he said.

"To ensure that motorists do not face any inconvenience, clear sign boards have been set up at all junctions and sufficient personnel have been deployed to guide and assist commuters," the Commissioner said.

He added that efforts were underway to complete the H-City project works at the earliest in coordination with GHMC and the construction agency. Appealing for public cooperation until the works are completed, Sajjanar urged motorists to strictly follow the Hyderabad Traffic Police guidelines and traffic regulations.

MMC chief prods officials to resolve public woes in a time-bound manner

HANS NEWS SERVICE
HYDERABAD

MALKAJGIRI Municipal Corporation Commissioner T Vinay Krishna Reddy on Thursday issued clear instructions to the officers of various departments to take coordinated steps to resolve public issues within a time-bound manner during his visit to New Sri Sainagar Colony under Boduppal Circle.

He reviewed various civic and infrastructure issues received from the representatives of Sri Sai Nagar Welfare Association and locals. The Commissioner instructed the officers to immediately start the SNDP development works approved by the Standing Committee earlier. If the contractor fails to start the work, it is suggested that the necessary proposals for re-tendering should be submitted as per the rules.

The authorities have been instructed to issue notices

to relocate the transformers on the road behind Anutek Commercial Complex to the premises of the respective property owners wherever possible and coordinate with the relevant departments.

The Commissioner has ordered the town planning authorities to take action against those who are using the cellar parking spaces in commercial buildings for other commercial activities.

The Commissioner has also directed that narrow roads in the colony be identified and steps be taken for road widening work in the necessary areas. It is suggested that a plan be prepared to reduce traffic congestion and provide better transportation facilities to the people.

The officials were instructed to bring the complaints received regarding drinking water pipeline leakages to the attention of HMWSSB officials and coordinate to resolve the

issues expeditiously.

Noticing that several commercial establishments in the colony had not renewed their trade licences, the Commissioner issued notices to all the shop owners and directed the officials to take steps to ensure that the licenses are renewed by this week.

The officials were instructed to identify the unauthorised structures built encroaching on the parking area near Akshara School and issue notices to the owners concerned to remove them. The Commissioner ordered that mosquito control measures be intensified. It was suggested that continuous fogging should be carried out in all colonies and sufficient diesel, staff and other requirements should be provided to ensure that two fogging autos are fully available. It was directed that fogging vehicles should be used systematically in areas and cover all colonies.

Plan crops wisely amid rain deficit, Uttam tells farmers

- Says deficit could worsen if September–October rains remain weak as projected
- He says drinking water and irrigation needs must be balanced
- Dondapadu Lift Scheme to provide irrigation to 53,000 acres

He appealed to farmers not to base their crop decisions entirely on the expectation of substantial rainfall or fresh reservoir inflows in the coming weeks. “Farmers must carefully assess assured water availability while selecting crops. We have to support agriculture wherever dependable water is available, but at the same time we must safeguard sufficient water for drinking purposes through the summer and until the next monsoon,” he said.

Uttam Kumar Reddy said the government would maintain a judicious balance between irrigation and drinking-water requirements. Reservoir releases would be decided on the basis of actual usable storage and realistic assessments of likely inflows rather than assumptions about future rainfall.

deficient during September and October as projected by the meteorological authorities. The minister said the State government was closely monitoring rainfall, reservoir levels and inflows before deciding on water release. The continuing rainfall deficit had affected inflows into major reservoirs, including

Nagarjuna Sagar, making prudent management of the available water essential. Referring to the outlook for the remaining monsoon period, Uttam said indications of deficient rainfall during September and October had to be factored into agricultural and water-management decisions.

HANS NEWS SERVICE
HYDERABAD

IRRIGATION and Civil Supplies Minister N Uttam Kumar Reddy cautioned farmers to exercise care in crop planning as the rainfall deficit continues, warning that the situation could aggravate if rainfall remains

Tragedy strikes Siddipet: Couple with 2 kids killed as car plunges into a well

HANS NEWS SERVICE
SIDDIPET

A tragic road accident occurred on Wednesday night near Appanapalli village in Dubbak mandal when four members of the family died after their car plunged into a roadside well.

Dandugula Raju from Balwanthapur village was returning home from Siddipet, along with his wife and two children, when the accident happened. The family left Siddipet at around 7 pm, but when they did not reach home even by midnight, relatives informed the police. Using the cell phone location, the police traced the car and found it had fallen into a well near Appanapalli.

Since none noticed the car falling, all four --Dandugula Raju (30), his wife Bhagya (25), son Nihansh (four) and daughter Shanvika (two) --died on the spot. The police, along with rescue teams, retrieved the bodies during the night and shifted them to the area hospital

for post-mortem. A case has been registered. The incident has caused deep grief in Balwanthapur and Appanapalli villages, with locals mourning the tragic loss.

TG BJP hails Centre’s youth outreach push

HANS NEWS SERVICE
HYDERABAD

TELANGANA State BJP welcomed the Union Cabinet’s decision encouraging every Union Minister to visit a university, interact directly with students, and understand the aspirations, concerns, and expectations of the younger generation.

On Thursday, BJP State Chief Spokesperson and Media In-charge N V Subash said the initiative reflected Prime Minister Narendra Modi’s consistent emphasis on engaging with young people and understanding their aspirations.

He said the Prime Minister had repeatedly used social media and direct interactions to remain con-

Attempt to murder case against ex-OSD to Konda Surekha

HYDERABAD: An attempt to murder case has been registered against former OSD to Minister for Environment and Forests Konda Surekha following a complaint by a 36-year-old real estate businessman, Gongidi Harikrishna, who alleged that he was assaulted with iron rods and sticks by a group in Hyderabad.

Medipally police initially registered a Zero FIR and later transferred the case to Jubilee Hills Police Station as the incident falls under its jurisdiction. Based on Harikrishna’s complaint, police registered a case against Sumanth and five others. According to the complaint, Harikrishna received a call from Sumanth on July 30 asking him to meet him urgently. Harikrishna reportedly told him that he had returned to his native place and would meet him the following morning.

Later, Sumanth’s friend Ramu allegedly called Harikrishna and asked him to come to his office. On August 20, Harikrishna went to Ramu’s office along with his friend Kiran, where Sumanth and Ramu were present.

Harikrishna alleged that Sumanth questioned him for allegedly using his name to collect money from people. Though he denied being involved in any such collections, Sumanth allegedly abused him and attacked his hands and legs with an iron rod.

He further alleged that five others accompanying Sumanth also assaulted him. The complainant identified the alleged associates as Prashanth, Arun Kumar Reddy, Karthik and Mahender Reddy, among others, and claimed that they attacked him at Sumanth’s instigation. After receiving the complaint, Medipally police regis-

tered a Zero FIR and subsequently transferred the case to Jubilee Hills Police Station for further investigation.

HC seeks JNTUH stand on grace marks for R22 students

HANS NEWS SERVICE
HYDERABAD

THE first hearing in the High Court was held on Thursday for the petition filed by the Students Protection Forum (SPF) seeking the grant of grace marks to R22 regulation students.

A single-judge bench headed by Justice Juvvadi Sridevi heard the petition, and the SPF advocate, Anil Raj, presented arguments on behalf of the students.

The SPF presented the problems faced by R22 students, the need for grace marks, and their impact on students' educational and employment opportunities to the court.

After hearing the arguments, the court directed JNTUH to submit its instructions on the provisions related to the R22 regulation, details on grace marks, and the university's stand. The

next hearing was adjourned to August 25.

On the occasion, SPF State President Rahul Nayak said, “The future of thousands of R22 students is linked to this issue. Many students are facing difficulties because they cannot complete their degrees due to a small difference in marks. Despite receiving job offers, some have not completed their degrees and have had their joining delayed, while others have also lost job opportunities. That is why we request the university to take a positive decision keeping in mind the future of the students,” said Rahul Nayak.

SPF advocate Anil Raj said, “We have brought the necessary issues to the court’s attention on behalf of the R22 students. The court, after hearing the arguments, ordered the university to submit details related to the R22 regulation and grace marks.

BJP sounds protest bugle over fee reimbursement

Charges the Congress Youth Declaration released by Cong MP Rahul Gandhi has gone with the wind

HANS NEWS SERVICE
HYDERABAD

BJP state unit president N Ramchander Rao on Thursday warned the Telangana government that the party would intensify its agitation in support of students until pending fee-reimbursement dues and scholarships were released.

Addressing the "Fee Bakayi—BJP Ladayi" Maha Dharna organised by the

Bharatiya Janata Yuva Morcha (BJYM) in Karimnagar, Rao accused the Congress government of failing to fulfil its promises to students and alleged that the delay in releasing funds was pushing students, parents and educational institutions into severe financial distress.

Rao alleged that around Rs 8,000 crore in fee-reimbursement dues were pending from the previous government and criticised the

Congress government for failing to clear them after coming to power. He claimed that the State Cabinet had decided to release Rs 2,000 crore as an advance following the High Court's intervention, but alleged that the amount had not yet been released.

He said nearly 20 lakh students across Telangana were awaiting fee-reimbursement clearances. The delay, he alleged, had left college managements struggling to pay faculty salaries and threatened the functioning of educational institutions.

Rao accused the Congress of failing to honour the promises made under the 'Youth Declaration' and warned that the BJP would continue its agitation until the government addressed the issue. "If this government plays with

the lives of students without releasing fee reimbursement and scholarships, the BJP will intensify its agitation," he said.

BJYM State president Ganesh Kunde said the youth wing had been campaigning for the past month over students' issues. He criticised police notices allegedly issued to students and college managements and warned of intensified protests, including collectorate sieges, if the dues were not released.

He demanded immediate clearance of fee reimbursement and scholarships and said Chief Minister A Revanth Reddy should resign if the government failed to address students' concerns. Thousands of students and youth participated in the protest.

BJP state unit president N Ramchander Rao addressing the Maha Dharna organised by the Bharatiya Janata Yuva Morcha in Karimnagar on Thursday

Laxman bats for central law to protect breastfeeding mothers and infants

HANS NEWS SERVICE
NEW DELHI

RAJYA Sabha MP Dr K Laxman on Thursday submitted a representation to the National Commission for Women (NCW) seeking a comprehensive law for safeguarding the rights of breastfeeding mothers and infants.

In his representation to the commission, the MP highlighted that several laws and schemes in the country mandate the provision of crèche facilities at workplaces. However, there is no uniform law that guarantees the right of mothers to breastfeed their infants with privacy and dignity in public places.

This situation underscores the urgent need to establish feeding rooms, child-care rooms, and human milk banks in public institutions across the country.

Though there are several advisories, he said that most of those initiatives are scattered. A fragmented legal framework could not be enforced, leading to “mothers travelling to access railway stations, airports, metro stations, bus terminals, courts, universities, government offices, parks and other public places have been facing difficulties,” he added.

Dr Laxman, in his representation, urged the NCW to recommend to the Centre a comprehensive enactment of the "Mother and Child Care (Public Facilities, Breastfeeding Support and Human Milk Bank) Act.

This would help enforce rights by providing necessary infrastructure, he said. Also, added rising the issue during the zero hour, as there is a pressing need for such an act in the country.

Jana Sena MP's son booked in Madhapur road mishap

HANS NEWS SERVICE
HYDERABAD

MADHAPUR police booked Sanjush Lingamaneni, son of Andhra Pradesh Jana Sena Rajya Sabha MP Lingamaneni Ramesh, for alleged rash and

Ashok had gone towards the nearby ITC Kohenur area for lunch. While returning to their workplace, Bharathi attempted to cross the road in front of the mall when she was allegedly hit by the Aston Martin driven by Sanjush.

Police said the car was allegedly being driven at high speed and in a rash and negligent manner. Bharathi suffered severe head injuries and sustained heavy bleeding. She was rushed to a hospital, where doctors declared her dead.

The case was registered based on a complaint lodged by Panjala Ashwin Kumar, the deceased woman's store manager. Police said further investigation was underway to establish the exact circumstances leading to the accident.

Traffic police crackdown on fake number plates

HYDERABAD: The Hyderabad Traffic Police has intensified enforcement against vehicles using fake, tampered or unauthorised registration number plates following a surge in complaints.

Police registered six criminal cases over the past week against individuals allegedly using fraudulent registration plates to conceal vehicle identities, evade traffic enforcement and violate regulations. Several vehicles were identified and seized during the enforcement drive. The cases were registered at Hadnoor police station in Sangareddy district, Kalapathar, Afzalgunj, Intheezargunj in Warangal district, Kamareddy Town and Musheerabad. The Traffic Police said only government-approved High-Security Registration Plates (HSRPs) are legally permitted on vehicles. Any unauthorised alteration, missing digits, obscured characters or use of temporary stickers in place of registration plates is illegal. Officials warned that the use of fake or manipulated number plates could result in criminal prosecution and immediate seizure of the vehicle.

GOVERNMENT OF TELANGANA

REVENUE DEPARTMENT

FORM-VI

(See Sub-rule(1) of rule-19) and Section – 11(1) of the Act-30(2013)

Collr.Office File No. 6/1427/2026

Date: 17.08.2026

RDO, Office File No. 8/2877/2026

Date: 13.08.2026

Gazette No. VKB-117/2026

Date: 17.08.2026

Whereas it appears to the Government of Telangana/Collector that a total of **Ac. 36.30 gts.**, land is required in the Eerlappally Village & Doulthabad Mandal, Vikarabad District for public purpose, namely, Acquisition of land for **Eerlappally Left Main Canal under Makthal-Narayanpet-Kodagall Lift Irrigation Scheme Project.**

The Government of Telangana Irrigation & CAD Department has issued G.O.Ms.No.3, dated: 12.02.2025 and published in State Gazette vide No. 43, dated: 24.02.2025 for exempting the "Narayanpet-Kodagall Lift Irrigation Scheme" exercise of the powers conferred by Section 10A (b)in Chapter IIIA of the RFCTLA&RR (Telangana Amendment) Act, 2016 (Act No.21 of 2017) from the application of the provisions of Chapter II & III of the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement, Act 2013. Therefore, all the activities under chapter II&III of the said Act has not been carried out.

Vide proceedings No.6/1427/2026, dated: 06.07.2026 the Additional Collector (Revenue), Vikarabad is appointed as Project Administrator for the purpose of Rehabilitation and Resettlement of the Affected Families and the Revenue Divisional Officer, Tandur Division is appointed as Land Acquisition Officer.

Therefore, it is notified that for the above said project in the **Eerlappally Village of Doulthabad Mandal, Vikarabad District**, a piece of land measuring, more or less **Ac. 36.30 gts viz, 14.872** hectares standard measurement, whose detail description is as following, under acquisition:

Village: Eerlappally Mandal: Doulthabad Dist.: Vikarabad

Tech should empower retail investors to avoid risks

TECHNOLOGY has brought in a paradigm shift in the investors' behaviour in recent years. India has seen a surge in number of participants investing in equities. As per latest available data, the country has more than 21 crore demat accounts by the end of December, 2025. Though multiple demat accounts are being held by individual investor, still the number is higher as compared to a decade back. And such surge in demat account has been possible due to faster and easier demat account opening process.

The whole process has now been undertaken through technology-powered solutions. From eKYC to digital onboarding, now a person can complete the whole process without a physical visit to any financial institution. In addition, fintech startups like Zerodha and Groww have made stock investment extremely easier. The advent of discount brokerage firms has literally moved stock investment into the palms of investors.

Now, crores of investors invest in equities through the mobile apps of brokerage firms. While technology has created a culture of equity investing, it has also prompted lakhs of retail investors to do risky trading. A cursory look at these statistics will make this amply clear. In last financial year (FY26), losses incurred by retail investors in India's equity derivatives market stood at Rs 91,685 crore (around \$9.61 billion). Though it was a decline of around 18 per cent year-on-year basis, close to \$10 billion loss is not a small amount in any measure. These losses could have been

gainfully employed elsewhere by retail investors, which would have helped country's economic growth. In earlier years, losses were higher as compared to FY26.

After the market regulator, Sebi introduced various new norms, discouraging retail investors to trade in future & options (F&O), losses have declined in FY26. And technology-powered trading apps is one of the major factors behind such surge in derivative trading by retail investors.

In future and options trading, which is considered as one of the risky trading instruments in the equities; retail investors are competing against large institutional investors like big banks, NBFCs, pension funds and others. These institutional investors not only have better information sources,

but also are powered by cutting-edge technology tools. For instance, algo trading is a widely known practice by institutional investors, where the computer programme automates the trade based on the parameters given. Here, trades are executed in fraction of seconds. Compare this with the kind of trading undertaken by retail investors. This puts retail investors at a distinct disadvantage. With the increasing adoption of artificial intelligence (AI), the speed and accuracy of trades undertaken by institutional investors have increased manifold. So, though technology-powered brokerage firms' apps enable a retail trader to execute a trade, it can't possibly match with an AI-powered platform used by a big investor. Moreover, AI has increased the chances of market

'Blanket clemency' for CJP

THIS is further to your editorial 'Govt should pronto drop cases against Jantar Mantar protestors'. There are no two views about genuine student protesters at Jantar Mantar who were involved in violent rioting with the police be granted one time pardon, and the police cases against them be quashed. But, there must be genuine remorse on their part, not to repeat the act in future protests, hoping for a similar reprieve. The CJP agitation, if enacted solely on the strength of students, without any out side anti-social elements being part of it would have been a success; in which the general public too would have extended their spontaneous support. But, needless shortcut methods were adopted involving ruffians with criminal elements to be part of the movement in order to intimidate the police. The acts of such characters were amply evident on the ground when the policemen were attacked and the vehicles vandalised. The blanket clemency on accused in the Jantar Mantar incident will further embolden the students who are on a warpath. The government must be tough on those elements involved in the crime; but be considerate of students, whose careers are at stake if a police complaint is filed against them.

S Lakshmi, Hyderabad

RSS members in NCERT panel

WHILE the din over irregularities in the conduct of national examinations, particularly NEET by the National Testing Agency (NTA), and the student protests that followed may be dying down, another matter of serious concern has emerged. It is reported that the NCERT has reconstituted the Textbook Development Team for Classes 11 and 12 Political Science, with at least four members having direct or indirect links with the Rashtriya Swayamsevak Sangh (RSS). There have long been allegations that some CBSE textbooks reflect RSS ideology, distort history, and glorify Hindutva figures who had little or no role in India's Freedom struggle. The new panel is reportedly tasked with reviewing textbooks and integrating themes such as cultural rootedness and Indian Knowledge Systems. Given the availability of eminent scholars and academics in education and political science, why were individuals reportedly associated with the RSS chosen for such an important task? One cannot help wondering whether this is part of a deliberate attempt to reshape the political narrative presented to future generations.

Tharcius S Fernando, Chennai

TN CM should act fast on DMK 'misrule'

THE Tamil Nadu Chief Minister C Joseph Vijay said he had evidence of corruption in the previous DMK Government, and would reveal it when necessary. The people of State have every right to clear the cloud by the CM since the matter is concerning much and involves public money. The Chief Minister has sworn an oath to faithfully and conscientiously discharge his duties and to do right to all people in accordance with the Constitution and the law, without fear or favour. If he possesses credible evidence of corruption committed under the previous government, does that constitutional oath permit him to simply keep the evidence "on his table" and wait indefinitely for a politically convenient time? The oath may not require him to disclose every piece of evidence publicly before due process. But it surely requires him to act upon credible evidence through the lawful constitutional and investigative mechanisms available to the State. Otherwise, allegations of corruption risk being reduced to political rhetoric while potential offences involving public money remain uninvestigated. If the evidence exists, let the appropriate authority investigate it, let those responsible answer it, and let the law take its course.

A P Thiruvadi, Chennai

T N largesse could be contagious

PROPOS, "A car, driver and Rs 1L allowance: TN MLAs' windfall from CM Vijay," (THI, Aug 20). The reported decision of the Vijay-led TVK government to provide cars, ₹75,000 monthly allowance to each of Tamil Nadu's 234 MLAs, and another ₹25,000 for an assistant deserves strong public criticism. Such a generous package raises serious questions about priorities and financial responsibility. At a time when citizens demand better roads, healthcare, education, jobs and basic services, public money should not be spent on expanding political privileges. Elected representatives enter public life to serve people, not to treat politics as a source of comfort and personal benefits. Moreover, such concessions could set a dangerous precedent, with legislators in other States demanding similar facilities. Governments must promote austerity, accountability and responsible spending.

Viral video puts woman police officer in spotlight

BENGALURU: A video allegedly showing a woman police officer engaging in an inappropriate conversation with a jailed inmate through a WhatsApp video call has gone viral on social media, triggering controversy within the police department. The officer featured in the video has now approached the Cubbon Park police, alleging that the footage was recorded and circulated without her consent.

According to the complaint, the officer had been acquainted with a rowdy-sheeter identified as Dharma several years ago. She allegedly spoke to him through a video call, during which he recorded the conversation. The officer has alleged that Dharma subsequently shared the recording with another rowdy-sheeter, Saikumar, who circulated it on social media.

The officer has sought action against Dharma, Saikumar and others allegedly involved in making the video public. She has claimed that the circulation of the footage has damaged her reputation and caused considerable embarrassment. In her complaint, the officer stated that she was working as an officer in charge of security at a Metro station. She also referred to her family and social standing while seeking legal action against those responsible for circulating the video.

Mitigating adverse impacts of Artificial Intelligence

DR P SUBRAMANYACHARY

THE AI for Good Global Commission is a high-level international commission established with the support of the International Telecommunication Union (ITU), a specialized agency of the United Nations. It was officially launched during the AI for Good event held in July 2026. The Commission comprises 44 founding commissioners and members, including heads of state, chief executive officers (CEOs) of leading global companies, technology experts, and representatives of international organizations.

The Commission is co-chaired by Paul Kagame, President of Rwanda, and Marc Benioff, Chairman and CEO of Salesforce. Doreen Bogdan-Martin, Secretary-General of the International Telecommunication Union (ITU), serves as the Vice-Chair. From India, Mukesh Ambani, Sunil Bharti Mittal, and Lakshmi N. Mittal have been appointed as founding members of the Commission.

The inaugural meeting of the AI for Good Global Commission was held on July 8 in Geneva, Switzerland. Although the Commission's first meeting took place on that day, it formed part of the broader AI for Good Global Summit 2026, which was held from July 7-10. The four-day summit featured more than 300 sessions, including conferences, exhibitions, training workshops, demonstrations, and high-level discussions.

The deliberations focused primarily on AI governance, technological innovation, and

the role of artificial intelligence in achieving sustainable development, along with strategies to maximize AI's benefits while mitigating its potential risks and adverse impacts.

More than 40 founding commissioners participated in the inaugural meeting of the AI for Good Global Commission. During the meeting, the Commission adopted several key resolutions. Among the most significant were strengthening trustworthy and ethical AI governance and expanding global access to artificial intelligence, with particular emphasis on the needs of developing countries. The Commission also resolved to promote international collaboration among governments, industries, academic and research institutions, civil society organizations, and international organizations.

It emphasized the effective use of AI to help achieve the United Nations Sustainable Development Goals (SDGs) in critical sectors such as healthcare, education, climate change, and agriculture. Another key priority identified by the Commission was reducing the digital divide by investing in digital infrastructure, skill development, and capacity building.

In addition, the Commission reaffirmed that the development of human-centric artificial intelligence that safeguards human rights, promotes inclusiveness, and enhances public welfare is of paramount importance. It further emphasized that its primary objective is to ensure that the benefits of AI are shared equitably by all countries and all sections of society. However, the AI for Good Global Commission is not a regulatory body. Rather, it serves primarily as an advisory and coordinating platform. Consequently, for its recommendations to have a meaningful and lasting impact, they must be adopted and implemented by national governments and other relevant institutions around the world.

The Commission reaffirmed that the development of human-centric artificial intelligence that safeguards human rights, promotes inclusiveness, and enhances public welfare is of paramount importance. It further emphasized that its primary objective is to ensure that the benefits of AI are shared equitably by all countries and all sections of society

AI: Impact on employment and sustainable development

Artificial Intelligence (AI) is bringing about significant transformations in the global economy. Its impact is particularly evident in the areas of employment and sustainable development. According to the Future of Jobs Report 2025 published by the World Economic Forum (WEF), AI and other emerging technologies are expected to create approximately 170 million new jobs worldwide by 2030.

At the same time, around 92 million jobs are projected to disappear, leading to major changes in the global labour market. Routine and repetitive tasks in sectors such as manufacturing, customer service, administration, and data processing are particularly vulnerable to auto-

mation. As a result, millions of workers will need to undergo re-skilling and upskilling to adapt to the changing nature of work. According to estimates by the International Labour Organization (ILO), nearly one-quarter (25%) of global employment is likely to be affected by generative AI.

Clerical and administrative occupations, in particular, are expected to experience the greatest impact due to the increasing automation of routine office tasks. If the benefits of AI are concentrated primarily among highly skilled workers and technology-driven enterprises, there is a significant risk that income inequality will widen further.

Therefore, governments, industries, and educational institutions must work together to ensure that the gains from AI are distributed more equitably through inclusive policies, workforce development, and access to digital skills.

From the perspective of sustainable development, AI systems require large-scale data centres that consume substantial amounts of electricity and water for their operation and maintenance. If these facilities are not powered by renewable or clean energy sources, they can place additional pressure on the environment and contribute to higher carbon emissions.

Developing countries may also face significant challenges due to limited digital infrastructure and a shortage of AI-related skills, increasing the risk of falling behind in the global digital economy. This could further widen the technological and digital divide between developed and developing nations. At the same time, the responsible and ethical use of AI offers immense opportunities.

AI can improve energy efficiency, enable more accurate climate change forecasting, enhance the accessibility and quality of healthcare services, and increase agricultural productiv-

ity through precision farming and data-driven decision-making.

Therefore, it is essential to implement effective AI governance, strengthen quality education, promote skill development, and invest in reskilling and upskilling initiatives. These measures are crucial to ensuring that the benefits of AI are inclusive, sustainable, and contribute positively to long-term economic and social development.

Significance of AI for Good Global Commission for India

The AI for Good Global Commission is of great significance to India. It supports the development of responsible and ethical artificial intelligence, promotes digital inclusion, and helps the country effectively address the economic and social challenges arising from the rapid adoption of AI.

India's AI ecosystem is expanding rapidly. Recognizing its strategic importance, the Government of India approved the IndiaAI Mission in 2024 with a budget of ₹10,371.92 crore. The mission aims to strengthen AI infrastructure, skill development, innovation, and research, thereby positioning India as a global leader in artificial intelligence. AI has the potential to deliver substantial benefits across several key sectors in India, including healthcare, agriculture, education, disaster management, and public service delivery.

In particular, the Commission can support India by: Promoting ethical and trustworthy AI standards, strengthening international cooperation on AI governance and innovation, enhancing cybersecurity and digital resilience and facilitating access to global best practices in AI development and regulation.

Furthermore, the Commission can help developing countries, including India, bridge the digital divide by encouraging equitable access

to AI technologies and digital infrastructure. It also promotes the extension of AI's benefits to rural areas and socially disadvantaged communities, ensuring that technological progress is more inclusive.

In addition, the Commission can play a crucial role in helping India mitigate the potential adverse impacts of AI on employment, society, and the environment through responsible AI governance, capacity building, and sustainable policy frameworks. This will enable India to harness the transformative potential of AI while ensuring that its benefits are shared broadly across all sections of society.

To achieve its objectives, the AI for Good Global Commission promotes global collaboration among governments, technology companies, researchers, and civil society organizations. By fostering cooperation among these key stakeholders, the Commission seeks to ensure that artificial intelligence is developed and deployed in a responsible, inclusive, and sustainable manner.

The Commission also plays a vital role in maximizing the benefits of AI for individuals and societies worldwide while minimizing its potential risks and adverse impacts. It aims to encourage the adoption of ethical AI practices, strengthen international coordination, and support policies that ensure AI serves the broader public interest. If governments, industry, academia, and civil society work together to implement the Commission's recommendations, the AI for Good Global Commission can make a significant contribution to building a safer, more equitable, and AI-driven global economy that promotes sustainable development and shared prosperity for all.

Why Lenin still remains relevant in modern times

ANJANI KUMAR

WHEN a special show was organised for screening of the new super hit movie of Akkineni Akhil – Lenin - at a private theatre, there was much excitement in the air. A select few were invited to watch the movie. It was an elite gathering of Hyderabad. The Akkinenis played a perfect host.

As the movie started, it was clear that the genes of the legendary Nageswara Rao and the ever-green Nagarajuna was speaking loudly in the outstanding performance of this young hero. The maturity of Akhil's acting skill and his successful effort to live in the role of a rural young man was

appreciated by all. Akhil has graduated from a hero to a fine artist now.

As violence depicted the prevailing mood of the Indian filmdom, earlier epitomised by Dhurandhar, one wonders if cinema represents the thought process of the contemporary society. If it does, then we need to do introspection about our society. The chat with Amla on the subject of violence in society and its impact on movies was interesting. Bhagyashri and Akhil together sparked a good on screen chemistry.

As we watched the movie, something which struck me was the title of the movie – Lenin. Man searches deep meaning in everything. During the interval while conversing with Akhil and Amla (whom age refuses to touch) the title Lenin was discussed. This part of the country has fascination with this name as there are many Lenin Babus here.

It was understandable in the decades of our independence and thereafter, when young

So far as the inequality in any society looms large, so far as few control the vast wealth of the nation depriving the majority to struggle for daily bread and butter, Lenin would remain relevant

boys were named after global leaders like Gandhi, Lenin, Stalin, Bose, Nehru, Patel, and other icons of those periods. But now in the third decade of the 21st century choosing Lenin as title of a movie has perhaps a special significance.

When the name Lenin appeals to us even after 100 years of Vladimir Lenin's death, it conveys many meanings. The irony of history is that Lenin and Mahatma Gandhi were contemporaries. Lenin brought the Bolshevik revolution in 1917, and Gandhi came to India from South Africa in 1915 after spending 21 years there. Both giants in their own way in liberating their respective countries from the then existing decadent systems.

Russia under the Tsar had

stagnated as a country and as a civilization. India under the British exploitative rule had transformed itself from being the richest country in the world to one of the poorest country in just 200 years. Inequality was the hallmark of both the countries when Lenin and Gandhi took the reins of leadership.

The closest Gandhi came to Russia was through Leo Tolstoy in whose name he had developed a farm in South Africa. Tolstoy's quote: "There is only one thing in this world which is worth dedicating all your life is creating more love and breaking barriers between people" impacted Gandhi all throughout.

Lenin and Gandhi with their diametrically opposite pathways of Ahimsa versus

the Communist violent revolution, brought an end to an exploitative system. India and Russia threw away their respective existing yokes. The Tsarist Russia and the British India primarily represented an unequal society where the few were exploiting the toiling masses. Lenin like Gandhi had kindled a ray of hope with an underlining principle of equality.

When Lenin carried forward the slogan "workers of the world, unite", it was a global message for unity and struggle against oppression and inequality. Has this slogan lost its relevance now? The Gen Z have to find an answer to this.

While Gandhi remains father of our nation, Russia threw away the communist path in the early 1990s. Gandhi too is facing difficulties as many scholars of WhatsApp University find it fashionable to criticise the Mahatma before whom the world leaders still bow with utmost reverence. India still has to discover a better export than Gandhi.

The misdeeds and purges

HC flags “serious” error in State’s affidavit on ‘Kalyana Lakshmi’ scheme

LEGAL CORRESPONDENT
HYDERABAD

THE Telangana High Court on Thursday questioned the legal basis and constitutional framework under which the State government introduced the ‘Kalyana Lakshmi’ and ‘Shadi Mubarak’ welfare schemes, which provide financial assistance for marriage to eligible beneficiaries.

Justice Natcharaju Venkata Shravan Kumar heard a writ filed by advocate Vijay Gopal, (appearing in person). The petitioner has challenged the GOs through which the two schemes were introduced and revised from 2014 onwards. He contends that framing welfare schemes and fixing eligibility criteria are essentially legislative functions and that the schemes, introduced through

executive orders, are arbitrary and contrary to Articles 14 and 15 of the Constitution. The petition challenges eight GOs issued between September 2014 and June 2019 by the Scheduled Castes Development, Minorities Welfare and Backward Classes Welfare departments.

During the hearing, Additional Advocate-General Mohammed Imran Khan appeared for the government. The bench questioned the State on various aspects of the implementation of welfare schemes and the financial obligations arising from them. The court also examined an affidavit filed by the State in response to the petition. The bench took serious exception to the manner in which Article 162 had been reproduced in the affidavit. The court observed that the provision had not been reproduced correctly and ques-

tioned how an incorrect version could form part of an affidavit filed on behalf of the government. Khan acknowledged the error and described it as a typographical mistake. He assured the court that the error would be corrected and a fresh affidavit filed.

The bench, however, said the mistake was a serious one and indicated that the issue could not be considered further on the basis of an affidavit containing such a material error. The court questioned whether the officer who had sworn the affidavit was properly authorised to file it on behalf of all respondents.

The State submitted that the GOs were issued in exercise of the executive power of the State under Article 162 and were intended to implement welfare measures aimed at achieving

the constitutional goal of social justice. The court made it clear that it was not seeking to dictate how the government should manage its finances. The concern, it said, was with the legal and constitutional basis of the schemes and the manner public funds were being allocated.

The bench directed the Finance department to file an affidavit setting out the State’s financial position and explaining whether any loans had been raised for continuing the welfare schemes. The court also sought details of the State’s total debt, observing that the information would be relevant to the issues before it. The court referred to the provisions relating to fiscal responsibility and questioned whether borrowing could be resorted to for meeting expenditure on such schemes.

During the hearing, the

bench expressed concern over delays in the payment of various welfare and statutory benefits. The discussion included pending payments to land losers, beneficiaries of welfare measures, retired employees and even government staff.

The court observed that when matters involving non-payment of statutory or welfare benefits come before it, it has to consider the competing claims and ensure a balance, while leaving financial policy decisions to the Government.

At one stage, the bench cautioned the parties against turning court proceedings into a platform for political arguments. The court said political statements and allegations should not be made in open court and stressed that the dignity and sanctity of judicial proceedings must be maintained.

Army Public School wins the Hyd Edition of TCS InQuizitive 2026

HANS NEWS SERVICE
HYDERABAD

KALEPU Yashvardhan and Anirudh Rengarajan from Army Public School, Bolarum, emerged as winners of the Hyderabad edition of TCS InQuizitive 2026, organised by the IT giant’s flagship inter-school quiz programme. The programme was meant to foster innovation and talent, and the two students have secured their place in the national semi-finals.

The Hyderabad edition witnessed participation from 249 teams representing 28 schools. The event was graced by V Rajanna, President – Communications, Media, Technology, and Services, TCS and Challa Nag, Delivery Centre Head, TCS Hyderabad.

This year’s TCS InQuizitive introduced real-time AI-powered analytics, so partici-

pants could see detailed performance insights after each round and quickly identify areas for improvement.

Congratulating the participants and winners, V Rajanna, President – Communications, Media, Technology, and Services, TCS said, “TCS InQuizitive has, over the past 28 years, evolved into a platform that young learners aspire to be part of, enabling them to test their knowledge, broaden their curiosity, and experience the joy of learning beyond the classroom. The students showcased exceptional talent and demonstrated strong preparation, teamwork, and the ability to think quickly under pressure”

Challa Nag, Delivery Centre Head of TCS Hyderabad, said, “Hyderabad has earned a reputation as one of India’s leading hubs for technology, innovation, and talent, making it a fitting host for a competition that celebrates knowledge. The enthusiasm and confidence displayed by this year’s participants were truly inspiring, and it is heartening to see such young learners have a passion for continuous learning. We congratulate all the teams for their remarkable efforts and appreciate the schools, management, teachers, students, and parents in this region for their support and participation.”

Open to students in Grades 8 -12, TCS InQuizitive combines learning and excitement with a dynamic format across a wide range of subjects, including education, entertainment, sports, business trends, advertising, and social media. With a stronger emphasis on STEM, the quiz also highlighted domains such as artificial intelligence, cloud computing, automation, biometrics, and robotics.

Settle bifurcation issues faster, TG urges Centre

Continued from P1

He pointed out that 12 years after the Andhra Pradesh Reorganisation Act, 2014 took effect, several issues between the two Telugu states remain unresolved and appealed to Amit Shah to find a solution amicably. Andhra Pradesh has sought division of assets of certain Schedule X institutions. Telangana has maintained that such claims are not supported by the AP Reorganisation Act, except for continuation of facilities under Section 75. The matter was also pending before the High Court of Andhra Pradesh, Bhatti said. Telangana is seeking resolution through the legal process.

Referring to the Krishna

water dispute, the Deputy CM said that Telangana was seeking no special privilege in respect of Krishna waters and the state wanted its fair entitlement through legal mechanisms. Since the allocation of Krishna waters between Telangana and Andhra Pradesh was already under consideration before KWDI-II, the state government was stressing that the matter should be dealt with through the established legal and adjudicatory process, he said. Bhatti explained the importance of lift irrigation projects and sought central financial support for the Kaleshwaram and Palamuru-Rangareddy Lift Irrigation Schemes. Rehabilitation

of Kaleshwaram, revival of the Pranahita-Chevella project at Tummidihetti, and special aid for the Palamuru-Rangareddy Lift scheme was mentioned in the meeting.

The Deputy CM highlighted that Telangana had adopted an approach of seeking fair, time-bound, and legally sustainable resolution of inter-state issues. He emphasised that cooperation among the southern states will become even more important in the coming years. Bhatti identified the following as challenges that increasingly transcend state boundaries: water security, energy, climate resilience, urbanization, logistics, and economic competitiveness.

HC hears plea challenging Speaker’s rejection of Danam’s disqualification petition

LEGAL CORRESPONDENT

HYDERABAD: The Telangana High Court on Thursday continued hearing a batch of petitions challenging the Assembly Speaker’s decision rejecting disqualification petitions against 10 BRS MLAs who allegedly joined the Congress without resigning from the pink party.

The division bench comprising Chief Justice Aparesh Kumar Singh and Justice Ghouse Meera Mohiuddin heard the petition filed by BJP MLA Alleti Maheshwar Reddy, who challenged the Speaker’s March 11, 2026 order in the disqualification proceedings concerning Nagender.

The petitioner sought a declaration that Nagender stood disqualified under para-

graph 2(1)(a) of the Tenth Schedule from April 23, 2024, the date on which he filed nomination affidavit for the 2024 Lok Sabha elections. He sought consequential directions, including recovery of benefits allegedly received by Nagender as an MLA from that date. Senior counsel A Venkatesh, appearing for Nagender, opposed the plea and argued that the disqualification petition itself was not maintainable as it failed to comply with the mandatory requirements of the Telangana Legislative Assembly Members’ Disqualification Rules. Referring to Rule 6, he submitted that a disqualification petition could be made to the Speaker only by a member of the House. He pointed out that the rules require the petition and its annexures to be properly signed and verified.

The Shah favours early resolution of water-related issues thru talks

Continued from P1

Chairing the 31st meeting of the Southern Zonal Council at Mahabalipuram, Shah stressed the need for early resolution of pending water-related issues concerning southern states through mutual dialogues and joint meetings involving the Union Ministries of Jal Shakti, Home Affairs, the Inter-State Council, and the respective states.

The southern states agreed with the Home Minister’s suggestion to resolve these pending water disputes expeditiously through mutual dialogue and constructive solutions. Shah said that since 2014, efforts have been made to transform the Zonal Council into a meaningful platform.

Regarding the issues concerning the division of assets and liabilities between Andhra Pradesh and Telangana, both states agreed to resolve these matters in consultation with the Ministry of Home Affairs, Shah said in his address at the meeting.

Tamil Nadu Chief Minister C Joseph Vijay, who serves as the council’s vice-chairman, personally welcomed Shah upon his arrival. The two leaders also held a brief interaction before the meeting began. During the proceedings, Vijay was seated alongside Karnataka Chief Minister DK Shivakumar. Representatives from Tamil Nadu, Andhra Pradesh, Karnataka, Kerala and Telangana took part in the meeting.

SC sets up 5-member panel to probe police ‘excesses’ at CJP stir

Continued from P1

Other members of the committee include former Punjab and Haryana High Court Chief Justice Ravi Shankar Jha, former Delhi High Court judge Justice Shalinder Kaur, former CBI Director Rishi Kumar Shukla and retired Meghalaya Director General of Police Dr LR Bishnoi.

The committee will examine allegations of excessive use of pellet guns, electric batons, lathi charges and tear gas, along with alleged violence against women protesters. It will also look into police surveillance, the proportionality of crowd-control measures, and the provision of medical assistance and

compensation to victims. The committee will also consider allegations by authorities of violence against police personnel and damage to public property.

This comes as the apex court is hearing a batch of petitions alleging excessive police action against students who participated in protests at Jantar Mantar and other locations across the country over alleged NEET examina-

tion paper leaks and broader concerns relating to the examination system.

The proceedings come against the backdrop of weeks of student demonstrations led by the Cockroach Janata Party (CJP) at Jantar Mantar, including a hunger strike and a subsequent march towards Parliament.

On July 20, thousands of students participated in a Parliament march organ-

ised by the CJP, demanding, among other things, the resignation of Union education minister Dharmendra Pradhan over alleged examination paper leaks and seeking wider reforms in the examination system.

As demonstrators attempted to move towards Parliament and breach police barricades in central Delhi, security personnel used tear gas and lathi-charge to dis-

perse the protesters. Several videos subsequently circulated on social media, purportedly showing protesters being manhandled by police personnel, leading to allegations of excessive use of force.

The Delhi Police, however, defended its action and maintained that force was used only after sections of the protesting crowd allegedly turned violent and engaged in stone-pelting.

South CMs raise delimitation, water disputes at SZC meet

Continued from P1

Delimitation, an issue on which most southern states are on the same page, prominently figured in the meeting, with Karnataka and Tamil Nadu stressing that status quo of 543 Lok Sabha seats be maintained for another 25 years.

With his state locked in a dispute with Tamil Nadu over the Mekedatu dam proposal, Karnataka Chief Minister DK Shivakumar told TN that its interests would be protected if the reservoir is constructed. Shivakumar also urged the Southern Zonal Council to adopt a resolution asking the Union government to honour the 1971 census for delimitation, retain 543 Lok Sabha seats

for 25 years and fit women’s reservation within the existing seats.

Tamil Nadu CM Vijay conveyed to the Union Home Minister that the existing freeze capping Lok Sabha seats at 543 nationally and 39 in the state should continue, state minister R Nirmal Kumar said.

Both Andhra Pradesh and Telangana agreed to resolve matters related to the division of assets and liabilities in consultation with the Union Ministry of Home Affairs.

Keralam CM Satheesan raised the Mullaperiyar dam issue at the meeting and stressed the need for cooperative federalism in healthcare, infrastructure,

environmental protection and regional security. The Mullaperiyar dam issue was among the key state concerns raised by the CM at the meeting, according to a post on ‘X’.

Satheesan said Keralam was willing to provide Tamil Nadu with its full share of water from a new Mullaperiyar dam. Tamil Nadu would manage the design, location and construction of the new dam, while Keralam would bear the entire cost.

Telangana Deputy CM Vikramarka sought protection of the state’s rights in Krishna river waters and Central support for major irrigation projects. Puducherry was represented by Lt Governor K Kailashnathan.

J'khand HC stays Soren govt order to cancel JPSC exams

Continued from P1

Meanwhile, the government’s decision triggered a separate protest by candidates who had cleared the JSSC-CGL examination and were appointed to government posts. They have opposed the cancellation, arguing that successful candidates should not be punished for alleged irregularities unless wrongdoing is established against them.

Telangana to host next SZC meeting

HYDERABAD: The next meeting of the Southern Zonal Council (SZC) will be held in Telangana. SZC chairman and Union Home Minister Amit Shah accepted the request made by Deputy Chief Minister Mallu Bhatti Vikramarka at the Council’s meeting held in Mahabalipuram on Thursday.

The standing committee of the SZC, comprising five southern States and Union Territory of Puducherry, would meet soon to prepare action taken reports on the issues discussed on Thursday and finalise the agenda for the next meeting that is likely to include the items carried over from Thursday’s meeting.

Centre limits SIM cards to 9 per person

Continued from P1

The DoT has also put in place a mechanism to help telecom operators identify such subscribers. From August 23, a representative image of the photo of each subscriber who has already reached the prescribed limit for mobile connections in their name will be made available on the DIP.

The DIP uses subscriber information submitted by telecom operators. The latest directive requires operators to use the platform to help identify people who have already reached the permitted limit.

The DoT has asked telecom operators to streamline the process with the Digital Intelligence Platform before November 30. “Till the time

such measures are implemented by a TSP on a post-facto basis, as per terms and conditions of the Customer Application Form (CAF), any mobile connection activated beyond the prescribed limit for a day shall be immediately suspended till resolution of the issue in respect of crossing the permitted limit for mobile connections,” the circular said.

The government said the objective is to ensure that each subscriber is able to subscribe to and use mobile connections only within the prescribed limit. Under existing instructions issued on August 9, 2012, an individual customer can have a maximum of nine mobile connections in their name across all telecom service

providers and all licensed service areas in the country. However, the limit is lower in certain regions. Subscribers in Jammu and Kashmir, Assam and the North-East can have a maximum of six mobile connections. The latest development is about enforcement of the existing limit. The instructions also require customers to provide a declaration in the Customer Application Form (CAF) regarding the mobile connections already held in their name across telecom operators and licensed service areas. The DoT said the respective Licensed Service Areas (LSAs) will be the competent authorities to decide issues arising from the implementation of the instructions.

‘I can see papa smiling’

Continued from P1

“Mama, I last saw you and Papa together more than 35 years ago. Since the day Papa left, I have watched you face everything life threw at you with never-ending courage and dignity,” Rahul Gandhi wrote. The Congress leader said that he and his sister Priyanka Gandhi Vadra were perhaps the only ones who could truly understand the difficulties their mother faced in the years following Rajiv Gandhi’s assassination. “Only Priyanka and I really know what you have been through, and how difficult your life after Papa truly was,” he said. Rahul Gandhi also welcomed the publication of Sonia Gandhi’s memoir, *Belonging: A Journey of Love*, saying he was proud that her story would now be read by millions of people who have followed her public life. He noted that opening up about her personal journey could not have been easy for someone as private as his mother.

Konda Surekha defiant on daughter’s remarks

Continued from P1

The TPCC Disciplinary Committee issued a notice to Surekha on Wednesday after her daughter Konda Susmitha made corruption allegations against the Chief Minister and his family members. The Minister clarified in her letter that she should not be held responsible for the comments made by her daughter and requested the panel to withdraw the notice immediately. A day after the notices

were served, the Minister sent a reply to the Disciplinary Committee Chairman Mallu Ravi on Thursday. Surekha claimed that on the occasion of her birthday on August 19, fans of the ‘Konda’ family and Congress party workers organized celebrations.

She explained that her daughter attended the birthday celebrations organized by Congress workers at Geesukonda, her native place, as the chief

guest. She maintained that the comments made by her daughter during the event were entirely her personal opinions.

Surekha took exception for holding her accountable for her daughter’s personal views due to family ties.

The Minister affirmed her complete respect for the Congress party leadership and its code of discipline. She requested the committee to immediately withdraw the notice issued to her.

Trump announces ‘Economic D-day’

Continued from P1

“Their navy is gone, their air force is destroyed, their military factories are now rubble, their currency is worthless, and their country is hanging by a thread,” he said. He further warned that any countries or entities that provide Tehran with a financial lifeline would face severe penalties from the United States.

Meanwhile, Iranian Foreign Minister Abbas Araghchi hit out at Trump over his move, calling it a “diversion from America’s own crisis”. He criticised Washington for spreading “economic terrorism”, which he said threatens the global economy and sovereignty worldwide. The so-called “Economic D-Day” is a diversion from America’s own crisis: unprecedented

debt & surging interest costs. “The so-called “Economic D-Day” is a diversion from America’s own crisis: unprecedented debt & surging interest costs. Doubling down on failed policies will only bring further defeat—and enmity of Iranians. US economic terrorism threatens the global economy and sovereignty worldwide,” he said in a post on X.

“We expect consumption demand to remain healthy. The company remains confident of sustaining double-digit topline growth while improving profitability through premiumisation, innovation and scale benefits.” **-Sunil D'Souza, MD & CEO, Tata Consumer Products Ltd (TCPL)**

BIZ BRIEFS

Tech Survey by Amazon

Amazon.in's inaugural Best in Tech Survey, found AI features are now expected by 82 per cent of smartphone buyers. Performance and speed remain the strongest purchase drivers at 87 per cent, followed by battery life at 79 per cent and camera quality at 77 per cent. About 42 per cent are considering phones priced Rs25,000-Rs50,000, while 48 per cent plan upgrades within three months. Reviews and ratings influence 47 per cent of buyers.

Declassified on Discovery+

Discovery has announced the availability of Declassified: Operation Sindoor on this Independence Day to stream on Discovery+. The two-part docuseries was broadcasted on August 15, where Ajit Doval, National Security Advisor of India gave insights on Operation Sindoor. According to Doval: "We had decided the objective of the operation was destruction of the enemy camps particularly those who had been responsible for the Pahalgam attack."

Milestone in robotic surgeries

Dr. Mohit Bhandari and Team Mohak marked the national milestone with an extraordinary achievement: 51 robotic bariatric and metabolic surgeries completed in just 14 hours on August 15. The unprecedented initiative brought together six robotic systems, one designated console surgeon and one highly coordinated Indian clinical team. A total of 51 patients underwent robotic bariatric and metabolic surgery, comprising 30 men and 21 women. The patients ranged in age from 21 to 77 years, with an average age of 43.6 years.

AWS opens Builder Lofts

AWS has announced the opening of AWS Builder Lofts in Berlin, Hyderabad, and São Paulo, the permanent community spaces give students and developers a place to learn, connect, and contribute through hands-on experiences, community-led sharing, and technical collaboration. David Nalley, Director, AWS, said: "Twenty years ago, AWS launched its first services, and it was the builder community that believed in us from the very beginning. These spaces are our way of investing back in that community."

iQoo Z11 5g launched

Smartphone brand iQoo has launched iQoo Z11 5G which features India's first MediaTek Dimensity 7500 Turbo processor, a 2000-nit HBM display, immersive viewing, full-day battery life and a slim, durable design. It comes in 6GB+128GB, 8GB+128GB, 8GB+256GB and 12GB+256GB variants, in Celestial Blue and Aurora Green colours. iQoo Buds feature 50-hour battery life, AI Call Noise Cancelling and Bluetooth 6.1 dual-device connectivity for seamless everyday use.

Bulls charge after 7-day rout

US TREASURY INTERVENTION SPARKS BROAD-BASED RELIEF RALLY

MUMBAI

BENCHMARK equity indices bounced back on Thursday, with the Sensex climbing 628 points and the Nifty snapping its seven-day losing streak as easing global bond yields fueled a stock rally worldwide.

The 30-share BSE Sensex jumped 628.04 points, or 0.82 per cent, to settle at 77,537.72 after four days of decline. During the day, it surged 701.43 points, or 0.91 per cent, to 77,611.11. Snapping its seven-day falling streak, the 50-share NSE Nifty rose by 153.55 points, or 0.64 per cent, to close at 24,231.85.

"Markets found much-needed relief after the US Treasury stepped in to contain the surge in global bond yields, triggering a strong broad-based rebound and ending the domestic market's week-long losing streak. The intervention has dragged down the dollar, which, along with a firmer rupee and easing yield pressures, boosted attractiveness to EMs," Vinod Nair, Head of Research, Geojit Investments Ltd, said. The recovery was

widespread across sectors, driven primarily by strength in IT and financial stocks, as a cooling yield environment supports spending, he said. "Yet, the market's optimism remains guarded as stubbornly high crude oil prices, driven by unresolved US-Iran tensions, continue to cast a shadow over inflation and corporate profitability," Nair added. Among the Sensex firms, Eternal, Kotak Mahindra Bank, ITC, Bajaj Finance, Axis Bank and UltraTech Cement were the biggest winners. Tata Steel, InterGlobe Aviation, HCL Tech and Titan were the laggards. "Indian equity markets ended higher on Thursday, snapping a sev-

en-session losing streak—the longest in nearly 11 months—as easing global bond yields revived risk appetite and encouraged investors back into equities. "The recovery marked a decisive shift from the cautious tone that had dominated recent sessions, with benchmark indices holding on to their early gains throughout the day," Hariselman Radhakrishnan, Founder & CEO of HST Wealth, a SEBI-registered Research Analyst firm, said. Foreign Institutional Investors (FIIs) bought equities worth Rs 407.99 crore on Wednesday, according to exchange data. The BSE SmallCap Select index climbed 0.83

Bullion fires up: Gold hits ₹1.62 lakh, silver jumps ₹10,000

NEW DELHI

GOLD staged a sharp comeback in the national capital on Thursday, rising by Rs 4,300 to a three-month high of Rs 1.62 lakh per 10 grams, and silver surged by Rs 10,000 as investors turned to precious metals amid a weak US dollar. The yellow metal of 99.9 per cent purity appreciated by Rs 4,300 to Rs 1,62,300 per 10 grams (inclusive of all taxes), according to local traders. It had closed at Rs 1,58,000 per 10 grams on Wednesday.

The precious metal was last seen at comparable levels on May 26, when it was quoted at Rs 1,62,400 per 10 grams.

Silver mirrored the rally, soaring to a seven-week high of Rs 2,45,000 per kilogram (inclusive of all taxes) from Rs 2,35,000 per kg. "Gold hovered near its highest level in more than two months on Thursday, supported by a sharp decline in the US dollar and Treasury yields," Saumil Gandhi, Senior Analyst - Commodities at HDFC Securities, said. The dollar index slid to a three-month low, while lower Treasury bond yields improved the appeal of assets such as gold, he added. The rally in spot bullion prices came despite a retreat in the overseas markets. Gold dipped USD 66.31, or 1.47 per cent, to USD 4,456.72 per ounce, and silver dropped nearly 2 per cent to USD 65.82 per ounce. Spot gold was trading lower at USD 4,450 per ounce as crude oil prices surged over 2 per cent after the US President Donald Trump announced new economic sanctions on Iran, Praveen Singh, Head of Commodities at Mirae Asset ShareKhan, said.

Consumer Discretionary (0.75 per cent) and Top 10 Banks (0.69 per cent) also advanced.

per cent and MidCap Select index was up 0.56 per cent. Among sectoral indices, Realty jumped the most by

1.87 per cent. FMCG (1.03 per cent), Focused IT (1.02 per cent), IT (0.94 per cent), Financial Services (0.85 per

cent), Consumer Discretionary (0.75 per cent) and Top 10 Banks (0.69 per cent) also advanced.

Sebi allows IFSCA-regulated entities to access KYC records

NEW DELHI: Markets regulator Sebi on Thursday allowed entities regulated by the IFSCA to access the systems of registered KYC registration agencies, facilitating seamless sharing of client information for financial services. The markets watchdog said the step will enable interoperability and facilitate sharing of information between Sebi-registered KRAs and entities regulated by IFSCA. Under the move, the International Financial Services Centres Authority (IFSCA) regulated entities can access KYC Registration Agencies (KRAs) records for carrying out KYC of clients who engage them for financial services, Sebi said. A KYC Registration Agency (KRA) is an agency that maintains investors' KYC (Know Your Customer) records.

Air compressor brand VAYU launched in India

HANS BUSINESS HYDERABAD

VAYU, an air compressor brand created for manufacturers and growing businesses, announced its launch in India with a portfolio of compressed air solutions.

At launch, VAYU offers a 5–45 kW range of air compressors, available in fixed- and variable-speed configurations and designed for operating pressures ranging from 7 to 12.5 bar. The portfolio is supported by a range of accessories, genuine spare parts, comprehensive warranty coverage and nationwide service support. Anvar Jay Varadaraj, COO, Elgi Equipments, said: "India's manufacturing story is ultimately a story of its entrepreneurs - the businesses that continue to invest, build capabilities, create employment

Anvar Jay Varadaraj, COO, Elgi Equipments

and contribute to the country's growth. We have served this community for decades and have seen their needs evolve as their businesses grow."

Varadaraj, further added: "VAYU represents the next step in that journey, bringing dependable screw compressor technology, built in India around the realities of Indian manufacturing, to a broader base of businesses. Our ambition is to grow with these manufacturers in India and, over time, take VAYU to customers around the world."

Centre tightens sugar stock norms amid price surge

NEW DELHI: THE Centre on Thursday imposed a stock-holding limit on bulk consumers of sugar, amid concerns over rising prices due to tight supplies ahead of the festival season.

Food Minister Pralhad Joshi, in a social media, announced that bulk consumers using more than 10 tonnes of sugar a month will not be allowed to hold stock beyond what they would consume in 15 days. The food ministry has notified the Sugar (Stockholding Limit of Bulk Consumers) Order, 2026, which covers confectioners, soft drink manufacturers, food processing units, sweetmeat sellers and other institutional buyers. The order will come into force from September 1 and remain

in effect till November 30.

This follows an earlier order, effective August 1 to November 30, capping stock with sugar dealers at 4,000 quintals for 30 days.

The curbs come against the backdrop of a sharp rise in sugar prices, with ex-mill rates hitting record levels on account of a lower opening stock ahead of the 2026-27 season.

The all-India average ex-mill price rose to Rs 5,400-5,500 a quintal on Tuesday,

up from Rs 3,900 a year earlier, according to an industry body. Retail sugar prices have climbed about 13 per cent year-on-year to Rs 52.30 a kg as on August 18, from Rs 46.34 a year ago, as per consumer affairs ministry data. Demand for sugar typically rises between August and November, as the country celebrates major festivals, such as Ganesh Chaturthi, Dussehra, and Diwali. Under the new order, the monthly quantity of sugar sold by each mill to a bulk consumer -- whether directly or through dealers -- will be verified, and consumption will be determined with reference to GST returns filed by sellers and/or buyers, using the relevant HSN code applicable to sugar.

Local currencies can cut trade costs: RBI deputy governor

MUMBAI: Local currencies will play an ever-increasing role in cross-border trade and payments as they lower transaction costs, reduce currency mismatches, and improve settlement efficiency, RBI Deputy Governor Rohit Jain has said.

Speaking at the Annual Day of the Foreign Exchange Dealers' Association of India (FEDA) last week on 'India's Foreign Exchange Markets: Getting ready for the next Decade', Jain said that by their very

nature, markets are continuously evolving and parameters of their readiness are being regularly renewed according to the needs of the time. "Our market would be ready for the next decade if it can help facilitate India's ever-increasing engagement with other countries, absorb shocks in a non-disruptive manner, serve the smallest user as efficiently as the biggest, and embrace new technology without vitiating the trust it has earned," he said.

DGFT opens door wider for rupee-settled exports

NEW DELHI: THE government on Thursday amended certain provisions of the Foreign Trade Policy to make it easier for exporters to invoice overseas sales and receive payments in Indian rupees.

The amendments cover exports to all countries, although the rules vary by destination. Two paragraphs of the Foreign Trade Policy (FTP) 2023 have been amended "to align the provisions relating to denomina-

tion of export contracts and eligibility for FTP benefits in respect of export realisation in Indian Rupees with the Foreign Exchange Management (Manner of Receipt and Payment) Regulations 2023", the Directorate General of Foreign Trade (DGFT) said in a notification.

For countries outside the Asian Clearing Union (ACU), export contracts and invoices may now be denominated in any foreign currency or Indian rupees.

Earlier, export earnings generally had to be received in a freely convertible currency. Commenting on the notification, economic think tank GTRI said eligible rupee payments for exports to any country other than Nepal and Bhutan will now qualify for FTP benefits and count towards fulfilment of export obligations. Rupee earnings received through approved banking channels will there-

fore be treated on par with export payments received in foreign currency, it said, adding that exports financed through EXIM Bank or Government of India lines of credit may also be invoiced in Indian rupees. The ACU is a regional payment arrangement established in 1974 to facilitate trade settlements and reduce repeated transfers of foreign exchange by periodically settling the net obligations of its members.

fore be treated on par with export payments received in foreign currency, it said, adding that exports financed through EXIM Bank or Government of India lines of credit may also be invoiced in Indian rupees. KARAN ADANI ON WATCHING HIS FATHER THROUGH STORM

‘Sometimes the strongest answer is to keep building’

NEW DELHI

FOR Karan Adani, the past three years have been less about watching a business leader navigate a crisis and more about watching a father carry a burden.

In a deeply personal note, the managing director of Adani Ports reflected on what it was like to watch his father, billionaire Gautam Adani, navigate the turbulence that followed the Hindenburg Research report and subsequent US Department of Justice proceedings.

"Over the last three years, through the Hindenburg at-

tack on the Adani Group and the US DOJ proceedings, I was asked one question more than any other: What is it like, as a son, to watch your father endure all of this?" Karan wrote in a post on LinkedIn.

Karan said he struggled to answer the question while the events were unfolding.

"Now that it is behind us, I can."

There were mornings when another headline, accusation or judgment greeted him, he said.

"I felt anger. I felt concerned. And, as a son, I often wondered, how much should

one man have to absorb?"

But what stayed with him, he said, was not the noise.

It was watching his father go to work.

"My Father Kept Going to Work."

"It sounds like such an or-

dinary statement. It was anything but ordinary," Karan wrote.

He said resilience was often imagined as something dramatic - a speech, a show of defiance or a promise to prove critics wrong. What he saw instead was his father simply returning to the work in front of him every morning.

"Projects still had to be built. People still depended on us. Ports had to run. Power had to reach homes and businesses. Airports had to serve passengers. Investments whose results would be seen only decades later

still had to be made."

"India had not paused because our family was leaving through a storm. And neither did he."

For Karan, the experience also changed his understanding of the man he had always known simply as "Papa".

"Papa always had an extraordinary ability to focus on the task in front of him," he wrote.

"Work speaks for itself" has always been his instinct, Karan said.

The experience, he added, made him understand more deeply why his father had devoted his life to infrastruc-

ture and what he describes as nation-building.

"For him, these were never slogans," he wrote.

Gautam Adani has built the group around infrastructure and energy businesses ranging from ports and airports to power and other sectors, with investments often requiring a long-term view.

His ports-to-energy group never slowed during the three years of turbulence. It invested more than Rs 2.08 lakh crore in the second half of FY25 and FY26, including record capital expenditure of Rs 1,52,967 crore in FY26

AWS rolls out advanced OpenAI models in India

HANS BUSINESS HYDERABAD

AMAZON Web Services (AWS), announced the general availability of OpenAI GPT-5.6 Terra and Luna models on Amazon Bedrock in India with in-country inferencing. With this capability, OpenAI model inference on Amazon Bedrock is processed on AWS infrastructure, giving organizations the ability to leverage frontier models locally.

Nitin Bawankule, Head-Enterprise Sales, India, OpenAI, said: "What we're seeing in India is a shift from AI as experimentation to AI as operating leverage. Businesses want models that can help teams write better software, work through complex information, and make higher-quality decisions in the flow of work. For many organizations in India, especially in regulated sectors, local inferencing is a key part of adopting AI with confidence. Making our models available through Amazon Bedrock gives more organizations a practical way to bring that capability into production."

Satinder Pal Singh, Director, AWS India, said: "India's enterprises are moving rapidly from AI experimentation to production-scale deployment, and they need frontier intelligence that runs where their data already lives."

JawaYezdi expands digital reach campaign

HANS BUSINESS HYDERABAD

JAWAYEZDI Motorcycles launched the Yezdi Roadster Red Wolf campaign on e-commerce platforms Amazon.in and Flipkart.

For online purchase, the customer has to pay the ex-showroom booking amount on the e-commerce sites. After which an authorised local dealer confirms the order and guides the customer for the remaining on-road payment. Registration and insurance are completed at the dealership, followed by the final handover. Accessories and add-ons remain dealership purchases.

Anupam Thareja, Co-founder, JawaYezdi Motorcycles, said: "The Yezdi Roadster has resonated with riders because of its distinctive styling and refined engineering, when the Red Wolf came along, it called out to its pack like nothing before. With its availability on India's leading e-commerce platforms, the Red Wolf can bring its bold individuality across multiple Indian cities."

Thareja, further added: "Online presence for riders to discover and start their ownership journey seamlessly has become indispensable for us, and we will continue to endeavour to make our range of performance classics widely available."

Scholarships	
Scholarship Name 1:	Reliance Foundation Postgraduate Scholarships 2026-27
Description:	The Reliance Foundation Postgraduate Scholarships aim to enable and propel India's future leaders who can think big, think green, and think digital for the benefit of society.
Eligibility:	- Students who are enrolled in the first-year full-time regular postgraduation programmes pursuing select future-ready courses from Engineering, Technology, Energy and Life Sciences - Must have secured 550 to 1,000 in the GATE examination, OR must have a CGPA of 7.5 or above in their undergraduate studies (or equivalent percentage normalised to CGPA) if the student has not attempted GATE - Open to resident Indian citizens only
Prizes & Rewards:	Up to INR 6,00,000 over the duration of the degree
Last Date to Apply:	05-10-2026
Application mode:	Online applications only
Short Url:	www.b4s.in/hans/RFS15
QR Code:	https://dle9eg0t055l3.cloudfront.net/static/images/scho-media/2026-271787032072.png
Scholarship Name 2:	Reliance Foundation Undergraduate Scholarships 2026-27
Description:	The Reliance Foundation Undergraduate Scholarships support meritorious students from all corners of the country in pursuing their undergraduate education. This empowers them to continue their studies, become successful professionals, and realise their dreams, unlocking their potential to uplift themselves and their communities and contribute towards India's future socio-economic development.
Eligibility:	- Students must be enrolled in the first year of a full-time regular undergraduate (UG) degree in any stream at a recognised Indian institute - Must have passed Class 12 with a minimum of 60% marks - The annual household income should be up to INR 15,00,000 per year (preference will be given to those students whose family income is less than INR 2,50,000) - Open to resident Indian citizens only. An aptitude test is mandatory
Prizes & Rewards:	Up to INR 2,00,000 over the duration of the degree
Last Date to Apply:	05-10-2026
Application mode:	Online applications only
Short Url:	www.b4s.in/hans/RFS14

How AI is redefining executive education

RANJITA RAMAN

Artificial Intelligence is changing not only how professionals work, but also what they expect from learning. Across industries, AI is influencing decision-making, customer engagement, productivity, research and business strategy. Yet, discussions around executive education often remain limited to whether institutions should introduce more AI-focused courses.

That is no longer the most important question

The real question is whether executive education itself is evolving fast enough for a workplace where professionals are expected to continuously learn, adapt and make decisions alongside intelligent technologies. For years, executive education was largely viewed as a pathway to leadership roles, career progression or specialised expertise. Today, its purpose is becoming more fundamental. Professionals are not returning to learning simply to earn another qualification. They are doing so because the relevance of their existing knowledge is being tested more frequently than ever before.

This shift demands more than adding another AI module or introducing a course on Generative AI

The biggest mistake institutions can make is to treat AI only as a subject to be taught. AI must also influence how professionals learn, practise, receive feedback and apply

knowledge. Working professionals enter executive education with different experiences, responsibilities and career aspirations. A finance leader, healthcare administrator, marketing professional and technology manager may enrol in the same programme, but their learning requirements will rarely be identical. AI can help institutions create more contextual and adaptive learning journeys. It can identify knowledge gaps, recommend relevant content, provide timely feedback and allow learners to progress according to their individual needs. For professionals balancing demanding careers, this level of personalisation can significantly improve the relevance and practical value of learning.

Generative AI is expanding these possibilities further

Learning no longer needs to remain confined to lectures, scheduled discussions or static course material. Professionals can use AI-powered tools to clarify concepts, test ideas, simulate business situations and explore alternative approaches to real-world problems.

This can transform exec-

utive education from periodic classroom engagement into continuous knowledge support. However, greater use of AI should not be confused with reduced dependence on educators.

Executive education derives much of its value from faculty expertise, peer discussion, mentorship, debate and the exchange of real-world experiences. These interactions help professionals challenge assumptions, understand different perspectives and develop judgement. Technology can strengthen this process, but it cannot replace it. AI can generate information, but leadership requires interpretation. It can suggest options, but decision-making still requires accountability. It can personalise content, but meaningful learning depends on reflection, experience and human context.

In the years ahead, institutional success will increasingly depend on how effectively academic excellence, faculty expertise and intelligent learning technologies are combined

- AI is changing the purpose of executive education, as professionals increasingly return to learning to keep their knowledge and skills relevant.
- Institutions need to move beyond standalone AI courses and integrate intelligent technologies into how professionals learn, practise and receive feedback.
- AI can enable personalised learning by identifying knowledge gaps, recommending relevant content and adapting learning journeys to individual professional needs.
- Human capabilities remain central, with critical thinking, ethical judgement, communication, leadership and reflection continuing to require strong human involvement.
- The future of executive education will depend on balance, combining faculty expertise, peer learning and mentorship with AI-driven tools to improve workplace relevance

to create outcomes relevant to the workplace. At the same time, institutions must avoid using technology simply because it is new. The objective should not be to use AI everywhere, but to apply it where it improves understanding, engagement, accessibility and application.

Executive education must therefore evolve on two levels. It must prepare professionals to understand and use AI effectively, while

strengthening the human capabilities that technology cannot replicate, including critical thinking, ethical judgement, communication and leadership. The institutions that succeed will not necessarily be those that teach AI the fastest. They will be the ones who use it thoughtfully to make executive education more relevant, adaptive and valuable for professionals navigating an increasingly AI-driven world.

Grade 8 student secures global rank in LogiQids Olympiad

Grade 8 student Ansh Kumar of Birla Open Minds International School, secured International Rank 118 and School Rank 1 in the LogiQids Olympiad 2025-26, competing against students from across the globe.

The Olympiad was conducted in two stages, beginning with a school-level round followed by an online round. According to the school, nearly 3,100 schools participated in this year's competition. The result marked Ansh's first participation in an international-level Olympiad.

Ansh said the scale of the competition initially made him nervous, but regular practice helped him approach the subsequent rounds with greater confidence. He prepared using LogiQids worksheets and worked on developing his logical reasoning and problem-solving abilities with support from his teachers.

His performance highlights the role of sustained practice and analytical thinking in competitive academic platforms. The Olympiad focuses on logical reasoning and encourages students to approach problems through observation, analysis and structured thinking.

The school introduced computational thinking as part of its academic curriculum this session, with activities designed to encourage

students to examine problems from different perspectives and develop solutions. Such skills are increasingly relevant across academic disciplines and areas of future study.

Mr Anurag Upadhyay, Principal, Birla Open Minds International School, Daltonganj, said Ansh's achievement demonstrated the importance of dedication, perseverance and willingness to take on challenges.

"Ansh's achievement is a proud milestone for our school and a wonderful example of what dedication and a passion for learning can accomplish. Competing at an international level and securing such an impressive

rank in his first attempt is truly commendable," he said.

He added that the achievement demonstrated how consistent effort and guidance could help students approach challenging academic opportunities with confidence.

For Ansh, the result represents a significant academic milestone and an experience that helped him develop greater confidence in tackling unfamiliar problems. His performance also provides an example of how participation in Olympiads can expose school students to competitive environments while encouraging them to strengthen reasoning and problem-solving skills.

TODAY IS INTERNET SELF-CARE DAY

Healthier habits: A guide to digital self-care

The internet is increasingly becoming a useful space for people to learn about self-care, develop healthy routines and access support for personal well-being. When used thoughtfully, digital platforms can complement everyday practices such as mindfulness, meditation, reflection and emotional support. Meditation and mindfulness apps, for instance, offer guided exercises that can help users build regular moments of calm into busy schedules. Short breathing sessions, relaxation exercises and sleep-focused programmes can make self-care more accessible, particularly for students and working professionals managing demanding routines.

Virtual support groups are another important resource. Online communities allow people with shared experiences and interests to connect, exchange practical suggestions and feel less isolated. Such spaces can encourage empathy and create opportunities to learn from others while

maintaining flexibility about when and how people participate.

Educational websites, podcasts and videos can also introduce users to techniques related to stress management, sleep, physical activity and mindful living. The advantage of digital resources is that many can be accessed from home and incorporated into an individual's daily routine.

For students especially, learning to use technology not only for entertainment and academic work but also for reflection, relaxation and healthy habits can contribute to a more balanced digital lifestyle. Used responsibly, the internet can become a supportive tool for building awareness, resilience and everyday well-being.

BWF World Championships

Sindhu, Ayush bow out; Treesa-Gayatri into last 8

NEW DELHI: India suffered a big blow at the World Championships as PV Sindhu and Ayush Shetty faced contrasting defeats in the pre-quarterfinals, bringing the country's singles campaign to an end here on Thursday.

Two-time Olympic medalist Sindhu's hopes of winning an unprecedented sixth World Championships medal ended with a gruelling 11-21 21-15 17-21 loss to China's world No. 3 Wang Zhi Yi, who battled severe cramps in both legs to advance to the quarterfinals.

Earlier, Shetty suffered a tame 19-21 11-21 defeat against Indonesian nemesis Alwi Farhan in the men's singles pre-quarterfinals.

The 21-year-old Shetty, who had created a flutter by stunning defending champion and world No. 1 Shi Yu Qi in the opening round, went down to world No. 12 Farhan. It was his

fifth defeat in eight meetings against the 11th-seeded Indonesian, bringing the curtains down on India's men's singles campaign.

Lakshya Sen had bowed out of the premier tournament on Wednesday.

Earlier in the day, India's women's doubles pair of Treesa Jolly and Gayatri Gopichand moved a step closer to a medal by reaching the quarterfinals with a straight-game win over Japanese seventh seeds

Rin Iwanaga and Kie Nakaniishi.

The unseeded Indian pair, on a comeback trail after Treesa recovered from an injury, produced a dominant performance to outwit the world No. 7 Japanese pair 21-16 21-12 in a one-sided contest.

It was the first quarterfinal appearance by an Indian women's doubles pair at the World Championships since Jwala Gutta and Ashwini Ponnappa achieved the feat in 2015.

Chakraborty starts with win, Vignesh held to draw

MUMBAI: Top seed Mayank Chakraborty began his campaign with an impressive win while two leading contenders -- Vignesh Advait Vemula and Akhilbay Imangali -- were held to a draw by lower-rated opponents in the Asian Junior Classical Championship here on Thursday.

Vignesh was forced to share the point with Neemay Bhanushali, while Imangali of Kazakhstan was held by Rishaan Jain.

The opening round in the girls' section, however, produced a couple of notable upsets. Swara Lakshmi S. Nair

was held to a draw by Vakcheri Mohitha despite enjoying a significant rating advantage, while Aadya Gowda scored an impressive victory over the higher-rated WFM Mrittika Mallick.

Another surprise result saw Liliya Belaya of Uzbekistan defeat the higher-rated Archita Agrawal of India. The Open Championship has attracted a strong field of 85 players representing nine federations.

The tournament features six International Masters and eleven FIDE Masters, making it one of the strongest junior events in Asia. Leading the field

is top seed International Master Mayank Chakraborty of India, rated 2500.

The girls' championship has attracted players from seven federations. The top three seeds, WFM Pratitee Bordoloi of India, WFM Mariya Kholyavko of Kazakhstan and WFM Shohradova Lala of Turkmenistan, opened their campaigns with convincing victories to move into the lead group after the first round.

The championship was inaugurated by Grandmaster Vidit Gujrathi, who has been named a recipient of the prestigious Arjuna Award.

“Modern pop singers, if they are asked to do classical singing, ragas, then it will be very difficult. But these people are doing that. It is a mystery to me that the generation of IPL, the generation of T20, how do they play such good Test cricket? In both game of ball and game of gain.

- Sanjay Manjrekar

FIH Women's World Cup

India enter round 2 after goalless draw with England

AMSTELVEEN: The Indian women's hockey team advanced to the second round of the FIH World Cup after being held to a goalless draw by England in their final Pool D match here on Thursday, surviving a dozen penalty corners and late pressure.

India, who needed only a draw to progress, finished second in the pool with one win and two draws from three matches. China topped the group after beating South Africa 5-1 earlier in the day.

The result, however, masked a below-par performance from India, who struggled with passing, ball control and penalty-corner execution. They earned six

penalty corners but failed to convert any, with Deepika and Navneet Kaur unable to make their opportunities count.

India's goalkeepers Savita Punia and Bichhu Devi stood out, particularly as England earned as many as 11 penalty

corners during the match. Bichhu produced the crucial save with just 30 seconds remaining, diving to her left to deny England and preserve India's qualification.

India and China will carry one point each in the second round. India started aggres-

Sinquefield Cup

PRAGG LOSES TO WESLEY SO IN ARMAGEDDON, ENDS SECOND

ST. LOUIS (USA): Indian Grandmaster R Praggnanandhaa lost the finals in the Armageddon game against eventual champion American Wesley So to finish second in the Sinquefield Cup here.

After drawing with Anish Giri of the Netherlands in the final Classical game, Praggnanandhaa forced a tiebreaker against Wesley So who was leading the tournament for most of the rounds.

Wesley So was able to play out a draw with black pieces to win the tournament, which is a part of the Grand Chess Tour. The rules clearly stipulated that the tied players would play two rapid games.

If the tie is still unresolved, one final Armageddon game, five minutes for white and four for black will be played,

wherein black wins the match if he draws. As it happened both the rapid games ended in draws, leaving the score tied at 1-1. In the final Armageddon, Praggnanandhaa had the more difficult chance of winning with white which the Indian could not do and the game ended in a draw.

However, the silver lining for Praggnanandhaa was that he stood first at the end of the last event and has now qualified for the grand finale later this year.

For the records, Praggnanandhaa scored 35.5 in the total tour which was a full point clear of Wesley So.

Ministers' dogs get better facilities: Dipke on govt schools

LATUR: Cockroach Janta Party (CJP) convener Abhijeet Dipke on Thursday said Maharashtra School Education Minister Dada Bhuse should resign, claiming government schools are in a pitiable condition and that even "ministers' dogs get better facilities" than students.

Dipke, whose group launched the 'School Thik Karo' (improve government schools) campaign last week, visited a Zilla Parishad school at Ujani village in Latu's Ausa tehsil. Later, talking to reporters, he said elected representatives and ministers must be held accountable for the condition of schools, many of which continue to lack basic facilities such as proper classrooms, benches, toilets and safe access roads.

Students in some schools

were being treated "worse than animals", he alleged.

"It is a question of students' lives. When political leaders are not doing anything for students, why should people vote for them? Do people vote for them so that they can only travel in helicopters? People should see in what conditions their children are studying. The dogs of these ministers get better facilities than this," he said.

Dipke also asked people to force the leaders of political parties to work for education first and then come to seek votes.

China destroys residential quarters of monks in Tibet

Serta (Tibet) : China has intensified security restrictions at Larung Gar in Serta, with large numbers of troops deployed inside the religious encampment as authorities continue demolishing residential quarters used by monks, nuns and lay practitioners, Tibet Times reported.

According to Tibet Times, access to Larung Gar has been sharply restricted since the demolition drive began, with a checkpoint on the main access road allowing only a limited number of local residents and tourists to enter under strict supervision. Visitors are reportedly required to use public transport arranged through the checkpoint and are prevented from moving freely around the encampment.

A source cited by Tibet Times said tourists and pilgrims travelling from within

Tibet and other parts of China are now being barred from entering the settlement. Those permitted to enter are confined to designated areas, while troops and security personnel monitor the movements of visitors, residents, and monastics.

The report further said drone photography and filming, previously permitted for those holding authorisation, have been prohibited since the demolitions began last month. Military personnel and plainclothes officers have

Ganga nears danger mark in Varanasi, boat services suspended

VARANASI: The water level of the Ganga river has been rising steadily in Varanasi, prompting the administration to suspend boat operations as a precautionary measure, officials said on Thursday. ACP Atul Anjan Tripathi said the water level of the river stood at 68.35 metres on Thursday and was steadily moving towards the danger mark of 71.26 metres.

"Lakhs of devotees are visiting Varanasi during the month of Sawan. Keeping their safety in mind, boat operations have been suspended as a precautionary measure," Tripathi said.

He said a decision on resuming boat operations would be taken once the water level and the flow of the river return to normal.

RTOs quiz taxi, auto drivers in Marathi, notices sent

MUMBAI: Taxi and autorickshaw drivers in Maharashtra are being put through a 16-question test after the transport department launched a statewide drive on Thursday to check their working knowledge of Marathi.

Teams from Regional Transport Offices (RTOs) are issuing one-month notices to those unable to answer satisfactorily and warning that their badges would be suspended if they fail a subsequent test, officials said. "Mala CNG bharayche aahe. Thode thambave lage!" (I need to fill up with CNG, we'll have to stop for a while); "majhi rickshaw/taxi sharingchi aahe" (my auto/taxi is a shared one); and "meter chalu kele aahe" (have started the meter) are among the routine responses that officials expect from the drivers.

The exercise, announced by

Maharashtra Transport Minister Pratap Sarnaik on Wednesday, is being conducted as part of the state government's move to make working knowledge of Marathi mandatory for drivers of taxis, autorickshaws and app-based cabs.

A senior RTO official said a 16-question questionnaire was received from the Transport Commissioner's office and was based on the Marathi language training imparted to taxi and autorickshaw drivers by the Konkani Sahitya Parishad, which ended on Independence Day. (PTI)

MP HC ends women's 13-yr wait for MBBS degree

JABALPUR: Thirteen years after a woman completed her MBBS, the Madhya Pradesh High Court has cleared the way for her to obtain her degree and pursue medical practice, stalled after her admission was cancelled over a domicile issue.

Treating the petition as a special case, a division bench of Acting Chief Justice Vivek Rana and Justice Pradeep Mittal on Wednesday set aside the June 13, 2013 order cancelling Shailja Pandey's admission and directed Rani Durgavati University, Jabalpur, to issue her marksheet and degree.

Pandey had fairly disclosed all facts about her residence in Madhya Pradesh, the court observed, adding that action could have been taken at the time of her admission rather than after she completed her studies.

"On the basis of this degree, the petitioner will be

entitled to practice in the medical field, but the fact remains that she completed her studies in the year 2013, and now more than 13 years have passed," the court said in its order.

Pandey could not practice during this period because she did not have her degree or registration with the medical regulator, the HC noted.

In her petition, Pandey said the college raised the objection over her domicile midway through the MBBS course, although she had secured admission after furnishing a domicile certificate issued by the competent authority.

Tarun Tejpal challenges rape conviction in SC

NEW DELHI

Tarun Tejpal challenges Bombay High Court's rape case conviction order in Supreme Court days after Goa's 'life term' plea.

The Goa government had approached the Supreme Court seeking the maximum sentence for former Tehelka editor Tarun Tejpal in a rape case, arguing that the passage of time cannot

be a reason for imposing a lesser sentence in such a serious offence, Advocate General Devidas J Pangam said on Wednesday.

He said the government filed a Special Leave Petition (SLP) before the Supreme Court against the quantum of sentence imposed in the case.

The Goa bench of the Bombay High Court on August 6 convicted Tejpal

and sentenced him to 10 years in prison for raping a former colleague, overturning his 2021 acquittal in a decade-old case.

On September 29, 2017, Tejpal was charged under various sections of the Indian Penal Code (IPC), including rape, sexual harassment, and wrongful confinement. However, he pleaded not guilty.

When Kathak becomes a dialogue with the divine

ANNA RAO GANGAVALLI

At Ethnic Hall, Shilparamam, Madhapur, a Kathak recital took an unconventional approach to the familiar idea of devotion. Aavahan: Some Dialogues with the Divine, presented by Aangan and Nadee School of Movement, explored prayer not as ritual or surrender, but as an intimate conversation between the seeker and the divine. The 40-minute solo production was performed by Niral Uprit, an Indore-based dancer who has trained in Kathak since the age of five and is a senior disciple of Guru Damayanti Miradwal. Uprit is also the founder of Technrityam, a digital riyaz companion for Indian classical arts, and works as a public speaker and writer while studying management science. The performance created an intimate setting for its central idea. A line of flowers bordered the dance space, while Uprit appeared in a flowing, silvery-white costume that complemented the movement. A telephone placed on a table became

Niral Uprit's solo production Aavahan: Some Dialogues with the Divine brings classical Kathak into conversation with contemporary theatre, poetry and Advaita philosophy

an unusual theatrical device through which the Gods were "summoned" one after another. A carved wooden screen provided transitions between sections. Ganesha, Shiva, Devi and Krishna were each approached through a distinct musical and

choreographic language. Rather than retelling their familiar stories, however, the production questioned how people inherit forms of devotion. The dancer-seeker encounters the silence or ambiguity that can follow conventional prayers and begins to question whether inherited ways of asking and accepting can remain meaningful.

The production therefore sought a more personal path to the divine. Traditional Kathak compositions and Sanskrit shlokas shared the stage with spoken word, English voiceover and original Hindi poetry. Ancient and contemporary elements were placed side by side, turning mythology into a

subject of enquiry rather than simply narration. The prerecorded music, composed by Savni Bhatt, combined singing, instrumental passages, recitation and voiceover. Tabla and pakhawaj formed the rhythmic foundation, while harmonium provided melodic support. The bansuri was particularly prominent in the Krishna section, adding a distinct melodic character to the movement.

Kathak's rhythmic vocabulary remained central to the production. Teental featured in the invocatory and celebratory sections, including Ganesha and Devi, as well as the final movement. The Shiva bandish used Roopak, whose uneven cycle brought urgency to the section. Ektaal appeared during faster passages, allowing Uprit's swift movements and chakkar to heighten the performance's intensity. Kavitts, parans and bandishes were woven into the choreography alongside Sanskrit verses from the Upanishads and the Bhagavad Gita. These textual elements operated as another layer of meaning

beneath the dance, connecting the physical vocabulary of Kathak with the philosophical questions at the heart of the production. Uprit differentiated the four deities through rhythm, expression and movement. Her portrayal of Shiva, in particular, combined poetic composition with a striking interpretation of the Lord of Dance. The Krishna section drew on the interplay between flute, voice and choreography. Across the recital, clean footwork, controlled angika patterns and fleet chakkar demonstrated her command of the classical form. The performance gradually moved towards its central philosophical insight. As the dancer addresses the deities and finds that their answers repeatedly return the questions to her, the search turns inward. The ultimate realisation echoes the Advaita understanding that what one seeks outside may ultimately be discovered within the self. Aavahan thus emerged as an exploration of seeking, questioning and self-discovery through Kathak. Its distinctive quality lay in bringing a traditional Indian classical form into dialogue with contemporary theatrical devices, original poetry, technology and philosophical enquiry. The programme was organised and introduced by Aditi Rao Ashtaputre, founder of Nadee School of Movement. The performance was received with appreciation, particularly for the way it retained the discipline of Kathak while creating space for a contemporary interpretation of devotion.

Meenakshi Seshadri questions cinema's in-law stereotypes

Veteran actress Meenakshi Seshadri has reflected on the way the relationship between a mother-in-law and daughter-in-law has traditionally been portrayed in Indian cinema. She noted that the dynamic has often been presented in a negative light. Talking about the same, the 'Damini' actress recalled her 1990 film 'Ghar Ho To Aisa,' in which she played a daughter-in-law opposite veteran actress Bindu. She shared that her character stood up to her on-screen mother-in-law and taught her some hard lessons, with the film using comedy, melodrama and even karate sequences to highlight the conflict. Meenakshi Seshadri shared a video recreating the song 'January February' from her 1990 film Ghar Ho To Aisa. Dressed in a stylish co-ord outfit, the actress showcased her dance moves and expressive performance, giving a nostalgic glimpse of the popular track. The song was originally sung by Asha Bhosle and Mohammed Aziz, with music composed by Bappi Lahiri and lyrics penned by Majrooh Sultanpuri. For the caption, she wrote, "The relationship between a mother-in-law

and her daughter-in-law has often been portrayed with a negative flavor in Indian cinema. In my movie Ghar ho to aisa I pretend to be a daughter-in-law to the character played by famous actress Bindu. My character teaches some hard lessons to the mother-in-law, using exaggerated comedy, melodramatic components, and some keen karate moves!" "I personally wish that after marriage, mother-in-law and daughter-in-law develop a beautiful relationship, just

like a real-life mother and daughter." In Ghar Ho To Aisa, Meenakshi Seshadri played Seema Kumar, the strong-willed wife of Amar, portrayed by Anil Kapoor. Her character was portrayed as a fearless daughter-in-law who stood up to her cruel in-laws and challenged the domestic mistreatment she faced. Bindu portrayed the film's quintessential negative mother-in-law, a role that became one of her memorable characters. The film was later remade in Telugu as "Attintlo Adde Mogudu."

Sonam Kapoor returns to spotlight after postpartum sabbatical

Actress and fashion icon Sonam Kapoor made a striking appearance at a luxury jewellery showcase in Mumbai. The actress was seen turning heads in an elegant black saree paired with statement jewellery.

The actress, through her post on social media, stated that she is 'coming out of postpartum sabbatical' as she stepped out for the event. For the event, Sonam opted for a black saree featuring detailed metallic-gold along the border and 'pallu'. The saree also featured traditional embroidered motifs in shades of gold and brown. She paired it with a black blouse with gold-stripped detailing on the sleeves.

The actress accessorised the look with an elaborate diamond and gemstone-studded necklace, matching earrings and statement rings. For the hair, she chose to neatly pull it back into a sleek bun, with a dewy makeup look. Talking about Sonam, over the years, she has built a distinct style identity in the world of fashion.

Her relationship with fashion has been closely intertwined with her sister Rhea Kapoor, who has frequently styled her for major public appearances. Rhea, for the uninitiated, is a film producer and fashion designer, stylist.

The sisters' creative partnership also extends to production. Rhea began her film-production career with Aisha in 2010, which starred Sonam alongside Abhay Deol. The sisters subsequently collaborated on films including Khoobsurat and Veere Di Wedding. Aisha, in particular, became an important part of Sonam's fashion and film journey. Released in 2010, the romantic comedy saw her play the title character, a young woman deeply interested in fashion and social life. The film also became closely associated with Sonam's evolving fashion image during her initial days in Bollywood.

On the acting front, Sonam began her career with Sanjay Leela Bhansali's Saawariya in 2007. She went on to feature in films including Delhi-6, I Hate Luv Storys, Aisha, Raanjhanaa, Bhaag Milkha Bhaag, Khoobsurat, Neerja, Prem Ratan Dhan Payo, Veere Di Wedding, Sanju, Ek Ladki Ko Dekha Toh Aisa Laga, The Zoya Factor and AK vs AK. Her performance in Neerja earned her a National Film Award. On the personal front, Sonam married businessman Anand Ahuja in May 2018. The couple welcomed their first son, Vayu, in August 2022. In March 2026, they welcomed their second son, Rudralokh.

Viswanath & Sons: Venky Atluri speaks about Suriya's belief and movie's Rs 150 cr success

Viswanath & Sons, the family entertainer starring Tamil hero Suriya and Mamitha Baiju, saw a spectacular opening after its release on August 14, 2026. The film directed by Venky Atluri has earned over Rs. 150 crore at the worldwide box office in four days. It has seen great response from the audience for its humor, sentiment, and family-centric theme.

Venky Atluri said that he is overwhelmed by appreciation for the film. The director also said Surya was immediately roped in for the project because he narrated it to him. Surya was open to

doing a family entertainer at this stage in his career, said Atluri. Plus, he pushed the team to keep the narration straightforward and avoid commercialism.

The Tholiprema director stated that his idea for this project, which was conceived in 2022, was to create a film about a man turning 40 without getting married. He also noted that the film's purpose is to explain why the protagonist behaves the way he does rather than cast him as a villain.

Furthermore, Venky Atluri stated that constructing a big house set for the film was challenging. He added that it had to be something extraordinary, and he complimented production designer Banglan and cinematographer Nimesh for their excellent work on the film.

Moreover, Atluri stated that Trivikram Srinivas saw the film and enjoyed it. He further stated that the filmmaker suggested no changes to the project after seeing it, and it was

surprising because Trivikram and Mani Ratnam were Atluri's boyhood heroes. In addition to Suriya, Venky Atluri signed Mamitha Baiju after seeing the actress in Premalu. Atluri revealed watching her perform comedy in Tamil was a treat for him. Her Tamil skills and great sense of humor made him decide to cast her in the film. In addition, it is reported that "Viswanath & Sons" have been produced by Suryadevara Naga Vamsi and Sai Soujanya under Srihara Studios banner in association with Sithara Entertainments and Fortune Four Cinemas.

'Irumudi' baby star Nakshatra shares her excitement over playing Ravi Teja's daughter

Baby Nakshatra makes her Telugu debut with the much-anticipated Irumudi. The young girl has expressed her delight to play the daughter of Mass Maharaja Ravi Teja in Shiva Nirvana's directorial venture and she is confident that the audience will connect to this emotional family entertainer.

Starring Ravi Teja in a lead role, the film also marks the debut of Priya Bhavani Shankar in Telugu cinema. This family genre movie produced by Mythri Movie Makers is all set to release on August 21 st .

Speaking about her role in the film, Nakshatra said, "I play the daughter of Ravi Teja in the film while Priya Bhavani Shankar plays my mother. Both Ravi Teja and Priya were extremely supportive and helped me a lot during the shoot. Interestingly, I have dubbed my own songs for the movie."

The thirteen years old actress who was from Kerala, has starred in 6 films in kannada, Malayalam and Tamil and studied 7th standard said that she got signed by the director Shiva Nirvana who saw her Instagram reel. She also added that working with legend Ravi Teja was an incredible experience and Vikramarkudu is his favorite film. Nakshatra thanked the parents and teachers for encouraging her and made her pursue studies and acting career.

Nakshatra also said that shooting in sileru, which is the shooting location of Irumudi was nostalgic for her as it had

similarity with Kerala. She has a particular fondness for the song "Yalo Yalo".

With Ravi Teja, Priya Bhavani Shankar and baby star Nakshatra at the helm of the emotional family drama, Irumudi promises to deliver a compelling tale of family, action and drama.

Entertainment

Audience of every age group will enjoy 'Rambha Urvashi Menaka': Director Chandra Mohan Chintada

WAllari Naresh's much anticipated comedy entertainer, Rambha Urvashi Menaka, is all set to hit the screens this September 4 globally. The director, Chandra Mohan Chintada, said that the movie is the total entertainment package for all age groups.

Reportedly, the film, which has released its first lookers including teaser and song Naa Kanti Maa Kanule , is produced by Rajesh Danda along with Nimmakayala Prasad banner under Annapurna Studios and Hasya Movies. While talking about the movie, the director said, "Rambha Urvashi Menaka is an interesting story of an aspiring hero who wishes to establish himself in his village and stumbles upon a mysterious book belonging to Rambha, Urvashi and Menaka and lands up in a hilarious fantasy world.

The film has Allari Naresh's comedy and has a massive 25 minutes embedded as a surprise episode. But there is no vulgarity and adult humor in it," he added.

Moreover, Chandra Mohan stated that the movie is a total family entertainer. The film also stars Vennela Kishore, Senior Naresh and Srinivas Reddy apart from the heroines Surabhi, Raashi Singh, Prisha and Vishnupriya. With 35 minutes of CG, the massive fantasy comedy is said to be a treat for the audiences as they would witness Allari Naresh's comic talent in full swing. The music is composed by Chetan Bharadwaj, and the makers are confident that the film will see Allari Naresh coming back in full-fledged entertaining avatar.

'Manasa Vacha' from 'EPIC' is a soulful melody

The makers of the upcoming youth romance entertainer EPIC - FIRST SEMESTER have released the third single from the film titled Manasa Vacha, a beautiful soulful melody that delves deep into the emotions of love, longing and relationships.

Rendered in a melodious voice by legendary singers KS Chithra & SP Charan, the song is composed by Hesham Abdul Wahab while Sri Harsha Emani has penned down the beautiful lyrics that reflect the emotions of the lead pair played by Anand Deverakonda and Vaishnavi Chaitanya.

The beautiful pictorial narration of the song revolves around the emotions of the lead pair while also reflecting the onscreen relationship between them. The composition by Hesham Abdul Wahab along with the enchanting voices of KS Chithra and S. P. Charan create a unique soulful blend.

EPIC - FIRST SEMESTER, a youthful romance entertainer, directed by Aditya Haasan and produced by Suryadevara Naga Vamsi, Sai Soujanya, under Sithara Entertainments, Fortune Four Cinemas presents Srihara Studios.

With a beautiful romantic theme, the film has been creating waves with the audience and we expect that the latest single Manasa Vacha will contribute to it. The makers are rolling out the promotions for the film in gradual manner which will eventually reach its peak on the release day.

EPIC - FIRST SEMESTER slated to release globally on September 11, 2026.

'Killer/KillR' release date creates buzz

The makers of the sci-fi thriller Killer/KillR have announced October 17 as the worldwide theatrical release date of the film which will witness the grand opening on the auspicious occasion of Vijayadashami. Starring Jyothi Poorvaj, Poorvaaj in lead roles, the movie has been creating a lot of speculations in the media and social circles with some interesting glimpses.

Presented by Urveesh Poorvaj, with blessings of Dhyanam Nannagaru, this Poorvaaj directorial venture produced by Poorvaaj and Padmanabha Reddy A. under Think Cinema and AU & I Studios banners is all set for its release soon. The film features Manish Gilada, Chandrakanth Kollu, Vishal Raj, Archana Ananth and Gautham Chakradhar Koppishetti in pivotal roles. The latest released glimpse of Killer/KillR on the occasion of Vijayadashami hints at Dr. Poorvaaj, the greatest genius scientist of India to whom an alien from the different dimension communicates on the day of the film's release informing him about sending a space-ship to save the mankind.

With the line "Our future is that alien's past", the glimpse leaves lot of questions about the movie's story-line regarding what is actually coming for humans to be saved

and what exactly the alien has up his sleeve for them. As it wraps up, the intriguing statement of "On October 17, we will decide your destiny" leaves the audience wanting more of the film.

Apart from the theatrical release, Killer/KillR is also gearing up for an overseas release with OMG Pictures entertaining the international distribution rights to this sci-fi thriller across US, Europe, Canada, Arab, Malaysia, New Zealand and Russia.
